Acting Commissioner
The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and highquality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

## FOREWORD

The 2016 edition of the Digest of Education Statistics is the 52nd in a series of publications initiated in 1962. The Digest has been issued annually except for combined editions for the years 1977-78, 1983-84, and 1985-86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The Digest includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the Digest, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to data on educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the Digest contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The Digest contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Funds for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Use of Technology. Each chapter is divided into a number of topical subsections. Preceding the seven chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The Digest concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the Digest tables; the second, Definitions, is included to help readers understand terms used in the Digest; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

The Digest can be accessed from http://nces.ed.gov/ programs/digest. Tables from each Digest edition since 1995 can be viewed by selecting the edition year from a drop-down menu. All tables that appear in the print version of the Digest are also included in the online version. In addition, the online version of recent editions includes a
number of supplemental "web-only" tables. (Web-only tables are identified as such in the print version's comprehensive List of Reference Tables.) In the online version, Digest tables are available both in HTML format and as downloadable Excel files. The most current versions of Digest tables are posted to the NCES website on a rolling basis before the entire edition of the report has been completed. The "Most Current Digest Tables" page provides access to the most recent versions of all tables, including any tables already completed for an edition currently in progress.

In addition to providing updated versions of many statistics that have appeared in previous years, this edition incorporates new material on the following topics:

- Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, race/ethnicity, and selected racial/ethnic subgroups (table 102.62)
- Number and percentage of 25- to 64-year-old persons with disabilities, by highest level of educational attainment and other selected characteristics (web-only table 104.75)
- Number and percentage of homeless students enrolled in public elementary and secondary schools, by various characteristics (tables 204.75a-204.75e), including data by grade (table 204.75a), by school district locale (table 204.75b), by state (tables 204.75c and 204.75d), and for the 120 largest school districts (table 204.75e)
- Private elementary and secondary school enrollment, percentage distribution of private school enrollment, and private enrollment as a percentage of total enrollment in public and private schools, by school orientation and grade (table 205.15)
- Number and percentage of persons completing a teacher preparation program and receiving an initial teaching credential, by state or jurisdiction (web-only table 209.05)
- Percentage of 4th-, 8th-, and 12th-grade public school students with their own or a shared digital device at home, by selected student and school characteristics (table 218.40)
- Percentage distribution of 4th-, 8th-, and 12th-grade public school students, by when student first used a laptop or desktop computer and selected student and school characteristics (table 218.45)
- Percentage distribution of 8th-grade public school students, by number of hours they spend using a laptop or desktop computer for schoolwork on a weekday and selected student and school characteristics (table 218.50)
- Number and percentage distribution of 5- to 17-year-old students, by home internet access, poverty status, and locale (table 218.70)
- Number and percentage distribution of 5- to 17-year-old students, by home internet access, race/ethnicity, and locale (table 218.71)
- Percentage distribution of fall 2010 first-time kindergartners, by two risk factors (low parental education and family poverty) and selected child, family, and school characteristics (table 220.39)
- Fall 2010 first-time kindergartners' mathematics scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year (table 220.41)
- Fall 2010 first-time kindergartners’ science scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year (table 220.42)
- Percentage of fall 2010 first-time kindergartners, by frequency with which they reported being victimized by their peers in third grade, type of victimization, and selected child, family, and school characteristics (table 220.55)
- Percentage of fall 2010 first-time kindergartners, by frequency with which the teacher reported that they victimized their peers in third grade, type of victimization, and selected child, family, and school characteristics (table 220.56)
- Fall 2010 first-time kindergartners' scores on various academic, social, and emotional scales in third grade, by frequency of being victimized by their peers, frequency of victimizing their peers, and type of victimization (table 220.57)
- Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics (table 221.35)
- Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics (table 222.45)
- Average National Assessment of Educational Progress (NAEP) science scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics (table 223.40)
- Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score of 8th-graders, their scores on the three TEL content areas, and percentage attaining TEL achievement levels, by selected student and school characteristics (table 224.70)
- Average scale score of 8th-graders on the information and communication technology (ICT) content area of the National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) assessment and percentage distribution of 8th-graders, by computer use and internet access at home and other selected characteristics (table 224.73)
- Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of learning about or discussing various technologyand society-related topics in school (web-only table $224.74 a$ ), frequency of having done or of learning about various design- and systems-related activities or topics in school (web-only table 224.74b), frequency of having done various design- and systems-related activities outside of school (web-only table 224.74c), frequency of using a computer or other digital technology to perform various activities for schoolwork (web-only table 224.74d), frequency of using a computer or other digital technology to perform various activities not related to schoolwork (web-only table $224.74 e$ ), level of confidence in ability to perform various technology- and engineering-related tasks (web-only table 224.74f), and selected student and school characteristics
- Average ACT scores and percentage of graduates taking the ACT, by state (table 226.60)
- Percentage distribution of students in grades 9-12 and percentage reporting selected types of victimization or risk behaviors, by sex and sexual orientation (table 228.99)
- Among students ages $12-18$ who reported being bullied at school during the school year, percentage reporting that bullying had varying degrees of negative effect on various aspects of their life, by aspect of life affected and selected student and school characteristics (table 230.52)
- Among students ages $12-18$ who reported being bullied at school during the school year, percentage reporting that bullying was related to specific characteristics, by type of characteristic related to bullying and other selected student and school characteristics (table 230.53)
- Number and percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2011-12 academic year, by attainment and enrollment status and selected characteristics (table 326.50)
- Labor force status of persons 25 to 64 years old, by disability status, highest level of educational attainment, age, sex, and race/ethnicity (web-only table 501.35)
- Percentage of 16- to 64-year-old undergraduate students who were employed, by attendance status, hours worked per week, and selected characteristics (table 503.40)
- Average literacy and numeracy scale scores and percentage distribution of 25 - to 65 -year-olds, by proficiency level and selected characteristics (table 507.15)
- Percentage of 25 - to 65 -year-olds who were not assessed in the problem solving in technology-rich environments domain and average scale score and percentage distribution of those who were assessed, by proficiency level and selected characteristics (table 507.16)
- Average mathematics score and percentage of eighthgraders, by access to the Internet and a computer or tablet at home or some other place outside of school and frequency of computer or tablet use for schoolwork outside of school (table 602.32a), mathematics teachers' reports of student access to computers and frequency of com-
puter use during mathematics lessons (table 602.32b), and country or other education system
- Average science score and percentage of eighth-graders, by access to the Internet and a computer or tablet at home or some other place outside of school and frequency of computer or tablet use for schoolwork outside of school (table 602.33a), science teachers' reports of student access to computers and frequency of computer use during science lessons (table 602.33b), and country or other education system
- Average advanced mathematics and physics scores of high school seniors who had taken advanced courses in these subjects, seniors who had taken such courses as a percentage of their age cohort, and instructional time in such courses, by country (table 602.35)
- Average reading literacy, mathematics literacy, and science literacy scores of 15 -year-old students, by computer and internet access at home and country or other education system (table 602.45)
- Percentage distribution of fourth- and eighth-graders, by frequency with which they reported being bullied during the school year and country or other education system (table 602.84)
- Percentage distribution of fourth- and eighth-graders, by extent to which their teachers rated the school as safe and orderly and country or other education system (table 602.85)
- Percentage distribution of fourth- and eighth-graders, by severity of school discipline problems reported by their principal and country or other education system (table 602.86)
- Percentage distribution of 16- to 19 -year-olds, by frequency of using computers or the Internet to perform selected activities in everyday life and country or subnational region (table 604.40)
- Percentage of 16 - to 19 -year-olds who were not assessed in the problem solving in technology-rich environments domain and percentage distribution of those who were assessed, by proficiency level, selected U.S. and international respondent characteristics, and country or subnational region (table 604.50)
- Percentage of children ages 3 to 18 living in households with a computer, by type of computer and selected child and family characteristics (table 702.10)
- Percentage of children ages 3 to 18 who use the Internet from home, by selected child and family characteristics (web-only table 702.15)
- Percentage of children ages 3 to 18 who use the Internet and, among those who use the Internet, percentage using it in various locations, by selected child and family characteristics (table 702.20)
- Percentage of persons age 3 and over who use the Internet anywhere and who use the Internet at selected locations, by selected characteristics (table 702.30)
- Percentage of home internet users age 3 and over and ages 3 to 18, by means of internet access from home and selected characteristics (web-only table 702.35)
- Percentage of persons age 3 and over and ages 3 to 18 with no internet access at home and percentage distribution of those with no home access, by main reason for not having access and selected characteristics (web-only table 702.40)
- Number and percentage of households with computer and internet access, by state (web-only table 702.60)

Figure Page

1. The structure of education in the United States ..... 14
2. Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965-66 through 2015-16 ..... 15
3. Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2016 ..... 16
4. Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2016 ..... 16
5. Percentage distribution of persons 25 through 29 years old, by highest level of educational attainment: 2016 ..... 17
6. Percentage of persons 25 through 29 years old, by selected levels of educational attainment and race/ethnicity: 2006 and 2016 ..... 17
7. Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public elementary and secondary schools: 1960-61 through 2014-15 ..... 79
8. Percentage change in public elementary and secondary enrollment, by state: Fall 2009 to fall 2014 ..... 80
9. Total and full-day preprimary enrollment of 3 - to 5 -year-olds: October 1970 through October 2015 ..... 80
10. Percentage of revenue for public elementary and secondary schools, by source of funds: 1970-71 through 2013-14 ..... 81
11. Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970-71 through 2013-14 ..... 81
12. Enrollment, degrees conferred, and expenditures in degree-granting postsecondary institutions: 1960-61 through 2015-16 ..... 405
13. Percentage change in total enrollment in degree-granting postsecondary institutions, by state: Fall 2010 to fall 2015 ..... 406
14. Enrollment in degree-granting postsecondary institutions, by age: Fall 1970 through fall 2026 ..... 406
15. Ratio of full-time-equivalent (FTE) students to total FTE staff and to FTE faculty in degree-granting postsecondary institutions, by control of institution: 1995, 2005, and 2015 ..... 407
16. Number of bachelor's degrees conferred by postsecondary institutions in selected fields of study: 2004-05, 2009-10, and 2014-15 ..... 407
17. Percentage distribution of total revenues of public degree-granting postsecondary institutions, by source of funds: 2014-15 ..... 408
18. Percentage distribution of total revenues of private nonprofit degree-granting postsecondary institutions, by source of funds: 2014-15 ..... 409
19. Percentage distribution of total revenues of private for-profit degree-granting postsecondary institutions, by source of funds: 2014-15 ..... 410
20. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2016 ..... 656
21. Percentage distribution of federal on-budget funds for education, by agency: Fiscal year 2015 ..... 656
22. Unemployment rates of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2016 ..... 673
23. Employment to population ratios of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2016 ..... 673
24. Percentage distribution of 2014-15 high school dropouts and high school completers not enrolled in college, by labor force status: October 2015 ..... 674
25. Median annual earnings of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 2015 ..... 674
26. Median annual earnings of 25 - to 29 -year-old bachelor's degree holders employed full time, by field of study: 2010 and 2015 ..... 675
27. Percentage change in enrollment, by major areas of the world and level of education: 2000 to 2014 ..... 732
28. Percentage of the population 25 to 34 years old with an associate's or higher degree, by OECD country: 2015 ..... 733
29. Public and private direct expenditures on education institutions as a percentage of gross domestic product (GDP), by OECD country: 2013 ..... 734
30. Percentage of children ages 3 to 18 living in households with a computer, by type of computer and family income: 2015 ..... 788
31. Percentage of persons age 25 and over using the Internet anywhere, at home, and at the workplace, by highest level of educational attainment: 2011 and 2015 ..... 789

## List of Text Tables

Table Page
A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949-50 to fall 2026 ..... 12
B. Number of public school staff, by selected categories: 1969-70, 1980, and 2014 ..... 72
C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007-08 through 2013-14 ..... 403
D. Federal on-budget funding for education, by category: Selected fiscal years, 1965 through 2015 ..... 647
E. Median annual earnings of full-time year-round workers 25 years old and over, by selected levels of educational attainment and sex: 1995, 2005, and 2015 ..... 672
F. Population and enrollment at different levels in major areas of the world: 2000 and 2014 ..... 728
G. Common Core of Data (CCD) file versions used in the current edition of the Digest of Education Statistics: 1986-87 through 2014-15 ..... 800

## List of Reference Tables

## Chapter 1. All Levels of Education

## Population

101.10. Estimates of resident population, by age group: 1970 through 2016 ..... 18
101.20. Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2016 ..... 19
101.30. Number, percentage, and percentage distribution of total resident population and population under 18 years old, by nativity, race/ethnicity, and selected racial/ethnic subgroups: 2005, 2010, and 2015 ..... 20
101.40. Estimated total and school-age resident populations, by state: Selected years, 1970 through 2015 ..... 23
Characteristics of Households With Children
102.10. Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2016 ..... 24
102.20. Number and percentage distribution of children under age 18 and under age 6, by living arrangements, race/ethnicity, and selected racial/ethnic subgroups: 2015 ..... 25
102.30. Median household income, by state: Selected years, 1990 through 2015 ..... 27
102.40. Poverty rates for all persons and poverty status of related children under age 18, by region and state: Selected years, 1990 through 2015 ..... 28
102.50. Official and supplemental measures of poverty status for all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2015. ..... 29
102.60. Number and percentage of related children under age 18 living in poverty, by family structure, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2015 ..... 32
102.62. Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, child's race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2015 ..... 34
102.70. Number and percentage of students in prekindergarten through grade 12 living in poverty, by control of school: 2000 through 2015 Web-Only
Enrollment Rates
103.10. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2015 ..... 36
103.20. Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2015 ..... 38
Educational Attainment
104.10. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and sex: Selected years, 1910 through 2016 ..... 40
104.20. Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity and sex: Selected years, 1920 through 2016 ..... 43
104.30. Number of persons age 18 and over, by highest level of educational attainment, sex, race/ ethnicity, and age: 2016 ..... 46
104.40. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2015 ..... 48
104.50. Persons age 25 and over who hold a bachelor's or higher degree, by sex, race/ethnicity, age group, and field of bachelor's degree: 2015 ..... 50
104.60. Number of persons 25 to 34 years old and percentage with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2015 ..... 51
104.70. Number and percentage distribution of children under age 18, by parents' highest level of educational attainment, child's age group and race/ethnicity, and household type: 2010 and 2015 ..... 52
104.75. Total number of persons 25 to 64 years old, number with disabilities, and percentage with disabilities, by highest level of educational attainment and other selected characteristics: 2010 and 2015 Web-Only
104.80. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000 and 2015 ..... 54
104.85. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and state: 2015 ..... 55
104.88. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by sex and state: 2015 ..... 56
104.90. Percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012 and selected student characteristics: 2012 Web-Only
104.91. Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, and socioeconomic status and selected student characteristics while in high school: 2013 Web-Only
104.92. Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, socioeconomic status and educational expectations while in high school, and college enrollment status 2 years after high school: 2013 Web-Only
104.93. Sources of college information for spring 2002 high school sophomores who expected to attend a postsecondary institution, by highest level of education completed and socioeconomic status while in high school: 2013 ..... Web-Only
104.95. Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2016 ..... 57
Summary of Enrollment, Teachers, and Schools
105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2016 ..... 58
105.20. Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution, enrollment level, and attendance status and sex of student: Selected years, fall 1990 through fall 2026 ..... 59
105.30. Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution: Selected years, 1869-70 through fall 2026 ..... 60
105.40. Number of teachers in elementary and secondary schools, and faculty in degree-granting postsecondary institutions, by control of institution: Selected years, fall 1970 through fall 2026 ..... 61
105.50. Number of educational institutions, by level and control of institution: Selected years, 1980-81 through 2014-15 ..... 62
Summary of Finances
106.10. Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929-30 through 2015-16 ..... 63
106.20. Expenditures of educational institutions, by level and control of institution: Selected years, 1899-1900 through 2015-16 ..... 64
106.30. Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970-71 through 2013-14 ..... 65
106.40. Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2012-13 and 2013-14 ..... 66
106.50. Direct general expenditures of state and local governments per capita for all functions and for education, by level of education and state: 2012-13 and 2013-14 ..... 68
106.60. Gross domestic product, state and local expenditures, national income, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2016 ..... 69
106.70. Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2016 ..... 70
Chapter 2. Elementary and Secondary Education
Historical
201.10. Historical summary of public elementary and secondary school statistics: Selected years, 1869-70 through 2013-14 ..... 82
201.20. Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889-90 through fall 2016 ..... 84
Enrollment Status and Child Care Arrangements of Young Children
202.10. Enrollment of $3-, 4-$, and 5 -year-old children in preprimary programs, by age of child, level of program, control of program, and attendance status: Selected years, 1970 through 2015 ..... 85
202.20. Percentage of $3-, 4-$, and 5 -year-old children enrolled in preprimary programs, by level of program, attendance status, and selected child and family characteristics: 2015 ..... 87
202.25. Percentage of 3- and 4-year-old children enrolled in school, by race/ethnicity and state: 2015 ..... Web-Only
202.30. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center- based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2012 ..... 88
202.35. Primary child care arrangements of 4 - and 5 -year-old children who are not yet enrolled in kindergarten, by race/ethnicity, poverty status, and mother's highest level of education: Selected years, 1995 through 2012 ..... 90
202.40. Child care arrangements of 3 - to 5 -year-old children who are not yet in kindergarten, by age and race/ethnicity: Selected years, 1991 through 2012 ..... 91
202.50. Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003-04 and 2005-06 ..... Web-Only
202.60. Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005-06 ..... Web-Only
202.65. Percentage distribution of first-time kindergartners, by primary type of child care arrangement during the year prior to kindergarten entry and selected child, family, and school characteristics: 2010-11 ..... 92
202.70. Number and percentage distribution of 3 - to 5 -year-olds not enrolled in school and all children enrolled in prekindergarten through second grade, by grade level and selected maternal and household characteristics: 2001, 2005, and 2012 ..... 93
Enrollment in Public Schools
203.10. Enrollment in public elementary and secondary schools, by level and grade: Selected years, fall 1980 through fall 2026 ..... 94
203.20. Enrollment in public elementary and secondary schools, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2026 ..... 95
203.25. Public school enrollment in prekindergarten through grade 8, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2026 ..... 97
203.30. Public school enrollment in grades 9 through 12, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2026 ..... 99
203.40. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2014 ..... 101
203.45. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2013 ..... Web-Only
203.50. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region: Selected years, fall 1995 through fall 2026 ..... 103
203.60. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2026 ..... 104
203.70. Percentage distribution of enrollment in public elementary and secondary schools, by race/ ethnicity and state or jurisdiction: Fall 2004 and fall 2014 ..... 106
203.75. Enrollment and percentage distribution of enrollment in public schools, by family poverty rate of 5- to 17-year-olds living in the school district, student race/ethnicity, region, and school locale: 2013-14 ..... 107
203.80. Average daily attendance (ADA) in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2013-14 ..... 109
203.90. Average daily attendance (ADA) as a percentage of total enrollment, school day length, and school year length in public schools, by school level and state: 2007-08 and 2011-12 ..... 110
Participation in Public School Services
204.10. Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000-01 through 2014-15 ..... 111
204.20. Number and percentage of public school students participating in English language learner (ELL) programs, by state: Selected years, fall 2004 through fall 2014 ..... 112
204.25. Public school students participating in programs for English language learners, by race/ ethnicity: Fall 2009 through fall 2014
204.27. English language learner (ELL) students enrolled in public elementary and secondary schools, by grade, home language, and selected student characteristics: Selected years, 2008-09 through fall 2014 ..... 113
204.30. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by type of disability: Selected years, 1976-77 through 2014-15 ..... 115
204.40. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and age group: 2000-01 through 2014-15 ..... 116
204.50. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and sex, race/ethnicity, and type of disability: 2014-15 ..... 117
204.60. Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2014 ..... 118
204.70. Number and percentage of children served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and state or jurisdiction: Selected years, 1990-91 through 2014-15 ..... 119
204.75a. Homeless students enrolled in public elementary and secondary schools, by grade, primary nighttime residence, and selected student characteristics: 2009-10 through 2014-15 ..... 120
204.75b. Number and percentage of homeless students enrolled in public elementary and secondary schools, by school district locale, primary nighttime residence, and selected student characteristics: 2014-15 ..... 121
204.75c. Number and percentage of homeless students enrolled in public elementary and secondary schools, by state or jurisdiction: 2009-10 through 2014-15 ..... 122
204.75d. Number and percentage of homeless students enrolled in public elementary and secondary schools, by primary nighttime residence, selected student characteristics, and state or jurisdiction: 2014-15 ..... 123
204.75e. Number and percentage of homeless students enrolled in public elementary and secondary schools in the 120 largest school districts, by primary nighttime residence and selected student characteristics: 2014-15 ..... 124
204.80. Number of public school students enrolled in gifted and talented programs, by sex, race/ ethnicity, and state: 2004, 2006, and 2011-12 ..... 127
204.90. Percentage of public school students enrolled in gifted and talented programs, by sex, race/ ethnicity, and state: 2004, 2006, and 2011-12 ..... 128

## Private School Education

| 205.10. | Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2015 | 129 |
| :---: | :---: | :---: |
| 205.15. | Private elementary and secondary school enrollment, percentage distribution of private school enrollment, and private enrollment as a percentage of total enrollment in public and private schools, by school orientation and grade: Selected years, fall 1999 through fall 2015 $\qquad$ | 130 |
| 205.20. | Enrollment and percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and grade level: Selected years, fall 1995 through fall 2015 | 132 |
| 205.30. | Percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and selected characteristics: Selected years, fall 2005 through fall 2015 | 134 |
| 205.40. | Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected characteristics: Fall 1999, fall 2009, and fall 2015 | 135 |
| 205.50. | Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: Selected years, 1999-2000 through 2011-12 | 136 |
| 205.60. | Private elementary and secondary school full-time-equivalent (FTE) staff and student to FTE staff ratios, by orientation of school, school level, and type of staff: 2007-08 and 2011-12 . . | Web-Only |
| 205.70. | Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919-20 through 2015-16 | Web-Only |
| 205.80. | Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 2005 through 2015 | 138 |

## Homeschooling and School Choice

206.20. Percentage distribution of students ages 5 through 17 attending kindergarten through
12th grade, by school type or participation in homeschooling and selected child, parent,
and household characteristics: 1999, 2003, and 2007 . . . . . . . . . . . . . . . . . . . . .
206.30. $\begin{aligned} & \text { Percentage of students enrolled in grades } 1 \text { through 12, by public school type and charter } \\ & \text { status, private school type, and selected child and household characteristics: } 2012 \text {..... } 141\end{aligned}$
206.40. Percentage of students enrolled in grades 1 through 12 whose parents reported having
public school choice, considered other schools, reported current school was their first
choice, or moved to their current neighborhood for the public school, by school type and
selected child and household characteristics: $2012 \ldots . . . \ldots . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ~$ 142
206.50. Percentage of students enrolled in grades 3 through 12 whose parents were satisfied or dissatisfied
with various aspects of their children's schools, by school type: 2003, 2007, and 2012 . . . . . . 143

## Parent Involvement in Education

| 207.10. | Number of 3 - to 5 -year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 2001, 2007, and 2012 |
| :---: | :---: |
|  |  |

207.40. Percentage of elementary and secondary school children whose parents were involved in school 148
Teachers and Pupil/Teacher Ratios
208.10. Public elementary and secondary pupi/teacher ratios, by selected school characteristics: Selected years, fall 1990 through fall 2014 ..... 149
208.20. Public and private elementary and secondary teachers, enrollment, pupil/teacher ratios, and new teacher hires: Selected years, fall 1955 through fall 2026 ..... 150
208.30. Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2014 ..... 151
208.40. Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2014 ..... 152
Teacher Characteristics, Class Sizes, and Assignments
209.05. Number and percentage of persons completing a teacher preparation program and receiving an initial teaching credential, by state or jurisdiction: 2012-13 Web-Only
209.10. Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987-88 through 2011-12 ..... 153
209.20. Number, highest degree, and years of full-time teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999-2000 through 2011-12 ..... 155
209.25. Number and percentage of public elementary and secondary school teachers who met licensing/certification requirements and of public school teachers who had less than 2 years of teaching experience, by state: 2011-12 ..... 157
209.30. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2011-12 ..... 158
209.50. Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2011-12 ..... 159
Teacher Attitudes and Teacher Mobility
210.10. Percentage of teachers indicating that certain issues are serious problems in their schools, by level and control of school: Selected years, 1987-88 through 2011-12 ..... 160
210.20. Percentage of teachers agreeing with statements about teaching and school conditions, by control and level of school: Selected years, 1993-94 through 2011-12 ..... Web-Only
210.30. Mobility of public elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987-88 through 2012-13 ..... 161
210.31. Mobility of private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987-88 through 2008-09 ..... Web-Only
Teacher Salaries
211.10. Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2011-12 ..... 162
211.20. Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990-91 through 2011-12 ..... 164
211.30. Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993-94 through 2011-12 ..... 166
211.40. Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993-94 through 2011-12 ..... 167
211.50. Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959-60 through 2015-16 ..... 168
211.60. Estimated average annual salary of teachers in public elementary and secondary schools, by state: Selected years, 1969-70 through 2015-16 ..... 169

## School Principals

212.08. Number and percentage distribution of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993-94 through 2011-12 ..... 170
212.10. Highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993-94 through 2011-12 Web-Only
212.20. Mobility of public elementary and secondary principals, by selected principal and school characteristics: 2007-08 to 2008-09 and 2011-12 to 2012-13 ..... Web-Only
212.30. Number and percentage distribution of public and private school principals who left the profession during the past year, by total years of experience as a principal and occupational status: 2012-13

## School Staff

213.10. Staff employed in public elementary and secondary school systems, by type of assignment: Selected years, 1949-50 through fall 2014 ..... 172
213.20. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2014 ..... 173
Web-Only
213.40. Staff, teachers, and teachers as a percentage of staff in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2014 ..... 174
213.50. Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2014 ..... 175
Overview of Schools and School Districts
214.10. Number of public school districts and public and private elementary and secondary schools: Selected years, 1869-70 through 2014-15 ..... 176
214.20. Number and percentage distribution of regular public school districts and students, by enrollment size of district: Selected years, 1979-80 through 2014-15 ..... 177
214.30. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2013-14 and 2014-15 ..... 178
214.40. Public elementary and secondary school enrollment, number of schools, and other selected characteristics, by locale: Fall 2011 through fall 2014 ..... 179
Large School Districts
215.10. Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: Selected years, 1990 through 2014 ..... Web-Only
215.20. Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2013-14 and fiscal year 2016
215.30. Enrollment, poverty, and federal funds for the 120 largest school districts, by enrollment size in 2014: Selected years, 2013-14 through 2016 ..... 181
Public Schools
216.10. Public elementary and secondary schools, by level of school: Selected years, 1967-68 through 2014-15 ..... 184
216.20. Number and enrollment of public elementary and secondary schools, by school level, type, and charter and magnet status: Selected years, 1990-91 through 2014-15 ..... 185
216.30. Number and percentage distribution of public elementary and secondary students and schools, by traditional or charter school status and selected characteristics: Selected years, 1999-2000 through 2014-15 ..... 186
216.40. Number and percentage distribution of public elementary and secondary schools and enrollment, by level, type, and enrollment size of school: 2012-13, 2013-14, and 2014-15 ..... 187
216.43. Number of public elementary and secondary schools reporting enrollment, by enrollment size of school and state: 2014-15 Web-Only
216.44. Enrollment of public elementary and secondary schools reporting enrollment, by enrollment size of school and state: 2014-15 ..... Web-Only
216.45. Average enrollment and percentage distribution of public elementary and secondary schools, by level, type, and enrollment size: Selected years, 1982-83 through 2014-15 ..... 188
216.50. Number and percentage distribution of public elementary and secondary school students, by percentage of minority enrollment in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2014 ..... 189
216.55. Number and percentage distribution of public elementary and secondary school students, by percentage of student's racial/ethnic group enrolled in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2014 ..... 190
216.60. Number and percentage distribution of public school students, by percentage of students in school who are eligible for free or reduced-price lunch, school level, locale, and student race/ethnicity: Fall 2014 ..... 191
216.70. Public elementary and secondary schools, by level, type, and state or jurisdiction: 1990-91, 2000-01, 2010-11, and 2014-15 ..... 192
216.75. Public elementary schools, by grade span, average school enrollment, and state or jurisdiction: 2014-15 ..... 193
216.80. Public secondary schools, by grade span, average school enrollment, and state or jurisdiction: 2014-15 ..... 194
216.90. Public elementary and secondary charter schools and enrollment, by state: Selected years, 1999-2000 through 2014-15 ..... 195
216.90a. Percentage distribution of enrollment in public traditional and charter schools and percentage of schools, by race/ethnicity, racial/ethnic concentration, and state: Fall 2014 ..... Web-Only
216.90b. Percentage distribution of public traditional and charter school enrollment and schools, by school's level of free or reduced-price lunch eligibility and state: Fall 2014 ..... Web-Only
216.90c. Percentage distribution of public traditional and charter schools, by school level, school size, and state: Fall 2014 Web-Only
216.90d. Percentage distribution of public traditional and charter schools, by school locale and state: Fall 2014
216.95. Number and enrollment of public elementary and secondary schools that have closed, by school level, type, and charter status: Selected years, 1995-96 through 2014-15 ..... 196
School Facilities
217.10. Functional age of public schools' main instructional buildings and percentage of schools with permanent and portable (temporary) buildings, by selected school characteristics and condition of permanent and portable buildings: 2012 ..... 197
217.15. Percentage of public schools with plans for major repair, renovation, or replacement of building systems or features in the next 2 years and percentage distribution of schools with such plans, by selected school characteristics, type of system or feature, and main reason for the plans: 2012-13 ..... 198
217.20. Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005 ..... Web-Only
Use of Computers and Technology
218.10. Number and internet access of instructional computers and rooms in public schools, by selected school characteristics: Selected years, 1995 through 2008 ..... 202
218.20. Percentage of public school districts with students enrolled in technology-based distance education courses and number of enrollments in such courses, by instructional level and district characteristics: 2002-03, 2004-05, and 2009-10 Web-Only
218.40. Percentage of 4th-, 8th-, and 12th-grade public school students with their own or a shared digital device at home, by selected student and school characteristics: 2015 ..... 203
218.45. Percentage distribution of 4th-, 8th-, and 12th-grade public school students, by when student first used a laptop or desktop computer and selected student and school characteristics: 2015 ..... 204
218.50. Percentage distribution of 8th-grade public school students, by number of hours they spend using a laptop or desktop computer for schoolwork on a weekday and selected student and school characteristics: 2015 ..... 205
218.70. Number and percentage distribution of 5- to 17-year-old students, by home internet access, poverty status, and locale: 2015 ..... 206
218.71. Number and percentage distribution of 5- to 17-year-old students, by home internet access, race/ethnicity, and locale: 2015 ..... 207
High School Completers and Dropouts
219.10. High school graduates, by sex and control of school: Selected years, 1869-70 through 2026-27 ..... 209
219.20. Public high school graduates, by region, state, and jurisdiction: Selected years, 1980-81 through 2026-27 ..... 210
219.30. Public high school graduates, by race/ethnicity: 1998-99 through 2026-27 ..... 212
219.32. Public high school graduates, by sex, race/ethnicity, and state or jurisdiction: 2012-13 ..... 213
219.35. Public high school averaged freshman graduation rate (AFGR), by state or jurisdiction: Selected years, 1990-91 through 2012-13 ..... 215
219.40. Public high school averaged freshman graduation rate (AFGR), by sex, race/ethnicity, and state or jurisdiction: 2012-13 ..... 216
219.46. Public high school 4-year adjusted cohort graduation rate (ACGR), by selected student characteristics and state: 2010-11 through 2014-15 ..... 217
219.50. Number and percentage of 9th- to 12th-graders who dropped out of public schools (event dropout rate), by race/ethnicity, grade, and state or jurisdiction: 2009-10 ..... 218
219.55. Among 15 - to 24 -year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), by sex and race/ethnicity: 1972 through 2015 ..... 219
219.57. Among 15- to 24 -year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), and number and percentage distribution of 15- to 24-year-olds in grades 10 through 12, by selected characteristics: Selected years, 2005 through 2015 ..... 220
219.60. Number of people taking the GED test and percentage distribution of those who passed, by age group: 1971 through 2013 ..... 221
219.62a. Percentage distribution of 2009 ninth-graders, by high school persistence status in 2012 and selected student characteristics: 2009 and 2012 Web-Only
219.62b. Percentage distribution of 2009 ninth-graders who were current high school dropouts, stopouts, and continuous students in 2012, by selected student characteristics: 2009 and 2012 ..... Web-Only
219.62c. Among 2009 ninth-graders who were dropouts in 2012, percentage citing various reasons for leaving high school, by selected student characteristics: 2012 ..... Web-Only
219.65. High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by sex and race/ethnicity: 1972 through 2015 ..... 222
219.67. Number and high school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by selected characteristics: Selected years, 2005 through 2015 ..... 223
219.69. High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by English speaking ability and race/ethnicity: 2003, 2005, and 2013 ..... Web-Only
219.70. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2015 ..... 224
219.71. Population 16 to 24 years old and number of 16 - to 24 -year-old high school dropouts (status dropouts), by sex and race/ethnicity: 1970 through 2015 ..... 225
219.73. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number and percentage distribution of 16- to 24 -year-olds, by selected characteristics: Selected years, 2005 through 2015 ..... 227
219.75. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: 1970 through 2015 ..... 228
219.76. Population 16 to 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by income level, labor force status, and years of school completed: 1970 through 2015 Web-Only229
Web-Only
219.83. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by English speaking ability and race/ethnicity: 2003, 2005, and 2013 Web-Only
219.85. Percentage of high school dropouts among noninstitutionalized persons 16 through 24 years old (status dropout rate), by race/ethnicity and state: 2015219.85a. Percentage of high school dropouts among noninstitutionalized and institutionalized persons16 through 24 years old (status dropout rate), by race/ethnicity and state: 2015Web-Only
219.90. Number and percentage distribution of 14- through 21-year-old students served under Individuals with Disabilities Education Act (IDEA), Part B, who exited school, by exit reason, sex, race/ethnicity, age, and type of disability: 2012-13 and 2013-14 ..... 231
Skills of Young Children
220.10. Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001-02 Web-Only
220.20. Percentage of children demonstrating specific cognitive skills, motor skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003-04 ..... Web-Only
220.30. Children's reading, language, mathematics, color knowledge, and fine motor skills at about 4 years of age, by child's age and selected characteristics: 2005-06 ..... 232
220.39. Percentage distribution of fall 2010 first-time kindergartners, by two risk factors (low parental education and family poverty) and selected child, family, and school characteristics: 2010-11 ..... 233
220.40. Fall 2010 first-time kindergartners' reading scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2014 ..... 234
220.41. Fall 2010 first-time kindergartners' mathematics scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2014 ..... 235
220.42. Fall 2010 first-time kindergartners' science scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year: Spring 2011 through spring 2014 ..... 236
220.50. Number and percentage distribution of kindergartners, by fall 2010 kindergarten entry status and selected child, family, and school characteristics: 2010-11 ..... Web-Only
220.55. Percentage of fall 2010 first-time kindergartners, by type of peer victimization reported by child in third grade, frequency with which child reported being victimized in third grade, and selected child, family, and school characteristics: Spring 2014 ..... 237
220.56. Percentage of fall 2010 first-time kindergartners, by type of victimization their teacher reported that they perpetrated against peers in third grade, frequency with which the teacher reported that they victimized their peers, and selected child, family, and school characteristics: Spring 2014 ..... 238
220.57. Fall 2010 first-time kindergartners' scores on various academic, social, and emotional scales in third grade, by frequency of being victimized by their peers, frequency of victimizing their peers, and type of victimization: Spring 2014 ..... 239
220.60. Fall 2010 kindergartners' reading, mathematics, science, and approaches to learning scale scores, by kindergarten entry status and time of assessment: Fall 2010 and spring 2011 through spring 2014 ..... 240
220.70. Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 Web-Only
Web-Only
Reading Achievement
221.10. Average National Assessment of Educational Progress (NAEP) reading scale score, by sex, race/ethnicity, and grade: Selected years, 1992 through 2015 ..... 241
221.12. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of students attaining selected NAEP reading achievement levels, by selected school and student characteristics and grade: Selected years, 1992 through 2015 ..... 242
221.20. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading achievement levels, by grade and selected student characteristics: Selected years, 1998 through 2015 ..... 243
221.30. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012 ..... 244
221.35. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015 ..... 245
221.40. Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students and percentage attaining reading achievement levels, by state: Selected years, 1992 through 2015 ..... 247
221.50. Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students, by race/ethnicity, school's level of free or reduced-price lunch eligibility, and state: 2015 Web-Only
221.60. Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students and percentage attaining reading achievement levels, by state: Selected years, 1998 through 2015 ..... 248
221.65. Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students, by race/ethnicity, parent's highest level of education, and state: 2015 ..... Web-Only
221.70. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2015 ..... 249
221.75. Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2015 ..... Web-Only
221.80. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining selected reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, 2013, and 2015 ..... 250
221.85. Average National Assessment of Educational Progress (NAEP) reading scale score, by age and selected student characteristics: Selected years, 1971 through 2012 ..... 251
221.90. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2012 ..... Web-Only
Mathematics Achievement
222.10. Average National Assessment of Educational Progress (NAEP) mathematics scale score, by sex, race/ethnicity, and grade: Selected years, 1990 through 2015 ..... 252
222.12. Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage of students attaining selected NAEP mathematics achievement levels, by selected school and student characteristics and grade: Selected years, 1990 through 2015 ..... 253
222.20. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics achievement levels, by grade and selected student characteristics: Selected years, 1996 through 2015 ..... 254
222.30. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-graders with various attitudes toward mathematics and percentage reporting these attitudes, by selected student characteristics: 2015 ..... 255
222.35. Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 12th-graders, by frequency of experiencing various attitudes in math class and selected student characteristics: 2015 ..... 256
222.40. Average National Assessment of Educational Progress (NAEP) mathematics scale score of high school graduates at grade 12, by highest mathematics course taken in high school and selected student and school characteristics: 2009 ..... 257
222.45. Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015 ..... 258
222.50. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1992 through 2015 ..... 260
222.55. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students, by race/ethnicity, school's level of free or reduced-price lunch eligibility, and state: 2015 ..... Web-Only
222.60. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1990 through 2015 ..... 261
222.70. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by race/ethnicity, parents' highest level of education, and state: 2015 ..... Web-Only
222.80. Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining selected mathematics achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, 2013, and 2015 ..... 262
222.85. Average National Assessment of Educational Progress (NAEP) mathematics scale score, by age and selected student characteristics: Selected years, 1973 through 2012 ..... 263
222.90. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics score levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2012 Web-Only
222.95. National Assessment of Educational Progress (NAEP) mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2012 ..... 264
Science Achievement
223.10. Average National Assessment of Educational Progress (NAEP) science scale score, standard deviation, and percentage of students attaining science achievement levels, by grade level, selected student and school characteristics, and percentile: 2009, 2011, and 2015 ..... 265
223.20. Average National Assessment of Educational Progress (NAEP) science scale scores of 4th- and 8th-grade public school students, by race/ethnicity and state: 2009, 2011, and 2015 ..... 266

| 223.25. | Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2015 | Web-Only |
| :---: | :---: | :---: |
| 223.30. | Average National Assessment of Educational Progress (NAEP) science scale scores of 12th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2015 | 267 |
| 223.40. | Average National Assessment of Educational Progress (NAEP) science scale scores and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015 | 268 |
| A | Other Subjects |  |
| 224.10. | Average National Assessment of Educational Progress (NAEP) music and visual arts scale scores of 8th-graders, percentage distribution by frequency of instruction at their school, and percentage participating in selected musical activities in school, by selected characteristics: 2016 | 270 |
| 224.20. | Average National Assessment of Educational Progress (NAEP) civics scale score, standard deviation, and percentage of students attaining civics achievement levels, by grade level, selected student characteristics, and percentile: 1998, 2006, 2010, and 2014 | Web-Only |
| 224.30. | Average National Assessment of Educational Progress (NAEP) economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected characteristics: 2006 and 2012 | Web-Only |
| 224.40. | Average National Assessment of Educational Progress (NAEP) geography scale score, standard deviation, and percentage of students attaining geography achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2014 | Web-Only |
| 224.50. | Average National Assessment of Educational Progress (NAEP) U.S. history scale score, standard deviation, and percentage of students attaining achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2014 | Web-Only |
| 224.60. | Average National Assessment of Educational Progress (NAEP) writing scale score of 8th- and 12th-graders, standard deviation, and percentage of students attaining writing achievement levels, by selected student and school characteristics and percentile: 2011 | Web-Only |
| 224.70. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score of 8th-graders, their scores on the three TEL content areas, and percentage attaining TEL achievement levels, by selected student and school characteristics: 2014 | 271 |
| 224.73. | Average scale score of 8th-graders on the information and communication technology (ICT) content area of the National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) assessment and percentage distribution of 8th-graders, by computer use and internet access at home and other selected characteristics: 2014 | 272 |
| 224.74a. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of learning about or discussing various technology- and society-related topics in school and selected student and school characteristics: 2014 | Web-Only |
| 224.74b. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of having done or of learning about various design- and systems-related activities or topics in school and selected student and school characteristics: 2014 | Web-Only |
| 224.74c. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of having done various design- and systems-related activities outside of school and selected student and school characteristics: 2014 | Web-Only |
| 224.74d. | Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of using computer or other digital technology to perform various activities for schoolwork and selected student and school characteristics: 2014 | Web-Only |

224.74e. Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of using computer or other digital technology to perform various activities not related to schoolwork and selected student and school characteristics: 2014
224.74f. Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by level of confidence in ability to perform various technology- and engineering-related tasks and selected student and school characteristics: 2014

## Coursetaking, Grades, and Retention in Grade

225.10. Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009 ..... 273
225.20. Average number of Carnegie units earned by public high school graduates in career/ technical education courses in various occupational fields, by sex and race/ethnicity, and percentage distribution of students, by units earned: Selected years, 2000 through 2009. ..... 275
225.30. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2009 ..... 277
225.40. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by selected student and school characteristics: Selected years, 1990 through 2009 ..... 278
225.50. Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2009 ..... Web-Only
225.60. Number and percentage of public high school graduates taking dual credit, Advanced Placement (AP), and International Baccalaureate (IB) courses in high school and average credits earned, by selected student and school characteristics: 2000, 2005, and 2009 . Web-Only
225.70. Number and percentage of high school graduates who took foreign language courses in high school and average number of credits earned, by language and number of credits: 2000, 2005, and 2009 ..... 281
225.80. Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 2003, 2007, and 2012 ..... 282
225.90. Number and percentage of elementary and secondary school students retained in grade, by sex, race/ethnicity, and grade level: 1994 through 2015 ..... 283
College Admission Tests
226.10. SAT mean scores of college-bound seniors, by race/ethnicity: Selected years, 1986-87 through 2015-16 ..... 285
226.20. SAT mean scores of college-bound seniors, by sex: 1966-67 through 2015-16 ..... 286
226.30. SAT mean scores and percentage distribution of college-bound seniors, by selected student characteristics: Selected years, 1995-96 through 2015-16 ..... 287
226.40. Mean SAT scores of college-bound seniors and percentage of graduates taking the SAT, by state: Selected years, 1995-96 through 2015-16 ..... 289
226.50. Number and percentage of graduates taking the ACT test; average scores and standard deviations, by sex and race/ethnicity; and percentage of test takers with selected composite scores and planned fields of postsecondary study: Selected years, 1995 through 2016 ..... 290
226.60. Average ACT scores and percentage of graduates taking the ACT, by state: 2012 and 2016 ..... 291
Student Activities, Homework, and Attendance
227.10. Percentage of 9th-grade students participating in various school-sponsored and non-school-sponsored activities, by sex and race/ethnicity: 2009 ..... 292
227.20. Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 ..... Web-Only
227.30. Percentage of high school seniors who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1992 and 2004 Web-Only
227.40. Percentage of elementary and secondary school students who do homework, average time spent, percentage whose parents check that homework is done, and percentage whose parents help with homework, by frequency and selected characteristics: 2007 and 2012 ..... 293
227.50. Average National Assessment of Educational Progress (NAEP) reading and mathematics scale scores of 4th-, 8th-, and 12th-graders and percentage absent from school, by selected characteristics and number of days absent in the last month: 2015 ..... 296

## School Crime Victims

228.10. School-associated violent deaths of all persons, homicides and suicides of youth ages 5-18 at school, and total homicides and suicides of youth ages 5-18, by type of violent death: 1992-93 through 2013-14 ..... 298
228.20. Number of nonfatal victimizations against students ages 12-18 and rate of victimization per 1,000 students, by type of victimization and location: 1992 through 2015 ..... 299
228.25. Number of nonfatal victimizations against students ages 12-18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2015 ..... 300
228.30. Percentage of students ages $12-18$ who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2015 ..... 301
228.40. Percentage of students in grades $9-12$ who reported being threatened or injured with a weapon on school property during the previous 12 months, by selected student characteristics and number of times threatened or injured: Selected years, 1993 through 2015 ..... 303
228.50. Percentage of public school students in grades $9-12$ who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by state: Selected years, 2003 through 2015 ..... 304
228.70. Number and percentage of public and private school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher and school characteristics: Selected years, 1993-94 through 2011-12 ..... 305
228.80. Percentage of public school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by state: Selected years, 1993-94 through 2011-12 ..... 306
228.99. Percentage distribution of students in grades $9-12$ and percentage reporting selected types of victimization or risk behaviors, by sex and sexual orientation: 2015 ..... 307
School Crime Incidents
229.10. Percentage of public schools recording incidents of crime at school and reporting incidents to police, number of incidents, and rate per 1,000 students, by type of crime: Selected years, 1999-2000 through 2013-14 ..... 308
229.20. Number and percentage of public schools recording at least one crime incident that occurred at school, and number and rate of incidents, by school characteristics and type of incident: 1999-2000 and 2009-10 ..... 309
229.30. Percentage of public schools recording violent incidents of crime at school, number of incidents, and rate per 1,000 students, by category of violent incident and selected school characteristics: 2009-10 and 2013-14 ..... 311
229.40. Percentage of public schools reporting incidents of crime at school to the police, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2009-10 ..... 312
229.50. Percentage distribution of public schools, by number of violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2009-10 ..... 313
229.60. Percentage distribution of public schools, by number of serious violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2009-10 ..... 314

## School Environment

230.10. Percentage of public schools reporting selected discipline problems that occurred at school, by frequency and selected school characteristics: Selected years, 1999-2000 through 2013-14 ..... 315
230.20. Percentage of students ages $12-18$ who reported that gangs were present at school during the school year, by selected student and school characteristics and urbanicity: Selected years, 2001 through 2015 ..... 317
230.30. Percentage of students ages $12-18$ who reported being the target of hate-related words and seeing hate-related graffiti at school during the school year, by selected student and school characteristics: Selected years, 1999 through 2015 ..... 318
230.35. Percentage of students ages $12-18$ who reported being the target of hate-related words at school, by type of hate-related word and selected student and school characteristics: 2015 ..... 319
230.40. Percentage of students ages $12-18$ who reported being bullied at school during the school year, by type of bullying and selected student and school characteristics: Selected years, 2005 through 2015 ..... 320
230.50. Percentage of students ages $12-18$ who reported being bullied at school during the school year and, among bullied students, percentage who reported being bullied in various locations, by selected student and school characteristics: 2015 ..... 323
230.52. Among students ages $12-18$ who reported being bullied at school during the school year, percentage reporting that bullying had varying degrees of negative effect on various aspects of their life, by aspect of life affected and selected student and school characteristics: 2015 ..... 324
230.53. Among students ages $12-18$ who reported being bullied at school during the school year, percentage reporting that bullying was related to specific characteristics, by type of characteristic related to bullying and other selected student and school characteristics: 2015 ..... 325
230.55. Percentage of students ages $12-18$ who reported being cyber-bullied anywhere during the school year, by type of cyber-bullying and selected student and school characteristics: 2013 ..... 326
230.60. Among students ages $12-18$ who reported being bullied at school or cyber-bullied anywhere during the school year, percentage reporting various frequencies of bullying and the notification of an adult at school, by selected student and school characteristics: 2013 and 2015 ..... 327
230.62. Percentage of public school students in grades $9-12$ who reported having been bullied on school property or electronically bullied during the previous 12 months, by state: Selected years, 2009 through 2015 ..... 329
230.65. Percentage of public schools reporting selected types of cyber-bullying problems occurring at school or away from school at least once a week, by selected school characteristics: 2009-10 ..... 330
230.70. Percentage of students ages 12-18 who reported being afraid of attack or harm, by location and selected student and school characteristics: Selected years, 1995 through 2015 ..... 331
230.80. Percentage of students ages 12-18 who reported avoiding one or more places in school or avoiding school activities or classes because of fear of attack or harm, by selected student and school characteristics: Selected years, 1995 through 2015 ..... 332
230.90. Percentage of public and private school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching, by selected teacher and school characteristics: Selected years, 1987-88 through 2011-12 ..... 333
230.92. Percentage of public and private school teachers who agreed that other teachers and the principal enforced school rules, by selected teacher and school characteristics: Selected years, 1987-88 through 2011-12 ..... 334
230.95. Percentage of public school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching and that other teachers and the principal enforced school rules, by state: 2011-12 ..... 335

## Fights and Weapons

231.10. Percentage of students in grades $9-12$ who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2015 ..... 336
231.20. Percentage distribution of students in grades 9-12, by number of times they reported having been in a physical fight anywhere or on school property during the previous 12 months and selected student characteristics: 2015 ..... 337
231.30. Percentage of public school students in grades $9-12$ who reported having been in a physical fight at least one time during the previous 12 months, by location and state: Selected years, 2005 through 2015 ..... 338
231.40. Percentage of students in grades 9-12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015 ..... 339
231.50. Percentage distribution of students in grades $9-12$, by number of days they reported carrying a weapon anywhere or on school property during the previous 30 days and selected student characteristics: 2015 ..... 340
231.60. Percentage of public school students in grades $9-12$ who reported carrying a weapon at least 1 day during the previous 30 days, by location and state: Selected years, 2005 through 2015 ..... 341
231.65. Number of incidents of students bringing firearms to or possessing firearms at a public school and rate of incidents per 100,000 students, by state: 2009-10 through 2014-15 ..... 342
231.70. Percentage of students ages 12-18 who reported having access to a loaded gun, without adult permission, at school or away from school during the school year, by selected student and school characteristics: Selected years, 2007 through 2015 ..... 343
Alcohol, Illicit Drugs, and Cigarettes
232.10. Percentage of students in grades $9-12$ who reported using alcohol at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015 ..... 344
232.20. Percentage distribution of students in grades $9-12$, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015 ..... 345
232.30. Percentage of public school students in grades $9-12$ who reported using alcohol at least 1 day during the previous 30 days, by location and state: Selected years, 2005 through 2015 ..... 346
232.40. Percentage of students in grades $9-12$ who reported using marijuana at least one time during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015 ..... 347
232.50. Percentage distribution of students in grades $9-12$, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015 ..... 348
232.60. Percentage of public school students in grades $9-12$ who reported using marijuana at least one time during the previous 30 days, by location and state: Selected years, 2005 through 2015 ..... 349
232.70. Percentage of students in grades $9-12$ who reported that illegal drugs were made available to them on school property during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2015 ..... 350
232.80. Percentage of public school students in grades $9-12$ who reported that illegal drugs were made available to them on school property during the previous 12 months, by state: Selected years, 2003 through 2015 ..... 351
232.90. Percentage of high school seniors reporting use of alcohol and illicit drugs, by frequency of use and substance used: Selected years, 1975 through 2016 ..... 352
232.95. Percentage of 12 - to 17 -year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1985 through 2015 ..... 353
Discipline, Safety and Security, and Juvenile Justice
233.10. Number and percentage of public schools that took a serious disciplinary action in response to specific offenses, number of serious actions taken, and percentage distribution of actions, by type of offense, school level, and type of action: Selected years, 1999-2000 through 2009-10 ..... 354
233.20. Percentage of public school students in grades 6 through 12 who had ever been suspended or expelled, by sex and race/ethnicity: Selected years, 1993 through 2012 ..... Web-Only
233.25. Number and percentage of fall 2009 ninth-graders who were ever suspended or expelled through spring 2012, by when student was suspended or expelled and selected student characteristics: 2013 ..... 355
233.27. Number of students receiving selected disciplinary actions in public elementary and secondary schools, by type of disciplinary action, disability status, sex, and race/ethnicity: 2011-12 ..... 356
233.28. Percentage of students receiving selected disciplinary actions in public elementary and secondary schools, by type of disciplinary action, disability status, sex, and race/ethnicity: 2011-12 ..... 357
233.30. Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2011-12 ..... 358
233.40. Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2011-12 ..... 360
233.45. Number of discipline incidents resulting in removal of a student from a regular education program for at least an entire school day and rate of incidents per 100,000 students, by discipline reason and state: 2014-15 ..... 361
233.50. Percentage of public schools with various safety and security measures: Selected years, 1999-2000 through 2013-14 ..... 362
233.60. Percentage of public schools with various safety and security measures, by selected school characteristics: 2013-14 ..... 363
233.65. Percentage of public schools with a written plan for procedures to be performed in selected crises and percentage that have drilled students on the use of a plan, by selected school characteristics: Selected years, 2003-04 through 2013-14 ..... 364
233.70. Percentage of public schools with one or more full-time or part-time security staff present at least once a week, by selected school characteristics: 2005-06 through 2013-14 ..... 368
233.80. Percentage of students ages 12-18 who reported various security measures at school: Selected years, 1999 through 2015 ..... 369
233.90. Number of juvenile offenders in residential placement facilities, by selected juvenile and facility characteristics: Selected years, 1997 through 2013 ..... 370
233.92. Residential placement rate (number of juvenile offenders in residential facilities) per 100,000 juveniles, by sex and race/ethnicity: Selected years, 1997 through 2013 ..... 371
State Regulations
234.10. Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 2000 through 2014 ..... 372
234.20. Minimum amount of instructional time per year and policies on textbooks, by state: Selected years, 2000 through 2014 ..... 373
234.30. Course credit requirements and exit exam requirements for a standard high school diploma and the use of other high school completion credentials, by state: 2013 ..... 375
234.40. States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006-07 ..... Web-Only
234.50. Required testing for initial certification of elementary and secondary school teachers, by type of assessment and state: 2015 and 2016 ..... 376

## Revenues

235.10. Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919-20 through 2013-14 ..... 377
235.20. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2013-14 ..... 379
235.30. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2012-13 ..... Web-Only
235.40. Public elementary and secondary revenues and expenditures, by locale, source of revenue, and purpose of expenditure: 2013-14 ..... 380
Expenditures
236.10. Summary of expenditures for public elementary and secondary education and other related programs, by purpose: Selected years, 1919-20 through 2013-14 ..... 381
236.15. Current expenditures and current expenditures per pupil in public elementary and secondary schools: 1989-90 through 2026-27 ..... 382
236.20. Total expenditures for public elementary and secondary education and other related programs, by function and subfunction: Selected years, 1990-91 through 2013-14 ..... 383
236.25. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969-70 through 2013-14 ..... 385
236.30. Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2013-14 ..... 387
236.40. Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2012-13 Web-Only
236.50. Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2012-13 and 2013-14 ..... 389
236.55. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919-20 through 2013-14 ..... 390
236.60. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and subfunction: Selected years, 1990-91 through 2013-14 ..... 391
236.65. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2013-14 ..... 393
236.70. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2013-14 ..... 395
236.75. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2013-14 ..... 397
236.80. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2012-13 Web-Only
236.90. Students transported at public expense and current expenditures for transportation: Selected years, 1929-30 through 2013-14 ..... 398

## Chapter 3. Postsecondary Education

## Overview and Historical

301.10. Enrollment, staff, and degrees/certificates conferred in degree-granting and non-degree-granting postsecondary institutions, by control and level of institution, sex of student, type of staff, and level of degree: Fall 2015 and 2014-15 ..... 411
301.20. Historical summary of faculty, enrollment, degrees conferred, and finances in degree-granting postsecondary institutions: Selected years, 1869-70 through 2014-15 ..... 412
Enrollment Rates
302.10. Recent high school completers and their enrollment in 2-year and 4-year colleges, by sex: 1960 through 2015 ..... 413
302.20. Percentage of recent high school completers enrolled in 2-and 4-year colleges, by race/ ethnicity: 1960 through 2015 ..... 414
302.30. Percentage of recent high school completers enrolled in 2 -year and 4 -year colleges, by income level: 1975 through 2015 ..... 415
302.40. Number of high schools with 12th-graders and percentage of high school graduates attending 4-year colleges, by selected high school characteristics: Selected years, 1998-99 through 2011-12 ..... 416
302.43. Percentage distribution of fall 2009 ninth-graders who had completed high school, by postsecondary enrollment status in fall 2013, and selected measures of their high school achievement and selected student characteristics: 2013 ..... 417
302.50. Estimated rate of 2011-12 high school graduates attending degree-granting postsecondary institutions, by state: 2012 ..... 419
302.60. Percentage of 18 - to 24 -year-olds enrolled in degree-granting postsecondary institutions, by level of institution and sex and race/ethnicity of student: 1970 through 2015 ..... 420
302.62. Percentage of 18 - to 24 -year-olds enrolled in degree-granting postsecondary institutions and percentage distribution of those enrolled, by sex, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2015 ..... 421
302.65. Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions, by race/ethnicity and state: 2015 Web-Only
302.70. Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions, by race/ethnicity and state: 2005 ..... Web-Only
Total Fall Enrollment-General
303.10. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2026 ..... 423
303.20. Total fall enrollment in all postsecondary institutions participating in Title IV programs and annual percentage change in enrollment, by degree-granting status and control of institution: 1995 through 2015 ..... 425
303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2015 ..... 426
303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2026 ..... 427
303.40. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age: Selected years, 1970 through 2026 ..... 429
303.45. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and age of student: 2011, 2013, and 2015 ..... 430
303.50. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2015 ..... 431
303.55. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, attendance status, and age of student: 2015 ..... 432
303.60. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2015 ..... 433
303.65. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2013 ..... 434
303.70. Total undergraduate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control and level of institution: Selected years, 1970 through 2026 ..... 435
303.80. Total postbaccalaureate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: 1967 through 2026 ..... 437
303.90. Fall enrollment and number of degree-granting postsecondary institutions, by control and religious affiliation of institution: Selected years, 1980 through 2015 ..... 438
Total Fall Enrollment-State-Level
304.10. Total fall enrollment in degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2015 ..... 440
304.15. Total fall enrollment in public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2015 ..... 441
304.20. Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2015 ..... 442
304.30. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2014 and 2015 ..... 443
304.35. Total fall enrollment in public degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2014 and 2015 ..... 444
304.40. Total fall enrollment in private degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2014 and 2015 ..... Web-Only
304.45. Total fall enrollment in private nonprofit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2014 and 2015 ..... Web-Only
304.50. Total fall enrollment in private for-profit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2014 and 2015 ..... Web-Only
304.60. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2014 and 2015 ..... 445
304.70. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment and state or jurisdiction: Selected years, 2000 through 2015 ..... 446
304.80. Total fall enrollment in degree-granting postsecondary institutions, by control, level of enrollment, level of institution, and state or jurisdiction: 2015 ..... 447
First-Time Students and Admissions
305.10. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, and level and control of institution: 1955 through 2026 ..... 448
305.20. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, control of institution, and state or jurisdiction: Selected years, 2000 through 2015 ..... 449
305.30. Number and percentage of degree-granting postsecondary institutions with first-year undergraduates using various selection criteria for admission, by control and level of institution: Selected years, 2000-01 through 2015-16 ..... 450
305.40. Acceptance rates; number of applications, admissions, and enrollees; and enrollees' SAT and ACT scores for degree-granting postsecondary institutions with first-year undergraduates, by control and level of institution: 2015-16 ..... 451
Enrollment of Racial/Ethnic Groups
306.10. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and race/ethnicity of student: Selected years, 1976 through 2015 ..... 452
306.20. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity of student: Selected years, 1976 through 2015 ..... 455
306.30. Fall enrollment of U.S. residents in degree-granting postsecondary institutions, by race/ ethnicity: Selected years, 1976 through 2026 ..... 457
306.40. Fall enrollment of males and females and specific racial/ethnic groups in degree-granting postsecondary institutions, by control and level of institution and percentage of U.S. resident enrollment in the same racial/ethnic group: 2015 ..... 458
306.50. Total fall enrollment in degree-granting postsecondary institutions, by control and classification of institution, level of enrollment, and race/ethnicity of student: 2015 ..... 460
306.60. Fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2015 ..... 462
306.70. Fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2013 ..... Web-Only
Full-Time-Equivalent Fall Enrollment
307.10. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1967 through 2026 ..... 464
307.20. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2000, 2010, and 2015 ..... 465
307.30. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2015 ..... 466
Twelve-Month Enrollment
308.10. Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2013-14 and 2014-15 ..... 467
308.20. Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004-05 through 2014-15 ..... 468
Student Residence and Migration
309.10. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions, by state or jurisdiction: Fall 2014 ..... 469
309.20. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2014 ..... 470
309.30. Residence and migration of all first-time degree/certificate-seeking undergraduates in 4-year degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2014 ..... 471
Study Abroad and Foreign Students
310.10. Number of U.S. students studying abroad and percentage distribution, by sex, race/ethnicity, and other selected characteristics: Selected years, 2000-01 through 2014-15 ..... 472
310.20. Foreign students enrolled in institutions of higher education in the United States, by continent, region, and selected countries of origin: Selected years, 1980-81 through 2015-16 ..... 473
Programs and Courses
311.10. Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2007-08 and 2011-12 ..... 474
311.15. Number and percentage of students enrolled in degree-granting postsecondary institutions, by distance education participation, location of student, level of enrollment, and control and level of institution: Fall 2014 and fall 2015 ..... 475
311.20. Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics: 2011-12 ..... 476
311.22. Number and percentage of undergraduate students taking distance education or online classes and degree programs, by selected characteristics: Selected years, 2003-04 through 2011-12 ..... 477
311.30. Number and percentage of graduate students taking night, weekend, or online classes, by selected characteristics: 2011-12 ..... 478
311.32. Number and percentage of graduate students taking distance education or online classes and degree programs, by selected characteristics: Selected years, 2003-04 through 2011-12 ..... 479
311.33. Selected statistics for degree-granting postsecondary institutions that primarily offer online programs, by control of institution and selected characteristics: 2015 ..... 480
311.40. Percentage of first-year undergraduate students who reported taking remedial education courses, by selected student and institution characteristics: 2003-04, 2007-08, and 2011-12 ..... 481
311.50. Percentage of degree-granting postsecondary institutions with first-year undergraduates offering remedial services, by control and level of institution: 1989-90 through 2015-16 ..... 483
311.60. Enrollment in postsecondary education, by level of enrollment, level of institution, student age, and major field of study: 2011-12 ..... 484
311.70. Course enrollments in languages other than English compared with total enrollment at degree-granting postsecondary institutions, by enrollment level, institution level, and language: Selected years, 1965 through 2013
311.80. Number and percentage distribution of course enrollments in languages other than English at degree-granting postsecondary institutions, by language and enrollment level: Selected years, 2002 through 2013 Web-Only
311.90. Graduate enrollment in research-based programs in engineering, natural and social sciences, mathematics and computer sciences, and selected health fields in degree-granting postsecondary institutions, by discipline division: Selected years, fall 2007 through fall 2015 ..... 486
Large Institutions and Institutions Serving Specific Groups
312.10. Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2015 ..... 487
312.20. Selected statistics for degree-granting postsecondary institutions enrolling more than 15,000 students in 2015, by selected institution and student characteristics: Selected years, 1990 through 2014-15 ..... 488
312.30. Enrollment and degrees conferred in degree-granting women's colleges, by selected characteristics and institution: Fall 2015 and 2014-15 ..... 498
312.40. Enrollment and degrees conferred in Hispanic-serving institutions, by institution level and control, percentage Hispanic, degree level, and other selected characteristics: Fall 2015 and 2014-15 Web-Only
312.50. Fall enrollment and degrees conferred in degree-granting tribally controlled postsecondary institutions, by state and institution: Selected years, fall 2000 through fall 2015, and 2013-14 and 2014-15 ..... 499
Historically Black Colleges and Universities
313.10. Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2014, 2015, and 2014-15 ..... 500
313.20. Fall enrollment in degree-granting historically Black colleges and universities, by sex of student and level and control of institution: Selected years, 1976 through 2015 ..... 502
313.30. Selected statistics on degree-granting historically Black colleges and universities, by control and level of institution: Selected years, 1990 through 2015 ..... 503
Staff
314.10. Total and full-time-equivalent (FTE) staff and FTE student/FTE staff ratios in postsecondary institutions participating in Title IV programs, by degree-granting status, control of institution, and primary occupation: Fall 1995, fall 2005, and fall 2015 ..... 504
314.20. Employees in degree-granting postsecondary institutions, by sex, employment status, control and level of institution, and primary occupation: Selected years, fall 1991 through fall 2015 ..... 505
314.30. Employees in degree-granting postsecondary institutions, by employment status, sex, control and level of institution, and primary occupation: Fall 2015 ..... 506
314.40. Employees in degree-granting postsecondary institutions, by race/ethnicity, sex, employment status, control and level of institution, and primary occupation: Fall 2015 ..... 509
314.50. Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2015 ..... 512
314.60. Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in private degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2015 ..... 513
Faculty and Instructional Staff
315.10. Number of faculty in degree-granting postsecondary institutions, by employment status, sex, control, and level of institution: Selected years, fall 1970 through fall 2015 ..... 514
315.20. Full-time faculty in degree-granting postsecondary institutions, by race/ethnicity, sex, and academic rank: Fall 2011, fall 2013, and fall 2015 ..... 515
315.30. Percentage distribution of full-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 ..... Web-Only
315.40. Percentage distribution of part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 Web-Only
315.50. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 Web-Only
315.60. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 ..... Web-Only
315.70. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 ..... Web-Only
315.80. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003 ..... Web-Only
Faculty Salaries and Benefits
316.10. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, control and level of institution, and sex: Selected years, 1970-71 through 2015-16 ..... 516
316.20. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999-2000 through 2015-16 ..... 519
316.30. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2015-16 ..... 520
316.40. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2014-15 ..... Web-Only
316.50. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2015-16 ..... 521
316.60. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2014-15 ..... Web-Only
316.70. Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by type of benefit and control of institution: Selected years, 1977-78 through 2010-11 ..... Web-Only
316.80. Percentage of degree-granting postsecondary institutions with a tenure system and of full-time faculty with tenure at these institutions, by control and level of institution and selected characteristics of faculty: Selected years, 1993-94 through 2015-16 ..... 522
316.81. Percentage of full-time faculty (instruction, research, and public service) with tenure at degree-granting postsecondary institutions with a tenure system, by control, level, and state: 2015-16

317.20. Degree-granting postsecondary institutions, by control and classification of institution and state or jurisdiction: 2015-16 ..... 524
317.30. Number of non-degree-granting Title IV institutions offering postsecondary education, by control of institution and state or jurisdiction: Selected years, 2000-01 through 2015-16 ..... 526
317.40. Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and classification of institution: Fall 2015 ..... 527
317.50. Degree-granting postsecondary institutions that have closed their doors, by control and level of institution: 1969-70 through 2015-16 ..... 530
Summary of Degrees Conferred
318.10. Degrees conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1869-70 through 2026-27 ..... 531
318.20. Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2014-15 ..... 532
318.30. Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2014-15 ..... 533
318.40. Degrees/certificates conferred by postsecondary institutions, by control of institution and level of degree/certificate: 1970-71 through 2014-15 ..... 550
318.45. Number and percentage distribution of science, technology, engineering, and mathematics (STEM) degrees/certificates conferred by postsecondary institutions, by race/ethnicity, level of degree/certificate, and sex of student: 2008-09 through 2014-15 ..... Web-Only
318.50. Degrees conferred by postsecondary institutions, by control of institution, level of degree, and field of study: 2014-15 ..... 551
318.60. Number of postsecondary institutions conferring degrees, by control of institution, level of degree, and field of study: 2014-15 ..... 552
Degrees Conferred-State-Level
319.10. Degrees conferred by postsecondary institutions, by control of institution, level of degree, and state or jurisdiction: 2014-15 ..... 553
319.20. Degrees conferred by postsecondary institutions, by level of degree and state or jurisdiction: 2012-13 through 2014-15 ..... 554
319.30. Bachelor's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2014-15 ..... 555
319.40. Master's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2014-15 ..... 556
Certificates Below the Associate's Degree Level
320.10. Certificates below the associate's degree level conferred by postsecondary institutions, by length of curriculum, sex of student, institution level and control, and discipline division: 2014-15 ..... 557
320.12. Certificates below the associate's degree level conferred by public less-than-2-year postsecondary institutions, by length of curriculum, sex of student, and discipline division: 2014-15 ..... Web-Only
320.20. Certificates below the associate's degree level conferred by postsecondary institutions, by race/ethnicity and sex of student: 1998-99 through 2014-15 ..... 559

## Associate's Degrees

321.10. Associate's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2004-05 through 2014-15 ..... 560
321.12. Certificates below the associate's degree level and associate's degrees conferred by public 2-year postsecondary institutions, by length of curriculum, sex of student, and discipline division: 2014-15
321.20. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2014-15 ..... 561
321.30. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... 562
321.40. Associate's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 Web-Only
321.50. Associate's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 Web-Only
Bachelor's Degrees
322.10. Bachelor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2014-15 ..... 563
322.20. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2014-15 ..... 564
322.30. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... 565
322.40. Bachelor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... 566
322.50. Bachelor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... 567
Master's Degrees
323.10. Master's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2014-15 ..... 568
323.20. Master's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2014-15 ..... 569
323.30. Master's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... 570
323.40. Master's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... Web-Only
323.50. Master's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15
Doctor's Degrees
324.10. Doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970-71 through 2014-15 ..... 571
324.20. Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976-77 through 2014-15 ..... 572
324.25. Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... 573
324.30. Doctor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 Web-Only
324.35. Doctor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2013-14 and 2014-15 ..... Web-Only
324.40. Number of postsecondary institutions conferring doctor's degrees in dentistry, medicine, and law, and number of such degrees conferred, by sex of student: Selected years, 1949-50 through 2014-15 ..... 574
324.50. Degrees conferred by postsecondary institutions in selected professional fields, by sex of student, control of institution, and field of study: Selected years, 1985-86 through 2014-15 ..... 575
324.55. Degrees conferred by postsecondary institutions in selected professional fields, by race/ ethnicity and field of study: 2013-14 and 2014-15 ..... 576
324.60. Degrees conferred to males by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2013-14 and 2014-15 Web-Only
324.70. Degrees conferred to females by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2013-14 and 2014-15 Web-Only
324.80. Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2013-14 and 2014-15 ..... 577
324.90. Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees, by rank order: 2005-06 through 2014-15 ..... 578
Trends in Degrees by Field
325.10. Degrees in agriculture and natural resources conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15 Web-Only
325.15. $\quad$ Degrees in architecture and related services conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2014-15 ..... Web-Only
325.20. Degrees in the biological and biomedical sciences conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1951-52 through 2014-15 Web-Only
325.22. Degrees in biology, microbiology, and zoology conferred by postsecondary institutions, by level of degree: 1970-71 through 2014-15 ..... Web-Only
325.25. Degrees in business conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1955-56 through 2014-15 Web-Only
325.30. Degrees in communication, journalism, and related programs and in communications technologies conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15 ..... Web-Only
325.35. Degrees in computer and information sciences conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15 ..... 579
325.40. Degrees in education conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2014-15 ..... Web-Only
325.45. Degrees in engineering and engineering technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2014-15 ..... 580
325.47. Degrees in chemical, civil, electrical, and mechanical engineering conferred by postsecondary institutions, by level of degree: 1970-71 through 2014-15 ..... Web-Only
325.50. Degrees in English language and literature/letters conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2014-15 ..... Web-Only
325.55. Degrees in foreign languages and literatures conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959-60 through 2014-15 Web-Only
325.57. Degrees in French, German, Italian, and Spanish language and literature conferred by postsecondary institutions, by level of degree: Selected years, 1949-50 through 2014-15 Web-Only
325.59. Degrees in Arabic, Chinese, Korean, and Russian language and literature conferred by postsecondary institutions, by level of degree: 1969-70 through 2014-15 Web-Only
325.60. Degrees in the health professions and related programs conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15 Web-Only
325.65. $\quad$ Degrees in mathematics and statistics conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2014-15325.70. Degrees in the physical sciences and science technologies conferred by postsecondary institutions,by level of degree and sex of student: Selected years, 1959-60 through 2014-15Web-Only
325.72. Degrees in chemistry, geology and earth science, and physics conferred by postsecondary institutions, by level of degree: 1970-71 through 2014-15 Web-Only
325.80. Degrees in psychology conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2014-15 Web-Only
325.85. Degrees in public administration and social services conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15 Web-Only
325.90. Degrees in the social sciences and history conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15325.92. Degrees in economics, history, political science and government, and sociology conferred bypostsecondary institutions, by level of degree: Selected years, 1949-50 through 2014-15
325.95. Degrees in visual and performing arts conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2014-15 ..... Web-Only
Completion Rates
326.10. Graduation rate from first institution attended for first-time, full-time bachelor's degree-seeking students at 4 -year postsecondary institutions, by race/ethnicity, time to completion, sex, control of institution, and acceptance rate: Selected cohort entry years, 1996 through 2009 ..... 581
326.20. Graduation rate from first institution attended within 150 percent of normal time for first-time, full- time degree/certificate-seeking students at 2-year postsecondary institutions, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2012 ..... 587
326.30. Retention of first-time degree-seeking undergraduates at degree-granting postsecondary institutions, by attendance status, level and control of institution, and percentage of applications accepted: Selected years, 2006 to 2015 ..... 589
326.40. Percentage distribution of first-time postsecondary students starting at 2 - and 4 -year institutions during the 2003-04 academic year, by highest degree attained, enrollment status, and selected characteristics: Spring 2009 ..... 591
326.50. Number and percentage distribution of first-time postsecondary students starting at 2 - and 4 -year institutions during the 2011-12 academic year, by attainment and enrollment status and selected characteristics: Spring 2014 ..... 593
Achievement and Admissions Testing
327.10. Average scores and standard deviations on Graduate Record Examination (GRE) general and subject tests: 1965 through 2015 Web-Only
Security and Crime
329.10. On-campus crimes, arrests, and referrals for disciplinary action at degree-granting postsecondary institutions, by location of incident, control and level of institution, and type of incident: 2001 through 2014 ..... 595
329.20. On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: 2001 through 2014 ..... 597
329.30. On-campus hate crimes at degree-granting postsecondary institutions, by level and control of institution, type of crime, and category of bias motivating the crime: 2009 through 2014 ..... 600

## Student Charges

330.10. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by level and control of institution: 1963-64 through 2015-16
330.20. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2014-15 and 2015-16 ..... 605
330.30. Average undergraduate tuition, fees, room, and board rates for full-time students in degree-granting postsecondary institutions, by percentile of charges and control and level of institution: Selected years, 2000-01 through 2015-16 ..... 606
330.40. Average total cost of attendance for first-time, full-time undergraduate students in degree-granting postsecondary institutions, by control and level of institution, living arrangement, and component of student costs: Selected years, 2009-10 through 2015-16 ..... 607
330.41. Average total cost of attendance for first-time, full-time undergraduate students in public degree-granting postsecondary institutions, by level of institution, living arrangement, component of student costs, and state: 2014-15 ..... Web-Only
330.50. Average graduate tuition and required fees in degree-granting postsecondary institutions, by control of institution and percentile of charges: 1989-90 through 2015-16 ..... 608
Financial Aid for Undergraduates
331.10. Percentage of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 2011-12 ..... 609
331.20. Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000-01 through 2014-15 ..... 610
331.30. Average amount of grant and scholarship aid and average net price for first-time, full-time students receiving Title IV aid, by control and level of institution and income level: Selected years, 2009-10 through 2014-15 ..... 612
331.35. Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics: Selected years, 1999-2000 through 2011-12 ..... 614
331.37. Percentage of part-time or part-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics: Selected years, 1999-2000 through 2011-12 ..... Web-Only
331.40. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2011-12 ..... 616
331.45. Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2011-12 ..... 617
331.50. Amount borrowed, aid status, and sources of aid for full-time and part-time undergraduates, by control and level of institution: 2007-08 and 2011-12 ..... 618
331.60. Percentage of full-time, full-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992-93 through 2011-12 ..... 619
331.70. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and level of institution: Selected years, 1992-93 through 2011-12 ..... 620
331.80. Percentage of part-time or part-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992-93 through 2011-12 Web-Only
331.90. Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and level of institution: 2007-08 and 2011-12 ..... 622
331.95. Percentage of undergraduate students ages 18 to 24 in their 4th (senior) year or above who ever received federal loans, nonfederal loans, or Parent Loans for Undergraduates (PLUS), and average cumulative amount borrowed, by selected student characteristics and control and level of institution: 1989-90, 1999-2000, and 2011-12 ..... 623

## Financial Aid for Postbaccalaureate Students

332.10. Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992-93 through 2011-12 ..... 625
332.20. Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992-93 through 2011-12 ..... Web-Only
332.30. Percentage of full-time, full-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992-93 through 2011-12 Web-Only
Web-Only
332.50. Number of postsecondary students who entered the student loan repayment phase, number of students who defaulted within a 3-year period, and 3-year student loan cohort default rate, by level and control of institution: Fiscal years 2010 through 2013 ..... 627
Revenues
333.10. Revenues of public degree-granting postsecondary institutions, by source of revenue and level of institution: Selected years, 2007-08 through 2014-15 ..... 628
333.20. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2014-15 ..... 630
333.25. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2013-14 ..... Web-Only
333.30. Appropriations from state and local governments for public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1990-91 through 2014-15 ..... 631
333.40. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years: 1999-2000 through 2014-15 ..... 632
333.50. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and classification of institution: 2014-15 ..... 634
333.55. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999-2000 through 2014-15 ..... 635
333.60. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and classification of institution: 2014-15 ..... Web-Only
333.70. Revenue received from the federal government by the 120 degree-granting postsecondary institutions receiving the largest amounts, by control and rank order: 2014-15 ..... 636
333.80. Voluntary support for degree-granting postsecondary institutions, by source and purpose of support: Selected years, 1949-50 through 2014-15 Web-Only
333.90. Endowment funds of the 120 degree-granting postsecondary institutions with the largest endowments, by rank order: Fiscal year 2015 ..... 637
Expenditures
334.10. Expenditures of public degree-granting postsecondary institutions, by purpose ofexpenditure and level of institution: Selected years, 2007-08 through 2014-15638
334.20. Expenditures of public degree-granting postsecondary institutions, by level of institution, purpose of expenditure, and state or jurisdiction: 2011-12 through 2014-15 ..... 640
334.30. Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999-2000 through 2014-15 ..... 641
334.40. Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and classification of institution: 2014-15 ..... 643
334.50. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999-2000 through 2014-15 ..... 644
334.60. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and classification of institution: 2014-15 ..... Web-Only
334.70. Total expenditures of private nonprofit and for-profit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1999-2000 through 2014-15 ..... 646
Chapter 4. Federal Funds for Education and Related Activities
On-Budget and Off-Budget Support
401.10. Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2016 ..... 657
401.20. Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2015 ..... 659
401.30. Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2016 ..... 661
401.60. U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2015 ..... 667
401.70. Appropriations for Title I and selected other programs under the No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2015 and 2016 ..... 668
Federal Obligations for Research and Development
402.10. Federal obligations for research, development, and R\&D plant, by category of obligation, performer, and field of science and engineering: Fiscal years 2008 through 2016 ..... 669
Chapter 5. Outcomes of Education
Labor Force Status by Educational Attainment
501.10. Labor force participation, employment, and unemployment of persons 25 to 64 years old, by sex, race/ethnicity, age group, and educational attainment: 2013, 2014, and 2015 ..... 676
501.20. Labor force participation, employment, and unemployment of persons 16 to 24 years old who are not enrolled in school, by age group, sex, race/ethnicity, and educational attainment: 2013, 2014, and 2015 ..... 678
501.30. Number and percentage of persons 16 to 24 years old who were neither enrolled in school nor working, by educational attainment, age group, sex, family poverty status, and race/ ethnicity: 2006, 2011, and 2016 ..... 680
501.35. Labor force status of persons 25 to 64 years old, by disability status, highest level of educational attainment, age, sex, and race/ethnicity: 2015 ..... Web-Only
501.40. Percentage distribution of 25- to 34-year-olds with various levels of educational attainment, by labor force status, sex, race/ethnicity, and U.S. nativity and citizenship status: 2015 ..... 683
501.50. Employment to population ratios of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 ..... 684
501.60. Employment to population ratios of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 ..... 685
501.70. Employment to population ratios of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 ..... 686
501.80. Unemployment rates of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 ..... 687
501.85. Unemployment rates of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 ..... 688
501.90. Unemployment rates of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 ..... 689
Occupation and Earnings by Educational Attainment
502.10. Occupation of employed persons 25 years old and over, by highest level of educational attainment and sex: 2015 and 2016 ..... 690
502.20. Median annual earnings, number, and percentage of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2015 ..... 691
502.30. Median annual earnings of full-time year-round workers 25 to 34 years old and full-time year-round workers as a percentage of the labor force, by sex, race/ethnicity, and educational attainment: Selected years, 1995 through 2015 ..... 695
502.40. Annual earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2015 ..... 698
Employment of Students
503.10. Percentage of high school students age 16 and over who were employed, by age group, sex, race/ethnicity, family income, nativity, and hours worked per week: Selected years, 1970 through 2015 ..... 700
503.20. Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and control and level of institution: Selected years, October 1970 through 2015 ..... 702
503.30. Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and selected characteristics: October 2013 through 2015 ..... 703
503.40. Percentage of 16 - to 64 -year-old undergraduate students who were employed, by attendance status, hours worked per week, and selected characteristics: 2005, 2010, and 2015 ..... 704
Labor Force Status of Recent High School Completers and Dropouts
504.10. Labor force status of 2013, 2014, and 2015 high school completers, by college enrollment status, sex, and race/ethnicity: October 2013, 2014, and 2015 ..... 707
504.20. Labor force status of recent high school dropouts, by sex and race/ethnicity: Selected years, October 1980 through 2015 ..... 709
504.30. Among special education students out of high school up to 8 years, percentage attending and completing postsecondary education, living independently, and working competitively, by type of disability: 2007 and 2009 ..... Web-Only
Labor Market Outcomes for Recent Bachelor's Degree Completers
505.10. Number, percentage distribution, unemployment rates, and median earnings of 25 - to 29-year-old bachelor's degree holders and percentage of degree holders among all 25 - to 29 -year-olds, by field of study and science, technology, engineering, or mathematics (STEM) status of field: 2010 and 2015 ..... 710
505.15. Number, percentage distribution, and median annual earnings of 25 - to 34 -year-olds with a bachelor's or higher degree, by sex, race/ethnicity, and selected employment and occupational characteristics: 2015 ..... 712
505.20. Unemployment rate of 25 - to 34 -year-olds with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2015 ..... 714
505.30. Among employed 25 - to 34 -year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, percentage with STEM and non-STEM occupations, by sex, race/ethnicity, and U.S. nativity and citizenship status: 2015 ..... 715
505.40. Percentage distribution of recipients of bachelor's degrees in various fields of study 1 year after graduation, by time to completion, enrollment and employment status, and occupation: 2001 and 2009 ..... 716
505.50. Percentage, selected employment characteristics, and annual salaries of bachelor's degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009 ..... 717

## Attitude of Young Adults

506.10. Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were very important, by sex: Selected years, 1972 through 2004

## Skills of Adults and Continuing Education

507.10. Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003
507.15. Average literacy and numeracy scale scores and percentage distribution of 25 - to 65 -year-olds, by proficiency level and selected characteristics: 2012/2014 ..... 718
507.16. Percentage of 25 - to 65 -year-olds who were not assessed in the problem solving in technology-rich environments domain and average scale score and percentage distribution of those who were assessed, by proficiency level and selected characteristics: 2012/2014 ..... 719
507.20. Participants in state-administered adult basic education, secondary education, and English as a second language programs, by type of program and state or jurisdiction: Selected fiscal years, 2000 through 2015 ..... 720
507.30. Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: 1995, 1999, and 2005 ..... 721
507.40. Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 ..... 724
Chapter 6. International Comparisons of Education
Population, Enrollment, and Teachers
601.10. Population, school enrollment, and number of teachers, by major areas of the world and level of education: Selected years, 1980 through 2014 ..... 735
601.20. Selected population and enrollment statistics for countries with populations of at least 10 million in 2014, by continent and country: Selected years, 1990 through 2014 ..... Web-Only
601.30. School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2013 ..... Web-Only
601.35. Percentage of 3 - and 4 -year-olds and 5 - to 14 -year-olds enrolled in school, by country: 2000 through 2014 ..... 736
601.40. Percentage of 15 - to 29 -year-olds enrolled in school, by selected levels of education, age, and country: 2014 ..... 737
601.50. Pupil/teacher ratios in public and private elementary and secondary schools, by level of education and country: Selected years, 2000 through 2014 ..... 738
601.60. Teachers' statutory teaching and total working time and average class size in public elementary and secondary schools, by level of education and country: 2014 ..... 740
Achievement, Instruction, and School Environment
602.10. Average reading literacy scale scores of fourth-graders and percentage whose schools emphasize reading skills and strategies at or before second grade or at third grade, by sex and country or other education system: 2001, 2006, and 2011 ..... 741
602.20. Average fourth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2015 ..... 742
602.30. Average eighth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2015 ..... 743
602.32a. Average mathematics score and percentage of eighth-graders, by access to the Internet at home, access to a computer or tablet at home or other place outside of school, frequency of computer or tablet use for schoolwork outside of school, and country or other education system: 2015 ..... 744
602.32b. Average mathematics score and percentage of eighth-graders, by mathematics teachers' reports of student access to computers and frequency of computer use during mathematics lessons and country or other education system: 2015 ..... 747
602.33a. Average science score and percentage of eighth-graders, by access to the Internet at home, access to a computer or tablet at home or other place outside of school, frequency of computer or tablet use for schoolwork outside of school, and country or other education system: 2015 ..... 750
602.33b. Average science score and percentage of eighth-graders, by science teachers' reports of student access to computers and frequency of computer use during science lessons and country or other education system: 2015 ..... 753
602.35. Average advanced mathematics and physics scores of high school seniors who had taken advanced courses in these subjects, seniors who had taken such courses as a percentage of their age cohort, and instructional time in such courses, by country: 2015 ..... 756
602.40. Average reading literacy, mathematics literacy, and science literacy scores of 15-year-old students, by sex and country or other education system: 2009, 2012, and 2015 ..... 757
602.45. Average reading literacy, mathematics literacy, and science literacy scores of 15-year-old students, by computer and internet access at home and country or other education system: 2015 ..... 759
602.50. Average reading literacy scores of 15 -year-old students and percentage attaining reading literacy proficiency levels, by country or other education system: 2015 ..... 761
602.60. Average mathematics literacy scores of 15-year-old students and percentage attaining mathematics literacy proficiency levels, by country or other education system: 2015 ..... 763
602.70. Average science literacy scores of 15 -year-old students and percentage attaining science literacy proficiency levels, by country or other education system: 2015 ..... 765
602.84. Percentage distribution of fourth- and eighth-graders, by frequency with which they reported being bullied during the school year and country or other education system: 2015 ..... 767
602.85. Percentage distribution of fourth- and eighth-graders, by extent to which their teachers rated the school as safe and orderly and country or other education system: 2015 ..... 768
602.86. Percentage distribution of fourth- and eighth-graders, by severity of school discipline problems reported by their principal and country or other education system: 2015 ..... 769
Attainment, Degrees, and Outcomes
603.10. Percentage of the population 25 to 64 years old who completed high school, by age group and country: Selected years, 2001 through 2015 ..... 770
603.20. Percentage of the population 25 to 64 years old who attained any postsecondary degree, by age group and country: Selected years, 2001 through 2015 ..... 772
603.30. Percentage of the population 25 to 64 years old who attained a postsecondary degree, by highest degree attained, age group, and country: 2015 ..... 774
603.60. Percentage of postsecondary degrees awarded to women, by field of study and country: 2014 ..... Web-Only
603.70. Percentage of degrees at the bachelor's level and above awarded in mathematics, science, and engineering, by field of study, level of degree, and country: 2014 ..... Web-Only
603.90. Employment to population ratios of 25- to 64-year-olds, by sex, highest level of educational attainment, and country: 2015 ..... 776

## Skills of Adults

604.10. Average literacy and numeracy scale scores of 25- to 65-year-olds, by sex, age group, highest level of educational attainment, and country or other education system: 2012 ..... 777
604.20. Percentage distribution of 25- to 65-year-olds, by literacy proficiency level, numeracy proficiency level, selected levels of educational attainment, and country or other education system: 2012 ..... 778
604.30. Employment rates and mean monthly earnings of 25- to 65-year-olds, by literacy proficiency level, numeracy proficiency level, and country or other education system: 2012 ..... 779
604.40. Percentage distribution of 16- to 19-year-olds, by frequency of using computers or the Internet to perform selected activities in everyday life and country or subnational region: 2012, 2014, and 2015 ..... 780604.50. Percentage of 16 - to 19 -year-olds who were not assessed in the problem solving intechnology-rich environments domain and percentage distribution of those who wereassessed, by proficiency level, selected U.S. and international respondent characteristics,and country or subnational region: 2012, 2014, and 2015782

## Finances

605.10. Gross domestic product per capita and public and private education expenditures per full-time-equivalent (FTE) student, by level of education and country: Selected years, 2005 through 2013 ..... 783
605.20. Public and private direct expenditures on education institutions as a percentage of gross domestic product, by level of education and country: Selected years, 2005 through 2013 ..... 785
Chapter 7. Libraries and Use of Technology
Libraries
701.10. Selected statistics on public school libraries/media centers, by level of school: Selected years, 1999-2000 through 2011-12 ..... 790
701.20. Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2011-12 ..... Web-Only
701.30. Selected statistics on public school libraries/media centers, by state: 2011-12 Web-Only
701.40. Collections, staff, and operating expenditures of degree-granting postsecondary institution libraries: Selected years, 1981-82 through 2014-15 ..... 791
701.50. Collections, staff, operating expenditures, public service hours, and reference services of the 60 largest college and university libraries: Fiscal year 2012 ..... 792
701.60. Number of public libraries, number of books and serial volumes, and per capita usage of selected library services per year, by state: Fiscal years 2013 and 2014 ..... 793
Computer and Internet Use
702.10. Percentage of children ages 3 to 18 living in households with a computer, by type of computer and selected child and family characteristics: Selected years, 2010 through 2015 ..... 794
702.15. Percentage of children ages 3 to 18 who use the Internet from home, by selected child and family characteristics: Selected years, 2010 through 2015 Web-Only
702.20. Percentage of children ages 3 to 18 who use the Internet and, among those who use the Internet, percentage using it in various locations, by selected child and family characteristics: 2011 and 2015 ..... 795
702.30. Percentage of persons age 3 and over who use the Internet anywhere and who use the Internet at selected locations, by selected characteristics: 2011 and 2015 ..... 796
702.35. Percentage of home internet users age 3 and over and ages 3 to 18 , by means of internet access from home and selected characteristics: 2010 and 2015 ..... Web-Only
702.40. Percentage of persons age 3 and over and ages 3 to 18 with no internet access at home and percentage distribution of those with no home access, by main reason for not having access and selected characteristics: 2010 and 2015 Web-Only
702.60. Number and percentage of households with computer and internet access, by state: 2015 ..... Web-Only

## READER'S GUIDE

## Data Sources

The data in this edition of the Digest of Education Statistics were obtained from many different sources-including students and teachers, state education agencies, local elementary and secondary schools, and colleges and universi-ties-using surveys and compilations of administrative records. Users should be cautious when comparing data from different sources. Differences in aspects such as procedures, timing, question phrasing, and interviewer training can affect the comparability of results across data sources.

Most of the tables present data from surveys conducted by the National Center for Education Statistics (NCES) or conducted by other agencies and organizations with support from NCES. Some tables also include other data published by federal and state agencies, private research organizations, or professional organizations. Totals reported in the Digest are for the 50 states and the District of Columbia unless otherwise noted. Brief descriptions of the surveys and other data sources used in this volume can be found in Appendix A: Guide to Sources. For each NCES and non-NCES data source, the Guide to Sources also provides information on where to obtain further details about that source.

Data are obtained primarily from two types of surveys: universe surveys and sample surveys. In universe surveys, information is collected from every member of the population. For example, in a survey regarding certain expenditures of public elementary and secondary schools, data would be obtained from each school district in the United States. When data from an entire population are available, estimates of the total population or a subpopulation are made by simply summing the units in the population or subpopulation. As a result, there is no sampling error, and observed differences are reported as true.

Since a universe survey is often expensive and time consuming, many surveys collect data from a sample of the population of interest (sample survey). For example, the National Assessment of Educational Progress (NAEP) assesses a representative sample of students rather than the entire population of students. When a sample survey is used, statistical uncertainty is introduced, because the data come from only a portion of the entire population. This statistical uncertainty must be considered when reporting estimates and making comparisons. For information about how NCES accounts for statistical uncertainty when reporting sample survey results, see "Data Analysis and Interpretation," later in this Reader's Guide.

## Common Measures and Indexes

Various types of statistics derived from universe and sample surveys are reported. Many tables report the size of a population or a subpopulation, and often the size of a subpopulation is expressed as a percentage of the total population.

In addition, the average (or mean) value of some characteristic of the population or subpopulation may be reported. The average is obtained by summing the values for all members of the population and dividing the sum by the size of the population. An example is the average annual salary of fulltime instructional faculty at degree-granting postsecondary institutions. Another measure that is sometimes used is the median. The median is the midpoint value of a characteristic at or above which 50 percent of the population is estimated to fall, and at or below which 50 percent of the population is estimated to fall. An example is the median annual earnings of young adults who are full-time year-round workers. Some tables also present an average per capita, or per person, which represents an average computed for every person in a specified group or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population. An example is the per capita expenditure on education in each state.

Many tables report financial data in dollar amounts. Unless otherwise noted, all financial data are in current dollars, meaning not adjusted for changes in the purchasing power of the dollar over time due to inflation. For example, 1995-96 teacher salaries in current dollars are the amounts that the teachers earned in 1995-96, without any adjustments to account for inflation. Constant dollar adjustments attempt to remove the effects of price changes (inflation) from statistical series reported in dollars. For example, if teacher salaries over a 20 -year period are adjusted to constant 2015-16 dollars, the salaries for all years are adjusted to the dollar values that presumably would exist if prices in each year were the same as in 2015-16, in other words, as if the dollar had constant purchasing power over the entire period. Any changes in the constant dollar amounts would reflect only changes in real values. Constant dollar amounts are computed using price indexes. Price indexes for inflation adjustments can be found in table 106.70. Each table that presents constant dollars includes a note indicating which index was used for the inflation adjustments; in most cases, the Consumer Price Index was used.

When presenting data for a time series, some tables include both actual and projected data. Actual data are data that have
already been collected. Projected data can be used when data for a recent or future year are not yet available. Projections are estimates that are based on recent trends in relevant statistics and patterns associated with correlated variables. Unless otherwise noted, all data in this volume are actual.

## Standard Errors

Using estimates calculated from data based on a sample of the population requires consideration of several factors before the estimates become meaningful. When using data from a sample, some margin of error will always be present in estimations of characteristics of the total population or subpopulation because the data are available from only a portion of the total population. Consequently, data from samples can provide only an approximation of the true or actual value. The margin of error of an estimate, or the range of potential true or actual values, depends on several factors such as the amount of variation in the responses, the size and representativeness of the sample, and the size of the subgroup for which the estimate is computed. The magnitude of this margin of error is measured by what statisticians call the "standard error" of an estimate.

When data from sample surveys are reported, the standard error is calculated for each estimate. In the tables, the standard error for each estimate generally appears in parentheses next to the estimate to which it applies. In order to caution the reader when interpreting findings, estimates from sample surveys are flagged with a "!" when the standard error is between 30 and 50 percent of the estimate, and suppressed with a " $\ddagger$ " when the standard error is 50 percent of the estimate or greater. The term "coefficient of variation (CV)" refers to the ratio of the standard error to the estimate; for example, if an estimate has a CV of 30 percent, this means that the standard error is equal to 30 percent of the value of the estimate.

## Nonsampling Errors

In addition to standard errors, which apply only to sample surveys, all surveys are subject to nonsampling errors. Nonsampling errors may arise when individual respondents or interviewers interpret questions differently; when respondents must estimate values, or when coders, keyers, and other processors handle answers differently; when people who should be included in the universe are not; or when people fail to respond, either totally or partially. Total nonresponse means that people do not respond to the survey at all, while partial nonresponse (or item nonresponse) means that people fail to respond to specific survey items. To compensate for nonresponse, adjustments are often made. For universe surveys, an adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the "average" questionnaire response for the nonresponse. For universe surveys, imputations are usually made separately within various groups of sample members that have similar survey characteristics. For sample surveys, total nonresponse is handled through nonresponse adjust-
ments to the sample weights. For sample surveys, imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent. For additional general information about imputations, see the NCES Statistical Standards (NCES 2014-097). Appendix A: Guide to Sources includes some information about specific surveys' response rates, nonresponse adjustments, and other efforts to reduce nonsampling error. Although the magnitude of nonsampling error is frequently unknown, idiosyncrasies that have been identified are noted in the appropriate tables.

## Data Analysis and Interpretation

When estimates are from a sample, caution is warranted when drawing conclusions about one estimate in comparison to another, or about whether a time series of estimates is increasing, decreasing, or staying the same. Although one estimate may appear to be larger than another, a statistical test may find that the apparent difference between them is not reliably measurable due to the uncertainty around the estimates. In this case, the estimates will be described as having no measurable difference, meaning that the difference between them is not statistically significant.

Whether differences in means or percentages are statistically significant can be determined using the standard errors of the estimates. In reports produced by NCES, when differences are statistically significant, the probability that the difference occurred by chance is less than 5 percent, according to NCES standards.

Data presented in the text do not investigate more complex hypotheses, account for interrelationships among variables, or support causal inferences. We encourage readers who are interested in more complex questions and in-depth analysis to explore other NCES resources, including publications, online data tools, and public- and restricted-use datasets at http://nces.ed.gov.

In text that reports estimates based on samples, differences between estimates (including increases and decreases) are stated only when they are statistically significant. To determine whether differences reported are statistically significant, twotailed $t$ tests at the . 05 level are typically used. The $t$ test formula for determining statistical significance is adjusted when the samples being compared are dependent. The $t$ test formula is not adjusted for multiple comparisons, with the exception of statistical tests conducted using the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). When the variables to be tested are postulated to form a trend, the relationship may be tested using linear regression, logistic regression, or ANOVA trend analysis instead of a series of $t$ tests. These alternate methods of analysis test for specific relationships (e.g., linear, quadratic, or cubic) among variables. For more information on data analysis, please see the NCES Statistical Standards, Standard 5-1, available at http://nces.ed.gov/ statprog/2012/pdf/Chapter5.pdf.

A number of considerations influence the ultimate selection of the data years to include in the tables and to feature in the text. To make analyses as timely as possible, the latest year of available data is shown. The choice of comparison years is often also based on the need to show the earliest available survey year, as in the case of NAEP and the international assessment surveys. The text typically compares the most current year's data with those from the initial year and then with those from a more recent year. In the case of surveys with long time frames, such as surveys measuring enrollment, changes over the course of a decade may be noted in the text. Where applicable, the text may also note years in which the data begin to diverge from previous trends. In figures and tables, intervening years are selected in increments in order to show the general trend.

## Rounding and Other Considerations

All calculations are based on unrounded estimates. Therefore, the reader may find that a calculation, such as a difference or a percentage change, cited in the text or a figure may not be identical to the calculation obtained by using the rounded values shown in the accompanying tables. Although values reported in the tables are generally rounded to one decimal place (e.g., 76.5 percent), values reported in the text are generally rounded to whole numbers (with any value of 0.50 or above rounded to the next highest whole number). Due to rounding, cumulative percentages may sometimes equal 99 or 101 percent rather than 100 percent.

## Race and Ethnicity

The Office of Management and Budget (OMB) is responsible for the standards that govern the categories used to collect and present federal data on race and ethnicity. The OMB revised the guidelines on racial/ethnic categories used by the federal government in October 1997, with a January 2003 deadline for implementation. The revised standards require a minimum of these five categories for data on race: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and White. The standards also require the collection of data on the ethnicity categories Hispanic or Latino and Not Hispanic or Latino. It is important to note that Hispanic origin is an ethnicity rather than a race, and therefore persons of Hispanic origin may be of any race. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. The race categories White, Black, Asian, Native Hawaiian or Other Pacific Islander, and American Indian or Alaska Native exclude persons of Hispanic origin unless otherwise noted.

For a description of each racial/ethnic category, please see the "Racial/ethnic group" entry in Appendix B: Definitions. Some of the category labels are shortened for more concise presentation in text, tables, and figures. American Indian or Alaska Native is denoted as American Indian/

Alaska Native (except when separate estimates are available for American Indians alone or Alaska Natives alone); Black or African American is shortened to Black; and Hispanic or Latino is shortened to Hispanic. When discussed separately from Asian estimates, Native Hawaiian or Other Pacific Islander is shortened to Pacific Islander.

Many of the data sources used for this volume are federal surveys that collect data using the OMB standards for racial/ ethnic classification described above; however, some sources have not fully adopted the standards, and some tables include historical data collected prior to the adoption of the OMB standards. Asians and Pacific Islanders are combined into a single category for years in which the data were not collected separately for the two groups. The combined category can sometimes mask significant differences between the two subgroups. For example, prior to 2011, NAEP collected data that did not allow for separate reporting of estimates for Asians and Pacific Islanders. The population counts presented in table 101.20, based on the U.S. Census Bureau's Current Population Reports, indicate that 96 percent of all Asian/Pacific Islander 5- to 17-year-olds were Asian in 2010. Thus, the combined category for Asians/Pacific Islanders is more representative of Asians than of Pacific Islanders.

Some surveys give respondents the option of selecting more than one race category, an "other" race category, or a "Two or more races" or "multiracial" category. Where possible, tables present data on the "Two or more races" category; however, in some cases this category may not be separately shown because the information was not collected or due to other data issues. Some tables include the "other" category. Any comparisons made between persons of one racial/ethnic group and persons of "all other racial/ethnic groups" include only the racial/ethnic groups shown in the reference table. In some surveys, respondents are not given the option to select more than one race category and also are not given an option such as "other" or "multiracial." In these surveys, respondents of Two or more races must select a single race category. Any comparisons between data from surveys that give the option to select more than one race and surveys that do not offer such an option should take into account the fact that there is a potential for bias if members of one racial group are more likely than members of the others to identify themselves as "Two or more races." ${ }^{1}$ For postsecondary data, foreign students are counted separately and are therefore not included in any racial/ethnic category.

In addition to the major racial/ethnic categories, several tables include Hispanic ancestry subgroups (such as Mexican, Puerto Rican, Cuban, Dominican, Salvadoran, Other Central American, and South American) and Asian ancestry subgroups (such as Asian Indian, Chinese, Filipino, Japanese, Korean, and

[^0]Vietnamese). In addition, selected tables include "Two or more races" subgroups (such as White and Black, White and Asian, and White and American Indian/Alaska Native).

## Limitations of the Data

Due to large standard errors, some differences that seem substantial are not statistically significant and, therefore, are not cited in the text. This situation often applies to estimates involving American Indians/Alaska Natives and Pacific Islanders. The relatively small sizes of these populations pose many measurement difficulties when conducting statistical analysis. Even in larger surveys, the numbers of American Indians/Alaska Natives and Pacific Islanders included in a sample are often small. Researchers studying data on these two populations often face small sample sizes that increase the size of standard errors and reduce the reliability of results. Readers should keep these limitations in mind when comparing estimates presented in the tables.

As mentioned, caution should be exercised when comparing data from different sources. Differences in sampling, data
collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, and data processing and coding mean that results from different sources may not be strictly comparable. For example, the racial/ethnic categories presented to a respondent, and the way in which the question is asked, can influence the response, especially for individuals who consider themselves of mixed race or ethnicity. In addition, data on American Indians/Alaska Natives are often subject to inaccuracies that can result from respondents self-identifying their race/ethnicity. Research on the collection of race/ethnicity data suggests that the categorization of American Indian and Alaska Native is the least stable self-identification (for example, the same individual may identify as American Indian when responding to one survey, but may not do so on a subsequent survey). ${ }^{2}$

[^1]
## INTRODUCTION

The Introduction provides a brief overview of current trends in American education, highlighting key data that are presented in more detail later in this volume. Topics outlined include the participation of students, teachers, and faculty in U.S. educational institutions; the performance of U.S. elementary/secondary students overall and in comparison to students in other countries; the numbers of high school graduates and postsecondary degrees; and the amounts of expenditures on education at the elementary/secondary and postsecondary levels.

In fall 2016, about 76.0 million people were enrolled in American schools and colleges (table 105.10). About 4.6 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.4 million FTE employees. All data for 2016 in this Introduction are projected, except for data on educational attainment. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

## Elementary/Secondary Education

## Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985, but enrollment stabilized at 49.3 million between 2006 and 2008, before beginning to increase again (table 105.30). Overall, public school enrollment rose 28 percent, from 39.4 million to 50.6 million, between 1985 and 2016. Private school enrollment fluctuated during this period, with the fall 2016 enrollment of 5.2 million being 6 percent lower than the fall 1985 enrollment of 5.6 million. About 9 percent of elementary and secondary school students were enrolled in private schools in 2016, reflecting a decrease from 12 percent in 1985.

In public schools between 1985 and 2016, there was a 31 percent increase in elementary enrollment (prekindergarten through grade 8 ), compared with a 22 percent increase in secondary enrollment (grades 9 through 12) (table 105.30). Part of the higher growth in public elementary school enrollment resulted from the expansion of prekindergarten enrollment (table 203.10). Between fall 1985 and fall 2016, enrollment in prekindergarten increased 811 percent, while enrollment in other elementary grades (including kindergar-
ten through grade 8 plus ungraded elementary programs) increased 27 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.4 million in 2016, and the number enrolled in other elementary grades increased from 26.9 million to 34.1 million. Public secondary school enrollment declined 8 percent from 1985 to 1990 , but then increased 33 percent from 1990 to 2007; however, secondary school enrollment in 2016 was less than 1 percent higher than in 2007 (table 105.30). Between 1990 and 2016, the net increase in public secondary school enrollment was 33 percent, compared with a 19 percent increase in public elementary school enrollment. Over the most recent 10-year period (between 2006 and 2016), public school enrollment rose 3 percent. Elementary school enrollment increased 4 percent between 2006 and 2016, while secondary school enrollment was less than 1 percent higher in 2016 than in 2006.

Since the enrollment rates of 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds changed by less than 4 percentage points from 1985 to 2015, overall increases in public school enrollment primarily reflect increases in the number of children in the population in these age groups (tables 101.10 and 103.20). For example, the enrollment rate of 7- to 13-year-olds decreased from 99 to 98 percent between 1985 and 2015, but the number of 7 - to 13-year-olds increased by 26 percent. Similarly, increases in public school enrollments reflect the 13 percent increase in the 14 - to 17 -year-old population between 1985 and 2015 to a larger extent than the increase in their enrollment rate from 95 to 96 percent. Increases in both the enrollment rate of 3- and 4-year-old children (from 39 percent in 1985 to 53 percent in 2015) and the number of children in this age group (from 7.1 million to 8.0 million) also contributed to overall enrollment increases.

The National Center for Education Statistics (NCES) projects record levels of total public elementary and secondary school enrollment from 2016 ( 50.6 million) through at least 2026 ( 51.7 million) (table 105.30). The total public school enrollment projected for fall 2016 is a record-high number, and new records are expected every year through 2026, the last year for which NCES enrollment projections have been developed. Public elementary school enrollment (prekindergarten through grade 8 ) is projected to increase by more than 2 percent between 2016 and 2026, while public secondary school enrollment (grades 9 through 12) is expected to increase by less than 2 percent during this period. Overall, total public school enrollment is expected to increase 2 percent between 2016 and 2026.

## Teachers

About 3.6 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2016 (table 105.40). This number was 1 percent lower than in fall 2006. The 2016 number of FTE teachers includes 3.2 million public school teachers and 0.4 million private school teachers.

Public school enrollment was 3 percent higher in 2016 than in 2006, while the number of public school teachers was less than 1 percent lower (table 208.20). In fall 2016, the number of public school pupils per teacher was 16.1 , which was higher than the ratio of 15.6 in 2006.

The average salary for public school teachers in 2015-16 was $\$ 58,064$ in current dollars (i.e., dollars that are not adjusted for inflation) (table 211.50). In constant (i.e., inflation-adjusted) dollars, the average salary for teachers was 1 percent lower in 2015-16 than in 1990-91.

## Student Performance

Most of the student performance data in the Digest are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in subjects including reading, mathematics, science, and writing, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the Digest, while the information in this Introduction includes only selected results from the national main and state NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the Digest) are based on statistical testing of unrounded values.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4,8 , and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

## Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500 . In 2015, the average reading score for 4th-grade students (223) was not measurably different from the 2013 score, but it was higher than the 1992 score (217) (table 221.10). At grade 4, the average 2015 reading scores for White (232), Black (206), Hispanic (208), and Asian/ Pacific Islander students (239) were not measurably differ-
ent from the corresponding scores in 2013, but their average scores were all higher than in 1992. For 8th-grade students, the average reading score in 2015 (265) was lower than in 2013 (268), but it was higher than in 1992 (260). At grade 8, average 2015 reading scores for White (274), Black (248), and Hispanic (253) students were lower than the scores in 2013 (276, 250, and 256, respectively), while the average 2015 reading score for Asian/Pacific Islander students (280) was not measurably different from the score in 2013. Consistent with the findings at grade 4 , the average reading scores for White, Black, Hispanic, and Asian/Pacific Islander 8th-grade students were higher in 2015 than in 1992. For 12 th-grade students, the average reading score in 2015 was not measurably different from that in 2013. At grade 12 , the average 2015 reading scores for White (295), Hispanic (276), and Asian/Pacific Islander students (297) were not measurably different from the scores in 2013 and 1992. For Black students, the 2015 average score (266) was lower than the 1992 score (273) but was not measurably different from the 2013 score.

While there was no measurable change from 2013 to 2015 in the average reading score for 4th-grade public school students nationally, average scores were higher in 2015 than in 2013 in the District of Columbia and 12 states (table 221.40). Average 4th-grade scores were lower in 2015 than in 2013 in Maryland and Minnesota, while scores in all remaining states did not change measurably from 2013 to 2015. The average reading score for 8th-grade public school students was lower in 2015 than in 2013 nationally and in 8 states (table 221.60). However, 8th-grade students in West Virginia scored higher in 2015 than in 2013. In the remaining states and the District of Columbia, scores did not change measurably from 2013 to 2015.

## Mathematics

The main NAEP mathematics assessment data for 4thand 8th-graders are reported on a scale of 0 to 500 (table 222.10). The average 4th-grade mathematics score in 2015 (240) was lower than the score in 2013 (242), although it was higher than the score in 1990 (213). At grade 4, the average mathematics score in 2015 for White students (248) was lower than the score in 2013 (250), while the average scores in 2015 for Black (224), Hispanic (230), and Asian/Pacific Islander students (257) were not measurably different from the corresponding 2013 scores. However, the 4th-grade average scores for White, Black, Hispanic, and Asian/ Pacific Islander students were all higher in 2015 than in 1990. The average 8th-grade mathematics score in 2015 (282) was lower than the score in 2013 (285), although it was higher than the score in 1990 (263). At grade 8, the average scores for White (292), Black (260), and Hispanic students (270) were lower in 2015 than in 2013 (294, 263, and 272 , respectively). The 2015 average score for Asian/Pacific Islander students (306) was not measurably different from the score in 2013. However, the average scores for 8th-grade White, Black, Hispanic, and Asian/Pacific Islander students were all higher in 2015 than in 1990. Due to changes in the

12th-grade mathematics assessment framework, a new trend line started in 2005, with scores reported on a scale of 0 to 300. The average 12th-grade mathematics score in 2015 (152) was lower than the score in 2013 (153), but not measurably different from the score in 2005, the first year in which the revised assessment was administered.

The average mathematics score for 4th-grade public school students across the nation was lower in 2015 (240) than in 2013 (241) (table 222.50). Average 4th-grade mathematics scores for public school students were also lower in 2015 than in 2013 in 16 states. However, the mathematics average scores for 4th-grade students in Mississippi and the District of Columbia were higher in 2015 than in 2013. Scores were not measurably different in the other states during this period. The national public school average mathematics score for 8thgrade students was lower in 2015 (281) than in 2013 (284) (table 222.60). Similarly, 22 states had lower 8th-grade average scores in 2015 than in 2013, while scores for the remaining 28 states and the District of Columbia were not measurably different between 2013 and 2015. During this time, no state experienced a score increase at the 8th-grade level.

## Science

NAEP has assessed the science abilities of students in grades 4,8 , and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. The main NAEP science assessment data are reported on a scale of 0 to 300 (table 223.10). In 2015, the average 4th-grade science score (154) was higher than the score in 2009 (150). The average 8th-grade science score in 2015 (154) was higher than the scores in both 2009 (150) and 2011 (152). The average 12th-grade science score in 2015 (150) was not measurably different from the score in 2009. In addition, the 5-point gender gap between male and female 12th-graders in 2015 was not measurably different from the gap in 2009. While the average science scores for White 4th- and 8th-grade students remained higher than those of their Black and Hispanic peers in 2015, racial/ethnic achievement gaps in 2015 were smaller than in 2009. At grade 4, the White-Black achievement gap was 36 points in 2009 and 33 points in 2015, and the White-Hispanic achievement gap was 32 points in 2009 and 27 points in 2015. While the average science scores for White 12th-grade students remained higher than those of their Black and Hispanic peers in 2015, these racial/ethnic achievement gaps did not measurably change between 2009 and 2015.

## International Comparisons

The 2015 Trends in International Mathematics and Science Study (TIMSS) assessed students' mathematics and science performance at grades 4 and 8 . Mathematics performance was assessed in 43 countries at grade 4 and in 34 countries at grade 8. Science performance was assessed in 42 countries at grade 4 and in 34 countries at grade 8 . In addition, TIMSS Advanced data were collected by 9 countries from students in
their final year of secondary school (in the United States, 12th-graders). At grades 4 and 8, a number of subnational entities also participated in TIMSS as separate education systems (e.g., Hong Kong and Chinese Taipei, the U.S. state of Florida, and England and Northern Ireland within the United Kingdom). However, the following paragraphs include results only from countries, not from subnational entities. At all three grades, TIMSS scores are reported on a scale of 0 to 1,000 , with a fixed scale centerpoint of 500 .

In 2015, the average mathematics scores of U.S. fourthgraders (539) and eighth-graders (518) were higher than the TIMSS centerpoint of 500 (tables 602.20 and 602.30). The average U.S. fourth-grade mathematics score was higher than the average score in 30 of the 42 other countries participating at grade 4 , lower than the average score in 6 countries, and not measurably different from the average score in the remaining 6 countries (table 602.20 ). The 6 countries that outperformed the United States in fourth-grade mathematics were Ireland, Japan, the Republic of Korea, Norway, the Russian Federation, and Singapore. At grade 8, the average U.S. mathematics score was higher than the average score in 21 of the 33 other participating countries, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 7 countries (table 602.30). The 5 countries that outperformed the United States in eighth-grade mathematics were Canada, Japan, the Republic of Korea, the Russian Federation, and Singapore.

The average science scores of both U.S. fourth-graders (546) and U.S. eighth-graders (530) were higher than the TIMSS scale centerpoint of 500 in 2015 (tables 602.20 and 602.30). The average U.S. fourth-grade science score was higher than the average score in 30 of the 41 other countries participating in the science assessment at grade 4 , lower than the average score in 5 countries, and not measurably different from the average score in the remaining 6 countries (table 602.20). The 5 countries that outperformed the United States in fourth-grade science were Finland, Japan, the Republic of Korea, the Russian Federation, and Singapore. At grade 8, the average U.S. science score was higher than the average score in 23 of the 33 other participating countries in 2015, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 5 countries (table 602.30). The 5 countries that outperformed the United States in eighth-grade science were Japan, the Republic of Korea, the Russian Federation, Singapore, and Slovenia.

The TIMSS Advanced assessment measures the advanced mathematics and physics achievement of students in their final year of secondary school who are taking or have taken advanced courses (table 602.35). In TIMSS Advanced, the U.S. average advanced mathematics score (485) and physics score (437) in 2015 were lower than the TIMSS Advanced scale centerpoint of 500.

The Program for International Student Assessment (PISA), coordinated by the Organization for Economic Cooperation and Development (OECD), has measured the performance of 15-year-old students in reading, mathematics, and
science literacy every 3 years since 2000. PISA assesses 15-year-old students' application of reading, mathematics, and science literacy to problems within a real-life context. In 2015, PISA assessed students in the 35 OECD countries as well as in a number of other education systems. Some subnational entities participated as separate education systems, including public school systems in the U.S. states of Massachusetts and North Carolina. Results for the participating U.S. states are included in the discussion in chapter 6, while this Introduction includes only results for the United States in comparison with other OECD countries. PISA scores are reported on a scale of 0 to 1,000 .

On the 2015 PISA assessment, U.S. 15-year-olds' average score in reading literacy was 497, which was not measurably different from the OECD average of 493 (table 602.50). The average reading literacy score in the United States was lower than the average score in 11 of the 34 other OECD countries, higher than the average score in 13 of the other OECD countries, and not measurably different from the average score in 10 of the OECD countries. In all countries, females outperformed males in reading literacy (table 602.40). The U.S. gender gap in reading ( 20 points) was not measurably different from the OECD average gap but was smaller than the gap in 12 other OECD countries.

In mathematics literacy, U.S. 15-year-olds' average score of 470 on the 2015 PISA assessment was lower than the OECD average score of 490 (table 602.60). The average mathematics literacy score in the United States was lower than the average score in 27 of the 34 other OECD countries, higher than the average score in 4 OECD countries, and not measurably different from the average score in 3 OECD countries. In 18 OECD countries, including the United States, males outperformed females in mathematics literacy (table 602.40). The U.S. gender gap in favor of males in mathematics ( 9 points) was not measurably different from the OECD average gap.

In science literacy, U.S. 15-year-olds' average score of 496 was not measurably different from the OECD average score of 493 (table 602.70). The average science literacy score in the United States was lower than the average score in 12 of the 34 other OECD countries, higher than the average score in 10 OECD countries, and not measurably different from the average score in 12 OECD countries. In 15 OECD countries, including the United States, males outperformed females in science literacy. In 4 OECD countries, females outperformed males in science literacy. The U.S. gender gap in favor of males in science ( 7 points) was not measurably different from the OECD average gap.

The Progress in International Reading Literacy Study (PIRLS) measures the reading knowledge and skills of 4thgraders over time. PIRLS scores are reported on a scale from 0 to 1,000 , with the scale average set at 500 . On the 2011 PIRLS, U.S. 4th-graders had an average reading literacy score of 556 (table 602.10). The U.S. average score in 2011 was 14 points higher than in 2001 and 16 points higher than in 2006. In all three assessment years, the U.S. average score was
higher than the PIRLS scale average. In 2011, PIRLS assessed 4th-grade reading literacy in 40 countries. The average reading literacy score of 4th-graders in the United States was higher than the average score in 33 of the 39 other participating countries, lower than the average score in 3 countries, and not measurably different from the average score in the remaining 3 countries.

## High School Graduates and Dropouts

About $3,568,000$ U.S. high school students were expected to graduate during the 2016-17 school year (table 219.10), including 3,254,000 public school graduates and 315,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The number of high school graduates projected for 2016-17 is higher than the prior record high in 2015-16, and exceeds the baby boom era's high point in 1975-76, when $3,142,000$ students earned diplomas. In 2014-15, about 83 percent of public high school students graduated with a regular diploma within 4 years of first starting 9th grade (table 219.46). This rate is known as the 4 -year adjusted cohort graduation rate (ACGR).

The number of GED credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service. ${ }^{1}$ Between 2003 and 2013, the number of persons passing the GED tests increased by 40 percent, from 387,000 to 541,000 .

The percentage of dropouts among 16- to 24 -year-olds (known as the status dropout rate) has decreased over the past two decades (table 219.70). The status dropout rate is the percentage of the civilian noninstitutionalized 16 - to 24-year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts in this measure.) Between 1990 and 2015, the status dropout rate declined from 12.1 percent to 5.9 percent (table 219.70). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates in 2015 ( 6.5 and 9.2 percent, respectively) remained higher than the rate for Whites (4.6 percent).

[^2]
## Postsecondary Education

## College Enrollment

College enrollment was 20.0 million in fall 2015, reflecting a 5 percent decrease from the record enrollment of 21.0 million in fall 2010 (table 105.30). College enrollment is expected to set new records from fall 2020 through fall 2026, the last year for which NCES enrollment projections have been developed. Between fall 2015 and fall 2026, enrollment is expected to increase 13 percent. Despite decreases in the size of the traditional college-age population (18 to 24 years old) during the late 1980s and early 1990s, total enrollment increased during this period (tables 101.10 and 105.30). The traditional college-age population rose 6 percent between 2005 and 2015, and total college enrollment increased 14 percent during the same period. Between 2005 and 2015, the number of full-time students increased 14 percent, while the number of part-time students increased 15 percent (table 303.10). During the same time period, the number of males enrolled increased 17 percent, and the number of females enrolled increased 12 percent.

## Faculty

In fall 2015, degree-granting institutions-defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid pro-grams-employed 1.6 million faculty members, including 0.8 million full-time and 0.7 million part-time faculty (table 314.30). In addition, degree-granting institutions employed 0.4 million graduate assistants.

## Postsecondary Degrees

During the 2016-17 academic year, postsecondary degrees conferred were projected to number 1,011,000 associate's degrees, $1,895,000$ bachelor's degrees, 773,000 master's degrees, and 181,000 doctor's degrees (table 318.10). The doctor's degree total includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees. Between 2004-05 and 2014-15 (the last year of actual data), the number of degrees conferred increased at all levels. The number of associate's degrees was 46 percent higher in 2014-15 than in 2004-05, the number of bachelor's degrees was 32 percent higher, the number of master's degrees was 31 percent higher, and the number of doctor's degrees was 33 percent higher.

Between 2004-05 and 2014-15, the number of bachelor's degrees awarded to males increased 33 percent, while the number of bachelor's degrees awarded to females increased 31 percent. Females earned 57 percent of all bachelor's degrees in 2014-15, the same percentage as in 2004-05. Between 2004-05 and 2014-15, the number of White students earning bachelor's degrees increased 15 percent, compared with larger increases of 42 percent for Black students, 115 percent for Hispanic students, and 38 percent for Asian/Pacific Islander students (table 322.20). The num-
ber of American Indian/Alaska Native students earning bachelor's degrees was 1 percent lower in 2014-15 than in 2004-05. In 2014-15, White students earned 67 percent of all bachelor's degrees awarded (vs. 75 percent in 2004-05), Black students earned 11 percent (vs. 10 percent in 2004-05), Hispanic students earned 12 percent (vs. 7 percent in 2004-05), and Asian/Pacific Islander students earned about 7 percent (increasing their share of the degrees from 7.0 percent in 2004-05 to 7.4 percent in 2014-15). American Indian/Alaska Native students earned less than 1 percent of the degrees in both years.

## Undergraduate Prices

For the 2015-16 academic year, average annual prices for undergraduate tuition, fees, room, and board were estimated to be $\$ 16,757$ at public institutions, $\$ 43,065$ at private nonprofit institutions, and $\$ 23,776$ at private for-profit institutions in current dollars (table 330.10). Between 2005-06 and 2015-16, prices for undergraduate tuition, fees, room, and board at public institutions rose 34 percent, and prices at private nonprofit institutions rose 26 percent, after adjustment for inflation. Prices for total tuition, fees, room, and board at private for-profit institutions decreased 16 percent between 2005-06 and 2015-16.

## Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 2006 and 2016, the percentage of the adult population 25 years of age and over who had completed at least high school rose from 85 percent to 89 percent, and the percentage of adults with a bachelor's or higher degree increased from 28 percent to 33 percent (table 104.10). (High school completers include those people who graduated from high school with a diploma as well as those who completed high school through equivalency programs.) Among those age 25 and over who were employed, 39 percent had a bachelor's or higher degree in 2016 and about half (51 percent) had an associate's or higher degree (table 502.10). The percentage of young adults (25- to 29-year-olds) who had completed at least high school increased from 86 percent in 2006 to 92 percent in 2016 (table 104.20). The percentage of young adults who had completed a bachelor's or higher degree increased from 28 percent in 2006 to 36 percent in 2016. During this same period, the percentage of 25- to 29-year-olds who had completed a master's or higher degree increased from 6 to 9 percent.

## Adult Literacy and Numeracy Skills

The Program for the International Assessment of Adult Competencies (PIAAC) assesses the cognitive skills of adults in three areas-literacy, numeracy, and problem solving in technology-rich environments-that are seen as key to facilitating the social and economic participation of adults in advanced economies. The discussion below focuses on the areas of literacy and numeracy. PIAAC 2012 results are
available for adults in 24 education systems, including 22 OECD education systems. The education systems that participated in the 2012 assessment were primarily countries, but also included three subnational education systems: Northern Ireland and England within the United Kingdom, and the Flemish community in Belgium. PIAAC literacy and numeracy scores are reported on a scale of 0 to 500 .

In 2012, average scores on the PIAAC literacy scale for adults ages 25 to 65 ranged from 249 in Italy and 250 in Spain to 296 in Japan (table 604.10). U.S. 25- to 65 -yearolds had an average PIAAC literacy score of 269 , which was not measurably different from the OECD average score of 271. Across education systems, adults' average literacy scores generally increased with higher levels of educational attainment. In the United States, for example, 25- to 65-yearolds whose highest level of attainment was high school completion had an average literacy score of 259 , compared with an average score of 302 for those who had a bachelor's or higher degree. The average literacy score for U.S. high school completers in the 25- to 65 -year-old age group was lower than the OECD average of 268 for high school completers in this age group, while the literacy score for U.S. 25to 65-year-olds with a bachelor's or higher degree was not measurably different from the OECD average of 302 for those with a bachelor's or higher degree.

On the PIAAC numeracy scale, 2012 average scores for adults ages 25 to 65 ranged from 245 in Spain and 246 in Italy to 289 in Japan. U.S. 25- to 65 -year-olds had an average PIAAC numeracy score of 254 , which was lower than
the OECD average score of 268. Across education systems, adults' average numeracy scores generally increased with higher levels of educational attainment. In the United States, for example, 25 - to 65 -year-olds whose highest level of attainment was high school completion had an average numeracy score of 241 , compared with an average score of 293 for those who had a bachelor's or higher degree. The average numeracy score for U.S. 25- to 65 -year-olds who had completed only high school was lower than the OECD average of 265 for those with the same level of educational attainment. Likewise, the average numeracy score for U.S. 25- to 65-year-olds with a bachelor's or higher degree was lower than the OECD average of 303 for those with a bachelor's or higher degree.

## Education Expenditures

U.S. expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), were an estimated $\$ 1.3$ trillion for 2015-16 (table 106.10). Expenditures of elementary and secondary schools totaled an estimated $\$ 707$ billion, while those of degree-granting postsecondary institutions totaled an estimated $\$ 548$ billion. Total expenditures for education were an estimated 7.0 percent of the gross domestic product in 2015-16. Education spending as a percentage of GDP increased from 7.1 in 2005-06 to 7.6 in 2009-10, but has declined since then.

## CHAPTER 1

 All Levels of EducationThis chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and the total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, and population. Economic indicators and price indexes have been added to facilitate analyses.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## The U.S. System of Education

The U.S. system of education can be described as having three levels of formal education: elementary, secondary, and postsecondary (figure 1). Students may spend 1 to 3 years in preprimary programs (prekindergarten [PK] and kindergarten $[K]$ ), which may be offered either in separate schools or in elementary schools that also offer higher grades. (In Digest of Education Statistics tables, prekindergarten and kindergarten are generally defined as a part of elementary education.) Following kindergarten, students ordinarily spend 6 to 8 years in elementary school. The elementary school program is followed by a 4- to 6-year program in secondary school. Students typically complete the entire program through grade 12 by age 18 . Education at the elementary and secondary levels is provided in a range of institutional settings-including elementary schools (preprimary schools, middle schools, and schools offering broader ranges of elementary grades); secondary schools (junior high schools, high schools, and senior high schools); and combined elementary/secondary schools-that vary in structure from locality to locality.

High school graduates who decide to continue their education may enter a specialized career/technical institution, a 2-year community or junior college, or a 4-year college or
university. A 2-year college typically offers the first 2 years of a standard 4-year college curriculum and a selection of terminal career and technical education programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A career/ technical institution offers postsecondary technical training programs of varying lengths leading to a specific career.

An associate's degree requires at least 2 years of postsecondary coursework, and a bachelor's degree typically requires 4 years of postsecondary coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs typically involve 3 years of coursework beyond the bachelor's degree level.

## Enrollment

Total enrollment in public and private elementary and secondary schools (prekindergarten through grade 12) grew rapidly during the 1950s and 1960s, reaching a peak year in 1971 (table A, table 105.30, and figure 2). This enrollment rise reflected what is known as the "baby boom," a dramatic increase in births following World War II. Between 1971 and 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the size of the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and continued to reach new record levels every year through 2006, after which enrollment declined slightly from its 2006 level. However, enrollment in fall 2013 ( 55.4 million) and fall 2014 ( 55.6 million) was slightly higher than the fall 2006 record level of 55.3 million. A pattern of annual enrollment increases is projected to continue at least through fall 2026 (the last year for which NCES has projected school enrollment). Total elementary and secondary enrollment is projected to increase 2 percent between fall 2016 and fall 2026, when enrollment is expected to reach 56.8 million.

Table A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949-50 to fall 2026

| Trend and year | Number of students (in millions) |
| :---: | :---: |
| "Baby boom" increases |  |
| 1949-50 school year. | 28.5 |
| Fall 1959. | 40.9 |
| Fall 1969. | 51.1 |
| Fall 1971 (peak).......................................................... | 51.3 |
| 13 years with annual declines |  |
| Fall 1972 (first year of decline)........................................ | 50.7 |
| Fall 1984 (final year of decline)....................................... | 44.9 |
| Annual increases from 1985 to 2006 |  |
| Fall 1985. | 45.0 |
| Fall 1996 (new record highs begin).................................. | 51.5 |
| Fall 2006 (final year of record highs) ............................... | 55.3 |
| Slight declines or stable enrollment |  |
| Fall 2007. | 55.2 |
| Fall 2010. | 54.9 |
| Fall 2012 .................................................................... | 55.1 |
| Annual increases projected to start again |  |
| Fall 2013................................................................... | 55.4 |
| Fall 2014. | 55.6 |
| Fall 2015 (projected). | 55.8 |
| Fall 2016 (projected). | 55.9 |
| Fall 2026 (projected).................................................... | 56.8 |

SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States, 1949-50; Statistics of Public Elementary and Secondary School Systems, 1959 through 1972; Common Core of Data (CCD), 1984 through 2013; Private School Universe Survey (PSS), 1997-98 through 2013-14; and National Elementary and Secondary Enrollment Projection Model, 1972 through 2026.

Between 1985 and 2015, the total public and private school enrollment rate for 5- and 6-year-olds decreased from 96 to 94 percent, while the enrollment rate for 7- to 13-yearolds decreased from 99 to 98 percent (table 103.20). During the same period, the enrollment rate for 14- to 17-year-olds increased from 95 to 96 percent. Since these enrollment rates changed by less than 4 percentage points between 1985 and 2015, increases in public and private elementary and secondary school enrollment primarily reflect the larger increases in the number of children in these age groups. Between 1985 and 2015, the number of 5- and 6-year-olds increased by 16 percent, the number of 7 - to 13 -year-olds increased by 26 percent, and the number of 14- to 17-year-olds increased by 13 percent (table 101.10). Increases in the enrollment rate of prekindergarten-age children (ages 3 and 4) from 39 percent in 1985 to 53 percent in 2015 (table 103.20) and in the number of 3 - and 4 -year-olds from 7.1 million to 8.0 million (table 101.10) also contributed to overall increases in prekindergarten through grade 12 enrollment.

Public school enrollment at the elementary level (prekindergarten through grade 8) rose from 29.9 million in fall 1990 to 34.2 million in fall 2003 (table 105.30). Elementary enrollment was less than 1 percent lower in fall 2004 than in fall 2003 and then generally increased to a projected total of 35.5 million for fall 2016. Public elementary enrollment is projected to increase 2 percent between 2016 and 2026. Public school enrollment at the secondary level (grades 9 through 12) rose from 11.3 million in 1990 to 15.1 million in 2007 , but then
declined 2 percent to 14.7 million in 2011. Public secondary enrollment is projected to increase 2 percent between 2011 and 2016 and then show a further increase of 2 percent between 2016 and 2026. Total public elementary and secondary enrollment is projected to increase every year from 2016 to 2026.

The percentage of students in private elementary and secondary schools declined from 11.1 percent in fall 2004 to 9.6 percent in fall 2014 (table 105.30). In fall 2016, an estimated 5.2 million students were enrolled in private schools at the elementary and secondary levels.

Total enrollment in public and private degree-granting postsecondary institutions reached 14.5 million in fall 1992, but decreased every year through fall 1995 (table 105.30). Total enrollment increased 47 percent between 1995 and 2010 (to 21.0 million), but declined 5 percent between 2010 and 2015 (to 20.0 million). Total enrollment is expected to increase 13 percent between fall 2015 and fall 2026, reaching 22.6 million. The percentage of students who attended private institutions rose from 26 to 27 percent between 2005 and 2015. In fall 2015, about 5.4 million students attended private institutions, with about 4.1 million in nonprofit institutions and 1.3 million in for-profit institutions (table 303.10). Enrollment increases in degree-granting postsecondary institutions have been driven by increases in population, as well as by increases in enrollment rates for 20 - to 24 -year-olds. The percentage of 18 - and 19 -year-olds enrolled in degree-granting postsecondary institutions was 49 percent in 2015, which was not measurably different from the percentage in 2005 . The number of 18 - and 19-year-olds in 2015 was less than 1 percent lower than in 2005 (tables 101.10 and 103.20). The enrollment rate of 20- to 24-year-olds rose from 36 to 39 percent and the number of 20- to 24 -year-olds rose by 8 percent during the same period.

## Educational Attainment

The percentages of adults 25 years old and over completing high school and higher education have been rising. Between 2006 and 2016, the percentage of the population 25 years old and over who had completed at least high school increased from 85 to 89 percent, and the percentage who had completed a bachelor's or higher degree increased from 28 to 33 percent (table 104.10 and figure 3 ). In 2016, about 9 percent of people 25 years old and over held a master's degree as their highest degree and 3 percent held a doctor's or first-professional degree (table 104.30).

Among young adults (25- to 29-year-olds), the percentage who had completed at least high school increased from 86 percent in 2006 to 92 percent in 2016 (table 104.20 and figure 4). The percentage of young adults who had completed a bachelor's or higher degree increased from 28 percent in 2006 to 36 percent in 2016. In 2016, about 7 percent of young adults held a master's degree as their highest degree and 2 percent held a doctor's or first-professional degree (table 104.30 and figure 5). Overall, the percentage of young adults who had a master's or higher degree rose from 6 percent in 2006 to 9 percent in 2016.

Between 2006 and 2016, changes in the educational attainment of young adults also occurred by race/ethnicity. During this period, the percentages who had completed at least high school increased for Hispanic, White, and Black young adults, but there was no measurable change in the percentage for Asian young adults ( 97 percent in 2016) (table 104.20 and figure 6). The percentage of Hispanic young adults who had completed at least high school rose from 63 percent in 2006 to 81 percent in 2016, an increase of 17 percentage points. During the same period, the percentage of White young adults who had completed at least high school rose from 93 to 95 percent, an increase of 2 percentage points. Since the increase for White young adults was smaller than the increase for Hispanic young adults, the gap between the high school completion percentages for these two groups decreased from 30 percentage points in 2006 to 15 percentage points in 2016. Between 2006 and 2016, the percentage of Black young adults who had completed high school increased from 86 to 91 percent, and the gap between the White and Black high school completion percentages decreased from 7 to 4 percentage points. In 2016, the percentage of young adults who had completed at least high school was higher for Whites and Asians than for Blacks, Hispanics, and American Indians/ Alaska Natives (84 percent).

The percentage of bachelor's degree holders also varied among young adults of different racial/ethnic groups, with 66 percent of Asians in the 25 - to 29 -year-old age group holding a bachelor's or higher degree in 2016, compared with 43 percent of Whites, 23 percent of Blacks, 19 percent of Hispanics, 20 percent of Pacific Islanders, 10 percent of American Indians/Alaska Natives, and 28 percent of persons of Two or more races. Between 2006 and 2016, the percentages who had completed a bachelor's or higher degree increased for White, Black, and Hispanic young adults, but showed no measurable change for Asian young adults. During this 10-year period, the percentage of young adults who held a bachelor's or higher degree increased from 34 to 43 percent among Whites, from 19 to 23 percent among Blacks,
and from 9 to 19 percent among Hispanics. With these increases for all three groups, the gap in bachelor's degree attainment percentages between White and Black young adults increased from 16 percentage points in 2006 to 20 percentage points in 2016, and the gap between White and Hispanic young adults in 2016 ( 24 percentage points) was not measurably different from the gap in 2006.

## Teachers and Faculty

A projected 3.6 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2016 (table 105.40), which was about 1 percent lower than in 2006. The number of FTE public school teachers in 2016 was 3.2 million, and the number of FTE private school teachers was 0.4 million. FTE faculty at degree-granting postsecondary institutions totaled a projected 1.1 million in 2016, including 0.7 million at public institutions and 0.4 million at private institutions (table 105.10).

## Expenditures

Expenditures of educational institutions were an estimated $\$ 1.3$ trillion for the 2015-16 school year (table 106.20 and figure 2). Elementary and secondary schools spent 56 percent of this total ( $\$ 707$ billion), and colleges and universities spent the remaining 44 percent ( $\$ 548$ billion). After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 13 percent between 2005-06 and 2015-16. Inflation-adjusted expenditures of degree-granting postsecondary institutions rose by an estimated 29 percent. Expenditures of elementary and secondary schools were 3 percent higher in 2015-16 than in 2005-06. In 2015-16, expenditures of educational institutions were an estimated 7.0 percent of the gross domestic product (table 106.10).

Figure 1. The structure of education in the United States

NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels. SOURCE: U.S. Department of Education, National Center for Education Statistics, Annual Reports Program.

Figure 2. Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965-66 through 2015-16

Total expenditures, in billions of constant 2015-16 dollars

NOTE: Elementary and secondary enrollment data for school year 2015 (2015-16) are projected. Elementary and secondary expenditure data for school years 2014 and 2015 (2014-15 and 2015-16) are estimated. Postsecondary expenditure data for school year 2015 (2015-16) are estimated.

## -Not available.

## ${ }^{1}$ Included under Asian.

${ }^{2}$ Data on persons of Two or more races were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Race catego-
ries exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Population estimates as of July 1 of the indicated reference year.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.
${ }^{3}$ Includes other Centra
Includes other Central American subgroups not shown separately.
${ }^{4}$ Includes Taiwanese.
In addition to the subgroups shown, also includes Sri Lankan.
${ }^{6}$ Consists of Indonesian and Malaysian
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Data are from the American Community Survey and may differ from data shown in other tables obtained from the Current Population Survey. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
merce, Census Bureau, American Community Survey (ACS), 2005, 2010, and 2015. (This table was prepared April 2017.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
NOTE: A family household consists of two or more people who are related by birth, marriage, or adoption and are residing
together. Own children are never-married sons and daughters, including stepchildren and adopted children, of the householder
or married couple. Detail may not sum to totals because of rounding.

\#Rounds to zero
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Includes all children who live either with their parent(s) or with a householder to whom they are related by birth, marriage, or adoption (except a child who is the spouse of the householder). Children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children. Living arrangements with only a "female householder" or "male householder" are those in which the parent or the householder who is related to the child does not have a spouse living in the household. The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. ${ }^{2}$ Includes foster children, children in unrelated subfamilies, children living in group quarters,
and children who were reported as the householder or spouse of the householder. ${ }^{3}$ Includes other Central American subgroups not shown separately. Includes Taiwanese
In addition to the subgroups shown, also includes Sri Lankan.
${ }^{6}$ Consists of Indonesian and Malaysian.
Respondents who wrote in some other race that was not included as an option on the questionnaire
NOTE: Data are based on sample surveys of the entire population residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding

${ }^{1}$ Data exclude institutionalized persons (e.g., those living in prisons or nursing homes) as well as persons living in most types of noninstitutional group quarters (e.g., college housing or military barracks). Data include noninstitutionalized persons living in households as well as those living in group homes and shelters.
${ }^{2}$ Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (main tains) the housing unit. This table excludes unrelated children and householders who are themselves under the age of 18 .
${ }^{3}$ Based on 1989 incomes and family sizes collected in the 1990 census
4Based on 1999 incomes and family sizes collected in the 2000 census.
${ }^{5}$ Based on income and family size data from the American Community Survey (ACS). ACS respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States.

NOTE: Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see https://www.census.gov/topics/income-poverty/poverty/guidance/povertymeasures.html. Poverty estimates in this table may differ from table 102.50's official national poverty estimates, which are based on a different data source (the Current Population Survey). Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, 1990 Summary Tape File 3 (STF 3), "Median Household Income in 1989" and "Poverty Status in 1989 by Family Type and Age"; Decennial Census, 1990, Minority Economic Profiles, unpublished data; Decennial Census, 2000, Summary Social, Economic, and Housing Characteristics; Census 2000 Summary File 4 (SF 4), "Poverty Status in 1999 of Related Children Under 18 Years by Family Type and Age"; and American Community Survey (ACS), 2010, 2014, and 2015. (This table was prepared December 2016.)

Table 102.50. Official and supplemental measures of poverty status for all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2015

| Race/ethnicity, type of poverty measure, and year | Number below the poverty level (in thousands) |  |  |  |  |  |  |  |  |  |  |  | Percent below the poverty level |  |  |  |  |  |  |  |  |  |  |  |

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Related children in a family include all children in the household who are related to the house holder by birth, marriage, or adoption (except a child who is the spouse of the householder) The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. This table includes only children related to the householder. It excludes unrelated children and householders who are themselves under the age of 18.
${ }^{2}$ To determine family structure, children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children.
${ }^{3}$ Includes other Central American subgroups not shown separately.
${ }^{4}$ Includes Taiwanese
${ }^{5}$ In addition to the subgroups shown, also includes Sri Lankan.
${ }^{6}$ Consists of Indonesian and Malaysian.
${ }^{7}$ Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.
${ }^{8}$ Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States. Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see https://www.census.gov/topics/income-poverty/poverty/ guidance/poverty-measures.html. Poverty estimates in this table may differ from table 102.50's official national poverty estimates, which are based on a different data source (the Current Population Survey). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2010 and 2015. (This table was prepared December 2016.)

Table 102.62. Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, child's race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2015
[Standard errors appear in parentheses]

[^6]${ }^{8}$ Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified. ${ }^{9}$ Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Table includes only children under the age of 18 who resided with at least one of their parents (including an adoptive or stepparent). Respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States. Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see https://www.census.gov/topics/income-poverty/poverty/guidance/povertymeasures.html. Race categories exclude persons of Hispanic ethnicity.

## -Not available

${ }^{1}$ Neginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.
${ }^{2}$ Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
NOTE: Data for 1940 are for April. Data for all other years are as of October. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or
nursing facilities). Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may SOURCE: U.S. Department of Commerce, Census Bureau, Histori 1970; Current Population Reports, Series P-20, various years; CPS Historical Time Se United States, Colonial Tnmes to retrieved June 6, 2012, from http://www.census.gov/hhes/school/data/cps/historical/index.html; and Current Population Survey, October, 1970 through 2015. (This table was prepared July 2016.

Table 104.10. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and sex: Selected years, 1910 through 2016

## -Not available.

$\dagger$ Not applicable.
${ }^{1}$ Includes persons of Hispanic ethnicity for years prior to 1980.
${ }^{2}$ Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers-i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.
${ }^{3}$ Estimates based on Census Bureau reverse projection of 1940 census data on education by age.
${ }^{4}$ Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. For 1960 and prior years, data were collected in April. For later years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

## ${ }^{4}$ Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. For 1960 and prior years, data were collected in April. For later years, data were collected in March. Data are based on sample surveys of the noninstitutionalized population, which excludes persons living in institutions (e.g., prisons or nursing facilities); data include military personnel who live in households with civilians, but exclude those who live in military barracks. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Some data have been revised from previously published figures.

## -Not available.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there were too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
1High school completers include diploma recipients and those completing high school through alternative credentials, such as a GED. 2Total includes other racial/ethnic groups not shown separately.
ncludes other Central American subgroups not shown separately.
Includes Taiwanese.

In addition to the subgroups shown, also includes Sri Lankan.
COTsists of indonesian and Malaysian.
NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. prepared April 2017.)

## $\dagger$ Not applicable

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
Reporting standards not met (too few cases for a reliable estimate).
NOTE: Data are based on sample surveys of the entire population age 25 and over residing within the United States, including States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). The first bache-
lor's degree major reported by respondents was used to classity their field of study, even though they were able to report a second bachelor's degree major and may possess advanced degrees in other fields. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2015. (This table was pren pared December 2016.)

## Not applicable.

$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Idian and/or Alaska Native tribes specified or not specified.
${ }^{3}$ Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.

NOTE: Data are based on sample surveys of the entire 25 - to 34 -year-old population residing within the United States, including both noninstitutionalized persons (e.g., those living in households, coliege housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing faciilities, or other healthcare facilities). The first bachelor's degree major reported by respondents was used to classify their field of study, even though they were able to report a second bachelor's degree major and may possess advanced degrees in other fields. STEM fields, as defined here,
consist of the fields specified in columns 6 through 13. Data were assembled based on major field aggregations, except that management of STEM activities was counted as a STEM field instead of a business field. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

## $\dagger$ Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50
Parents include adoptive and stepparents, but exclude parents not residing in the same household as their children.
${ }^{2}$ Includes parents who completed high school through equivalency programs, such as a GED program.
${ }^{3}$ Includes parents with professional degrees.
${ }^{4}$ Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Table includes only children under age 18 who resided with at least one of their parents (including an adoptive or stepNOTE: Table includes only children under age 18 who resided with at least one of their parents (including an adoptive or step-
parent). Children in single-parent households resided with only one parent, while those in two-parent households resided with two parents. Data are based on sample surveys of the entire population residing within the United States. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

was prepared November 2016.) was prepared November 2016.)

Table 104.80. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000 and 2015
[Standard errors appear in parentheses]

## \#Rounds to zero.

${ }^{1}$ High school completers include those graduating from high school with a diploma as well as those completing high school through equivalency programs, such as a GED program.
NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized
persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Detail may not sum to totals because of rounding.

${ }^{1}$ Includes completion of high school through equivalency programs, such as a GED program. NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States)
and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, 2015 American Community Survey (ACS) 1-Year Public Use Microdata Sample (PUMS) data. (This table was prepared March 2017.)

Table 104.95. Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2016
[Standard errors appear in parentheses]

| Metropolitan area | Number of persons 25 years old and over (in thousands) |  |  |  |  |  | Percent with high school completion or higher |  |  |  |  |  | Percent with bachelor's or higher degree |  |  |  |  |  |

| Total ................................................. | 86.1 | 62.9 | 56.9 | 5.9 | 23.2 | 16.8 | 6.4 |
| Enrollment ............................................ | 76.0 | 55.9 | 50.6 | 5.2 | 20.2 | 14.8 | 5.3 |
| Teachers and faculty ................................. | 4.6 | 3.6 | 3.2 | 0.4 | 1.1 | 0.7 | 0.4 |
| Other professional, administrative, and support staff $\qquad$ | 5.4 | 3.5 | 3.1 | 0.3 | 1.9 | 1.3 | 0.7 |

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal Bureau of Indian Education schools and Department of Defense schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

${ }^{1}$ Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.
${ }^{2}$ Estimated.
${ }^{2}$ Estimated. counts of students were prorated to the elementary level (prekindergarten to grade 8) and the secondary level (grades 9 to 12) based on prior reports.
${ }^{4}$ In addition to students in grades 9 to 12 and ungraded secondary students, includes a small number of students reported as being enrolled in grade 13.
${ }^{5}$ Data are actual.
NOTE: Postsecondary data for 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher
degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

## -Not available.

${ }^{1}$ Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.
${ }^{2}$ Data through 1995 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.
${ }^{3}$ Estimated.
4Inclusion of institutions is not consistent with surveys for 1987 and later years.
${ }^{5}$ Data for elementary and secondary schools are projected; data for degree-granting institutions are actual.
${ }^{6}$ Projected.

NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions faculty.

## -Not available.

$\dagger$ Not applicable.
${ }^{1}$ Includes special education, alternative, and other schools not classified by grade span Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.
${ }^{2}$ Data for 1980-81 and 1990-91 include schools with first or higher grades. Data for later years include schools with kindergarten or higher grades.
${ }^{3}$ Included in the elementary, secondary, and combined categories.
NOTE: Postsecondary data for 1980-81 and 1990-91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degreegranting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher
education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

## -Not available.

${ }^{1}$ Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.
${ }^{2}$ Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.
${ }^{3}$ Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929-30 and 1939-40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949-50 through 1995-96 are for current-fund expenditures. Data for private degree-granting institutions for 1996-97 and later years are for total expenditures. Data for public degree-granting institutions for 1996-97 through 2000-01 are for current expenditures; data for later years are for total expenditures. Postsecondary data through 1995-96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or
higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

## -Not available.

Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labo Statistics, U.S. Department of Labor, adjusted to a school-year basis.
${ }^{2}$ Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.
${ }^{3}$ Data for elementary and secondary education are estimated; data for degree-granting institutions are actual
${ }^{4}$ Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Expenditures for public and private colleges and universities in 1929-30 and 1939-40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949-50 through 1995-96 are for current-fund expenditures. Data for private degree-granting institutions for 1996-97 and later years are for total expenditures. Data for public degree-granting institutions for 1996-97 through 2000-01 are for current expenditures; data for later years are for total expenditures. Postsecondary data through 1995-96 are for institutions of higher
education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2 -year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

\#Rounds to zero.
1Includes state and local government expenditures for education and public libraries, social services and income mainte-
other direct general expenditures
${ }^{2}$ Includes assistance and subsidies to individuals, private elementary and secondary schools, and private colleges and uni- versities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. In 2011-12, a census of state and local governments was conducted; therefore, standard errors are not applicable. Detail may not sum to totals because of rounding Some data have been revised from previously published figures.
overnmental Finances. Retrieved March 15, 2017, from http:// www.census.gov/govs/local/. (This table was prepared April 2017.)

${ }^{1}$ Data for years prior to 1970 include expenditures for government fiscal years ending during that particular calendar year. Data for 1970 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.
${ }^{2}$ Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output. More information is available at https://www.bea.gov/scb/account articles/ national/0597od/maintext.htm.
${ }^{3}$ Data adjusted by the CPU-RS, which is a price index of inflation that incorporates most of the improvements in methodology made to the current CPI-U since 1978 into a single, uniform series. See Census Bureau, Money Income in the United States: 1999 (www.census.gov/prod/ 2000pubs/p60-209.pdf).
${ }^{4}$ Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960.
${ }^{5}$ Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data for 1990 and later years include revisions based on the 2000 census. Excludes overseas armed orces personnel.
NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

## CHAPTER 2 <br> Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys, censuses, and administrative data collections conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

## Enrollments

Public elementary and secondary school enrollment rose from 49.4 million in 2009 to 50.3 million in 2014 , an increase of 2 percent (table 203.10 and figure 7). Public elementary enrollment (prekindergarten through grade 8) increased 3 percent between 2009 and 2014 (from 34.4 million to 35.4 million), while public secondary enrollment (grades 9 through 12) was less than 1 percent lower in 2014 ( 14.9 million) than in 2009 . Although public school enrollment increased overall between 2009 and 2014, there were decreases in enrollment for some racial/ethnic groups and increases for others (table 203.50). Between 2009 and 2014, the enrollment of Hispanic students increased 16 percent and the enrollment of Asian/Pacific Islander students increased 7 percent. In contrast, the enrollment of White students decreased 7 percent and the enrollment of American Indian/Alaska Native students decreased 14 percent. Also, the enrollment of Black students was 5 percent lower in 2014 than in 2009.

From 2009 to 2014, changes in public school enrollment varied from state to state. Thirty-two states and the District of Columbia had higher enrollment in 2014 than in 2009, while 18 states had lower enrollment in 2014 than in 2009 (table 203.20 and figure 8). The largest public school enrollment increases occurred in the District of Columbia (17 percent), North Dakota (12 percent), and Utah (11 percent), and increases of more than 5 percent occurred in 9 other states (Texas, South Dakota, Nevada, Colorado, Wyoming, Nebraska, Delaware, Idaho, and Oklahoma). The largest decrease in public school enrollment occurred in Michigan (a decrease of 7 percent), and decreases of more than 4 percent occurred in 2 other states (New Hampshire and Vermont).

Enrollment in private elementary and secondary schools in 2015 ( 5.8 million) was 5 percent lower than in 2005 ( 6.1 million) (table 205.10). In 2015, private school students made up 10.3 percent of all elementary and secondary school students.

In 2015, about 64 percent of 3 - to 5 -year-olds were enrolled in preprimary education (nursery school and kindergarten), which was not measurably different from the percentage enrolled in 2005 (table 202.10 and figure 9). However, the percentage of these children in full-day programs increased from 58 percent in 2005 to 63 percent in 2015.

A higher percentage of 4 -year-old children ( 57 percent) were cared for primarily in center-based programs during the day in 2005-06 than had no regular nonparental care ( 20 percent) or were cared for primarily in home-based settings by relatives (13 percent) or by nonrelatives ( 8 percent) (web-only table 202.50). There were differences in the average quality of care children received in these settings. A higher percentage of children in Head Start and other center-based programs ( 35 percent) received high-quality care than those in home-based relative and nonrelative care ( 9 percent), according to the ratings of trained observers (web-only table 202.60).

The Individuals with Disabilities Education Act (IDEA), enacted in 1975, mandates that children and youth ages 3-21 with disabilities be provided a free and appropriate public school education. The percentage of total public school enrollment that represents children served by federally supported special education programs increased from 8.3 percent to 13.8 percent between 1976-77 and 2004-05 (table 204.30). Much of this overall increase can be attributed to a rise in the percentage of students identified as having specific learning disabilities from 1976-77 (1.8 percent) to 2004-05 (5.7 percent). The overall percentage of students being served in programs for those with disabilities decreased between 2004-05 (13.8 percent) and 2014-15 (13.0 percent). However, there were different patterns of change in the percentages served with some specific conditions between 2004-05 and 2014-15. The percentage of children identified as having other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes) rose from 1.1 to 1.7 percent of total public school enrollment, the percentage with autism rose from 0.4 to 1.1 percent, and the percentage with developmental delay rose from 0.7 to 0.8
percent. The percentage of children with specific learning disabilities declined from 5.7 percent to 4.5 percent of total public school enrollment during this period. In fall 2014, some 95 percent of 6- to 21-year-old students with disabilities were served in regular schools; 3 percent were served in a separate school for students with disabilities; 1 percent were placed in regular private schools by their parents; and less than 1 percent each were served in one of the following environments: in a separate residential facility, homebound or in a hospital, or in a correctional facility (table 204.60).

## Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased while the number of teachers generally increased. For public schools, the number of pupils per teacher-that is, the pupil/teacher ratio ${ }^{1}$-declined from 22.3 in 1970 to 17.9 in 1985 (table 208.20 and figure 7). After enrollment started increasing in 1985, the public school pupil/teacher ratio continued to decline, reaching 17.2 in 1989. After a period of relative stability from the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 15.3 in 2008. After 2008, the public school pupil/ teacher ratio increased, reaching 16.1 in 2014. By comparison, the pupil/teacher ratio for private schools was 12.2 in 2014. The average class size in 2011-12 was 21.2 pupils for public elementary schools and 26.8 pupils for public secondary schools (table 209.30).

In 2011-12, some 76 percent of public school teachers were female, 44 percent were under age 40 , and 56 percent had a master's or higher degree (table 209.10). Compared with public school teachers, a lower percentage of private school teachers had a master's or higher degree (43 percent).

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2011-12, some 20 percent of public school principals were under age 40 , and 98 percent of public school principals had a master's or higher degree (web-only table 212.10). Compared with public school principals, a lower percentage of private school principals had a master's or higher degree (69 percent). A lower percentage of principals than of teachers were female: About 52 percent of public school principals were female, compared with 76 percent of teachers. At private schools, 55 percent of principals were female in 2011-12, compared with 75 percent of teachers.

From 1969-70 to 1980, there was an 8 percent increase in the number of public school teachers, compared with a 48 percent increase in the number of all other public school staff ${ }^{2}$ (table B and table 213.10). Consequently, the percent-

[^14]age of staff who were teachers declined from 60 percent in 1969-70 to 52 percent in 1980 . From 1980 to 2014, the number of teachers and the number of all other staff grew at more similar rates ( 43 and 58 percent, respectively) than they did in the 1970s. As a result, the proportion of teachers among total staff was 2 percentage points lower in 2014 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. The numbers of staff in two categories increased more than 100 percent between 1980 and 2014: The number of instructional aides rose 130 percent, and the number of instruction coordinators rose 286 percent. Taken together, the percentage of staff with direct instructional responsibilities (teachers and instructional aides) increased from 60 to 62 percent between 1980 and 2014. In 2014, there were 8 pupils per staff member (total staff) at public schools, compared with 10 pupils per staff member in 1980 (table 213.10). At private schools in 2011-12, the number of pupils per staff member was 6 (web-only table 205.60).

In more recent years, the numbers of some types of staff have increased while most others have decreased (table 213.10). Overall, the number of public school staff was 1 percent lower in fall 2014 than in fall 2009. The number of officials and administrators rose 8 percent during this period. The number of principals and assistant principals was 4 percent higher in 2014 than in 2009, the number of instruction coordinators was 6 percent higher, and the number of instructional aides was 1 percent higher. In contrast, the number of support staff was 1 percent lower in 2014 than in 2009, the number of teachers was 2 percent lower, and the number of guidance counselors was 3 percent lower. The number of librarians decreased by 15 percent.

## Table B. Number of public school staff, by selected categories: 1969-70, 1980, and 2014

[In thousands]

| Selected staff category | 1969-70 | 1980 | 2014 |
| :---: | :---: | :---: | :---: |
| Total | 3,361 | 4,168 | 6,259 |
| Teachers. | 2,016 | 2,184 | 3,132 |
| Instructional aides. | 57 | 326 | 749 |
| Instruction coordinators...................... | 32 | 21 | 79 |

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1969-70; Statistics of Public Elementary and Secondary Schools, 1980; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2014-15.

## Schools

During most of the last century, the trend of consolidating small schools brought declines in the total number of public schools in the United States. In 1929-30, there were approximately 248,000 public schools, compared with about 98,000 in 2014-15 (table 214.10). However, the number of public schools has increased in recent decades: Between 1988-89 and 2006-07, there was an increase of approximately 15,600 schools. Since 2006-07, the number of public schools has remained relatively stable, varying by about 500 schools or fewer from year to year.

While the total number of public schools in the country has remained between 98,000 and 99,000 in recent years, new schools have opened and some schools have closed. In 2014-15, there were 1,573 school closures (table 216.95). The schools that closed had enrolled about 212,000 students in the prior school year (2013-14). Of the schools that closed, 1,118 were regular schools, 66 were special education schools, 23 were vocational schools, and 366 were alternative schools. The number of schools that closed in 2014-15 was higher than the number in 2000-01 ( 1,193 ); however, the number of annual school closures fluctuated during this period, ranging from about 1,200 to 2,200 . School closures do not necessarily reflect the number of school buildings that have been closed, since a school may share a building with another school, or one school may have multiple buildings.

Since the early 1970s, public school systems have been shifting away from junior high schools (schools consisting of either grades 7 and 8 or grades 7 to 9 ) and moving toward middle schools (a subset of elementary schools beginning with grade 4,5 , or 6 and ending with grade 6,7 , or 8 ) (table 216.10). Although the number of all elementary schools (schools beginning with grade 6 or below and having no grade higher than 8) was similar in 1970-71 and 2000-01 ( 64,000 and 64,600 , respectively), the number of middle schools was 462 percent higher in 2000-01 than in 1970-71 ( 11,700 vs. 2,100 ). During the same period, the number of junior high schools declined by 57 percent (from 7,800 in $1970-71$ to 3,300 in 2000-01). Between 2004-05 and 2014-15, the number of all elementary schools rose by 2 percent to 67,100 , while the subset of middle schools rose by 6 percent to 13,300. During the same period, the number of junior high schools declined by 17 percent to 2,700 .

The average number of students in public elementary schools in 2014-15 (483) was higher than in 2004-05 (474) (table 216.45). The average enrollment size of public secondary schools decreased from 713 students in 2004-05 to 694 students in 2014-15. The average size of regular public secondary schools-which exclude alternative, special education, and vocational education schools-decreased from 815 students in 2004-05 to 791 students in 2014-15.

## School Choice

Over the past two decades, the range of options that parents have for the education of their children has expanded. Private schools have been a traditional alternative to public school education, but there are now more options for parents to choose public charter schools, and more parents are also homeschooling their children. Between fall 1999 and fall 2015, enrollment in private schools decreased from 6.0 million to 5.8 million, a decline of 0.3 million or 4 percent (table 205.10). Although private school enrollment declined through much of this period, private school enrollment in fall 2015 ( 5.8 million) was higher than in fall 2011 ( 5.3 million). During the fall 1999 to fall 2015 period, the percentage of elementary and secondary students who were enrolled in private
schools declined from 11.4 percent to 10.3 percent. In contrast, enrollment in public charter schools increased between fall 1999 and fall 2014, rising from 0.3 million to 2.7 million, an increase of 2.4 million students (table 216.30). During this period, the percentage of public elementary and secondary school children who were in charter schools increased from 0.7 percent to 5.4 percent. In addition, there has been an increase in the number and percentage of 5- to 17 -year-olds who are homeschooled (tables 206.10 and 206.20). About 1.8 million children were homeschooled in 2012, compared to 0.9 million in 1999. ${ }^{3}$ Also, the percentage of 5- to 17 -year-olds who were homeschooled in 2012 ( 3.4 percent) was higher than in 1999 (1.7 percent).

Charter schools are the typical form of choice available to parents within the public education sector; however, some opportunity for parental choice also can be found among traditional public schools. In 2012, the parents of 37 percent of all 1st- through 12th-grade students indicated that public school choice was available to them (table 206.40). Also in 2012, 14 percent of the students in grades 1 through 12 were enrolled in public schools chosen by their families. Some 77 percent of students attended an assigned public school and 8 percent attended a private school (table 206.30). There were differences by some characteristics in the percentages of students who attended public schools chosen by their parents and private schools in 2012. For example, the percentage of students attending chosen public schools was higher for Black students (21 percent) and Hispanic students (17 percent) than for White students (11 percent). In contrast, the percentage attending private schools was higher for White students ( 9 percent) than for Black or Hispanic students (both 5 percent). There were no measurable differences in the percentage of students in chosen public schools by different levels of parental educational attainment (ranging from 13 to 15 percent). In contrast, the percentage of students attending private schools was higher for students whose parents had a bachelor's degree (12 percent) or graduate degree ( 15 percent) than for students whose parents had less than a high school diploma ( 3 percent), only a high school diploma (4 percent), or only some college or a vocational degree ( 5 percent). The percentage of students attending public chosen schools was higher for students living in cities ( 22 percent) than for students in suburban areas (13 percent), towns ( 9 percent), and rural areas ( 9 percent).

Compared with students in assigned public schools, a higher percentage of students in chosen public schools had parents who were very satisfied with some elements of their children's education in 2012 (table 206.50). Among students in grades 3 through 12, the percentage of students whose

[^15]parents were very satisfied with their school was higher for students in chosen schools ( 56 percent) than for students in assigned schools ( 52 percent). Similarly, the percentage of students whose parents were very satisfied with their school's academic standards was higher for students in chosen schools ( 59 percent) than for students in assigned schools ( 53 percent). Also, higher percentages of students in chosen schools had parents who were very satisfied with school order and discipline ( 58 vs. 52 percent) as well as with staff interaction with parents ( 49 vs. 45 percent). However, there was no measurable difference between the percentages of students in chosen and assigned public schools whose parents were highly satisfied with the teachers in their school ( 52 percent each).

## High School Graduates and Dropouts

About $3,568,000$ high school students are expected to graduate during the 2016-17 school year (table 219.10), including 3,254,000 public school graduates and 315,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2016-17 projection of high school graduates is higher than the prior record high of $3,539,000$ graduates for 2015-16, and also exceeds the baby boom era's high point in 1975-76, when 3,142,000 students earned diplomas. In 2014-15, about 83 percent of public high school students graduated with a regular diploma within 4 years of first starting 9th grade (table 219.46). This rate is known as the 4 -year adjusted cohort graduation rate (ACGR).

The number of GED credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service. ${ }^{4}$ In 2013, some 541,000 people passed the GED tests, up from 387,000 in 2003.

The percentage of dropouts among 16- to 24 -year-olds (known as the status dropout rate) has decreased over the past two decades (table 219.70). The status dropout rate is the percentage of the civilian noninstitutionalized 16- to 24-year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.)

[^16]Between 1990 and 2015, the status dropout rate declined from 12.1 to 5.9 percent. Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates in 2015 ( 6.5 and 9.2 percent, respectively) remained higher than the rate for Whites ( 4.6 percent).

## Achievement

Most of the student performance data in the Digest are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP (which includes the Trial Urban District Assessment), and national long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4,8 , and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. For mathematics, reading, science, and writing assessments since 2002, a combined sample of public schools has been selected for 4th- and 8thgrade national NAEP and state NAEP (including the Trial Urban District Assessment).

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance in reading and mathematics at ages 9,13, and 17. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

The following paragraphs discuss results for the national main NAEP, state NAEP, and long-term trend NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the Digest) are based on statistical testing of unrounded values.

## Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500 . In 2015, the average reading score for 4thgrade students (223) was not measurably different from the 2013 score, but it was higher than the 1992 score (217) (table 221.10). At grade 4 , the average 2015 reading scores for White (232), Black (206), Hispanic (208), and Asian/Pacific Islander students (239) were not measurably different from the corresponding scores in 2013, but their average scores were all higher than in 1992. For 8th-grade students, the average reading score in 2015 (265) was lower than in 2013 (268), but it was higher than in 1992 (260). At grade 8, average 2015 reading scores for White (274), Black (248), and Hispanic (253) students were lower than the scores in 2013 (276, 250, and 256 , respectively), while the average 2015 reading score for Asian/Pacific Islander students (280) was not measurably different from the score in 2013. Consistent with the findings at grade 4 , the average reading scores for White, Black, Hispanic, and Asian/Pacific Islander 8th-grade students were higher in 2015 than in 1992. For 12th-grade students, the average reading score in 2015 was not measurably different from that in 2013. At grade 12, the average 2015 reading scores for White (295), Hispanic (276), and Asian/Pacific Islander students (297) were not measurably different from the scores in 2013 and 1992. For Black students, the 2015 average score (266) was lower than the 1992 score (273) but was not measurably different from the 2013 score.

From 1992 through 2015, the average reading scores for White 4th- and 8th-graders were higher than those of their Black and Hispanic peers (table 221.10). Although the WhiteBlack and White-Hispanic achievement gaps did not change measurably from 2013 to 2015 at either grade 4 or 8 , some of the racial/ethnic achievement gaps have narrowed since 1992. At grade 4, the White-Black gap narrowed from 32 points in 1992 to 26 points in 2015; at grade 8 , the White-Hispanic gap narrowed from 26 points in 1992 to 21 points in 2015.

While there was no measurable change from 2013 to 2015 in the average reading score for 4th-grade public school students nationally, average scores were higher in 2015 than in 2013 in the District of Columbia and 12 states (table 221.40). Average 4th-grade scores were lower in 2015 than in 2013 in Maryland and Minnesota, while scores in all remaining states did not change measurably from 2013 to 2015. The average reading score for 8th-grade public school students was lower in 2015 than in 2013 nationally and in 8 states (table 221.60). However, 8th-grade students in West Virginia scored higher in 2015 than in 2013. In the remaining states and the District of Columbia, scores did not change measurably from 2013 to 2015.

Reported on a scale of 0 to 500, NAEP long-term trend results in reading are available for 13 assessment years going back to the first in 1971. The average reading score for 9 -yearolds was higher in 2012 (221) than in assessment years prior to 2008 , increasing 5 points since 2004 and 13 points in comparison to 1971 (table 221.85). The average score for 13-yearolds in 2012 (263) was higher than in all previous assessment years except for 1992. The average reading score for 17-year-
olds was higher in 2012 (287) than in 2004 (283), but was not significantly different from the score in 1971 (285).

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average reading scores in 2012 than they did in the first assessment year (which is 1975 for Hispanic students because separate data for Hispanics were not collected in 1971). Average reading scores were higher in 2012 than in 2004 for White, Black, and Hispanic students at all three ages (table 221.85). Reading results for 2012 continued to show gaps in scores between White and Black students (ranging from 23 to 26 points, depending on age) and between White and Hispanic students (about 21 points at all three ages). The White-Black and White-Hispanic reading gaps were smaller in 2012 than in the first assessment year at all three ages. For example, the White-Black reading gap for 17-year-olds was 53 points in 1971 compared with 26 points in 2012. Similarly, the White-Hispanic reading gap for 17-year-olds narrowed from 41 points in 1975 to 21 points in 2012.

In 2012, female 9-, 13-, and 17-year-old students continued to have higher average reading scores than male students at all three ages (table 221.85). The gap between male and female 9 -year-olds was 5 points in 2012; this was narrower than the gap in 1971 (13 points). The 8-point gender gap for 13-year-olds in 2012 was not significantly different from the gap in 1971. At age 17, the 8-point gap between males and females in 2012 was not significantly different from the gap in 1971.

## Mathematics

The main NAEP mathematics assessment data for 4th- and 8th-graders are reported on a scale of 0 to 500 (table 222.10). The average 4th-grade mathematics score in 2015 (240) was lower than the score in 2013 (242), although it was higher than the score in 1990 (213). At grade 4, the average mathematics score in 2015 for White students (248) was lower than the score in 2013 (250), while the average scores in 2015 for Black (224), Hispanic (230), and Asian/Pacific Islander students (257) were not measurably different from the corresponding 2013 scores. However, the 4th-grade average scores for White, Black, Hispanic, and Asian/Pacific Islander students were all higher in 2015 than in 1990. The average 8thgrade mathematics score in 2015 (282) was lower than the score in 2013 (285), although it was higher than the score in 1990 (263). At grade 8, the average scores for White (292), Black (260), and Hispanic students (270) were lower in 2015 than in 2013 (294, 263, and 272, respectively). The 2015 average score for Asian/Pacific Islander students (306) was not measurably different from the score in 2013. However, the average scores for 8th-grade White, Black, Hispanic, and Asian/Pacific Islander students were all higher in 2015 than in 1990. Due to changes in the 12th-grade mathematics assessment framework, a new trend line started in 2005, with scores reported on a scale of 0 to 300 . The average 12th-grade mathematics score in 2015 (152) was lower than the score in 2013 (153), but not measurably different from the score in 2005, the first year the revised assessment was administered.

From 1990 through 2015, the average mathematics scores for White students in grades 4 and 8 were higher than those of their Black and Hispanic peers. However, the White-Black achievement gap at grade 4 narrowed from 32 points in 1990 to 24 points in 2015 . The gap of 24 points in 2015 also represented a decrease from the 4th-grade White-Black achievement gap in 2013 ( 26 points), which was due to a decrease in White 4th-graders' scores from 2013 to 2015. The 4th-grade White-Hispanic achievement gap in 2015 (18 points) was not measurably different from the gap in 2013. In 2015, the 8thgrade White-Black achievement gap ( 32 points) and WhiteHispanic achievement gap ( 22 points) were not measurably different from the corresponding gaps in 2013.

The average mathematics score for 4th-grade public school students across the nation was lower in 2015 (240) than in 2013 (241) (table 222.50). Average 4th-grade mathematics scores for public school students were also lower in 2015 than in 2013 in 16 states. However, the average mathematics scores for 4th-grade students in Mississippi and the District of Columbia were higher in 2015 than in 2013. Scores were not measurably different in the other states during this period. The national public school average mathematics score for 8thgrade students was lower in 2015 (281) than in 2013 (284) (table 222.60). Similarly, 22 states had lower 8th-grade average scores in 2015 than in 2013, while scores for the remaining 28 states and the District of Columbia were not measurably different between 2013 and 2015. During this time, no state experienced a score increase at the 8th-grade level.

NAEP long-term trend mathematics results, reported on a scale of 0 to 500 , are available for 12 assessment years, going back to the first in 1973. In 2012, the average mathematics score for 9 -year-olds (244) was higher than in all previous assessment years prior to 2008 (table 222.85). The average score for 9 -year-olds in 2012 was 5 points higher than in 2004 and 25 points higher than in 1973. The average mathematics score for 13-year-olds in 2012 (285) was higher than in all previous assessment years. For 13-yearolds, the average score in 2012 was 6 points higher than in 2004 and 19 points higher than in 1973. In contrast, the average score for 17 -year-olds in 2012 (306) was not significantly different from the scores in 2004 and 1973.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average mathematics scores in 2012 than in 1973 (table 222.85). In comparison to 2004, average mathematics scores were higher in 2012 for White 9- and 13-year-olds; Hispanic 13-year-olds; and Black 13-year-olds. Mathematics results for 2012 continued to show score gaps between White and Hispanic students (ranging from 17 to 21 points [based on unrounded scores], depending on age) and between White and Black students (ranging from 25 to 28 points). For 9 -yearolds, the White-Black gap in mathematics scores was lower in 2012 than in 1973. For 13- and 17-year-olds, both the WhiteBlack and the White-Hispanic gaps in mathematics scores were lower in 2012 than in 1973. For example, among 17-year-olds, the White-Black gap was 40 points in 1973 compared to 26 points in 2012, and the White-Hispanic gap was 33 points in 1973 compared to 19 points in 2012.

While there was no significant difference between the average mathematics scores of male and female 9 - and 13-yearolds in 2012, male students did score higher than female students at age 17 (table 222.85). At age 17, the 4-point gender score gap in 2012 was smaller than the gap in 1973 ( 8 points).

## Science

NAEP has assessed the science abilities of students in grades 4,8 , and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. Scores are based on a scale ranging from 0 to 300 (table 223.10). In 2015, the average 4th-grade science score (154) was higher than the score in 2009 (150). The average 8th-grade science score in 2015 (154) was higher than the scores in both 2009 (150) and 2011 (152). The average 12th-grade science score in 2015 (150) was not measurably different from the score in 2009. In addition, the 5-point gender gap between male and female 12th-graders in 2015 was not measurably different from the gap in 2009. While the average science scores for White 4th- and 8th-grade students remained higher than those of their Black and Hispanic peers in 2015, racial/ethnic achievement gaps in 2015 were smaller than in 2009. At grade 4, the White-Black achievement gap was 36 points in 2009 and 33 points in 2015, and the White-Hispanic achievement gap was 32 points in 2009 and 27 points in 2015 . While the average science scores for White 12th-grade students remained higher than those of their Black and Hispanic peers in 2015, these racial/ethnic achievement gaps did not measurably change between 2009 and 2015.

## Skills of Young Children

In addition to student performance data available through NAEP, the Digest presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of cognitive skills have been demonstrated at relatively early ages in the Early Childhood Longitudinal Survey's Birth Cohort (ECLS-B) study as well as its Kindergarten Class (ECLS-K) studies.

In 2003-04, about 64 percent of 2-year-olds demonstrated proficiency in expressive vocabulary, which measured toddlers' ability to communicate using gestures, words, and sentences (web-only table 220.20). The percentage of 2-yearolds demonstrating expressive vocabulary was higher for females ( 69 percent) than for males ( 59 percent). Also, a higher percentage of White ( 71 percent) and Asian (62 percent) 2-year-olds demonstrated expressive vocabulary than of Black, Hispanic, or American Indian/Alaska Native 2-yearolds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families who did so ( 52 percent).

Patterns of differences were also observed by race/ethnicity and SES for children at about 4 years of age ( 48 to 57 months old). In 2005-06, average early reading scores were higher for White (27) and Asian (31) 48- to 57-month-old children than for Black (23), Hispanic (21), and American Indian/Alaska Native (20) children (table 220.30). Also, high-SES children (33) had higher average early reading scores than low-SES children (19) at this age. These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores. White (32) and Asian (35) 48- to 57-month-old children had higher mathematics scores than Black (27), Hispanic (26), and American Indian/Alaska Native children (23). High-SES 48- to 57-month-old children (36) had higher average mathematics scores than low-SES children (24).

Children who enrolled in kindergarten for the first time in 2010-11 showed similar patterns of score differences by race/ethnicity and SES (tables 220.40 and 220.41). In fall 2010, average mathematics scores were higher for first-time kindergartners from high-SES families (41) than for those from low-SES families (27). White (37) and Asian (39) first-time kindergartners had higher mathematics scores than their Black (31), Hispanic (30), and American Indian/ Alaska Native (32) counterparts. Similarly, reading scores in fall 2010 were higher for White (54) and Asian (57) firsttime kindergartners than for their Black (51), Hispanic (48), and American Indian/Alaska Native (49) counterparts. High-SES children (59) had higher average early reading scores than low-SES children (46). These same patterns were observed among these children during 1st grade in spring 2012. White (76) and Asian (76) 1st-graders had higher mathematics scores than their Black (64), Hispanic (65), and American Indian/Alaska Native (72) counterparts. Average mathematics scores were higher for 1st-graders from high-SES families (81) than for those from low-SES families (62). Average reading scores were also higher for White (94) and Asian (95) 1st-graders than for their Black (87), Hispanic (85), and American Indian/Alaska Native (90) counterparts; and 1st-graders from high-SES families (99) had higher average reading scores than those from lowSES families (81).

## SAT Scores of College-Bound Seniors

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Possible scores on each section of the SAT range from 200 to 800 . Between 1998-99 and 2004-05, the mathematics SAT average score increased by 9 points, but it decreased by 12 points between 2004-05 (520) and 2015-16 (508) (table 226.20). The critical reading average score decreased by 14 points between 2004-05 (508) and 2015-16 (494). Between 2005-06 (the year in which the SAT writing section was introduced) and

2015-16, the writing average score decreased by 15 points (from 497 to 482).

## Coursetaking in High School

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2009. The average number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.9 in 2009, and the number of science courses rose from 2.2 to 3.5 (table 225.10). The average number of courses in career/technical areas completed by public high school graduates was lower in 2009 ( 2.5 units) than in 2000 ( 2.9 units). As a result of the increased academic course load, the percentage of public and private high school graduates completing the 1983 National Commission on Excellence recommendations (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, and 2 units of foreign language) rose from 10 percent in 1982 to 62 percent in 2009 (web-only table 225.50).

## School Violence

In 2013-14, some 65 percent of public schools reported one or more violent incidents, such as a serious violent incident, a physical attack, or a threat of a physical attack (table 229.10). This 2013-14 percentage was lower than the 71 percent of schools reporting violent incidents in 1999-2000. Serious violent victimization is a subcategory of violent victimization that includes the crimes of rape, sexual assault, robbery, and aggravated assault. The percentage of public schools reporting a serious violent crime in 2013-14 (13 percent) was lower than the percentage reporting a serious violent crime in 1999-2000 ( 20 percent). In addition, the percentage of public schools reporting an incident of a physical attack or a fight without a weapon in 2013-14 (58 percent) was lower than in 1999-2000 (64 percent). Also, the percentage of schools reporting an incident of a threat of a physical attack in 2013-14 (47 percent) was lower than in 1999-2000 (52 percent). Overall, public schools reported 15 violent incidents per 1,000 students in 2013-14, which was lower than the 31 violent incidents per 1,000 students reported in 1999-2000 (table 229.20).

On the National Crime Victimization Survey, students ages 12 to 18 reported a decrease in victimizations at school between 1992 and 2015 (table 228.20). The total victimization rates for students ages 12 to 18 declined 82 percent, from 181 victimizations per 1,000 students in 1992 to 33 victimizations per 1,000 students in 2015. This pattern of decline in total victimization rates between 1992 and 2015 also held for thefts, violent victimizations, and serious violent victimizations. Thefts at school declined from a rate of 114 per 1,000 students to 12 per 1,000 . The rate of violent victimization at school declined overall from 68 victimizations per 1,000 students in 1992 to 21 per 1,000 in 2015. Serious violent victimizations at school declined from 8 per 1,000 students in 1992 to 4 per 1,000 in 2015.

## Revenues and Expenditures

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 235.10 and figure 10). ${ }^{5}$ However, this pattern changed in the late 1980s, when the local share began to increase at the same time that the state share decreased. Between 1986-87 and 1993-94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993-94 and 2000-01, the state share rose again to 49.7 per-cent-the highest share since 1986-87-but declined every school year thereafter until 2005-06, when the state share was 46.5 percent. In more recent years, the federal share in 2013-14 (8.7 percent) was lower than in 2003-04 (9.1 per-

[^17]cent). Also, the state share in 2013-14 (46.2 percent) was lower than in 2003-04 (47.1 percent). In contrast, the local share in 2013-14 (45.0 percent) was higher than in 2003-04 (43.9 percent).

After adjustment for inflation, current expenditures per student in fall enrollment at public schools rose during the 1980s, but remained stable during the first part of the 1990s (table 236.55 and figure 11). There was an increase of 37 percent from 1980-81 to 1990-91, followed by minor fluctuations from 1990-91 to 1994-95. Current expenditures per student increased 34 percent from 1994-95 to 2008-09, but declined 4 percent from 2008-09 to 2013-14. In 2013-14, current expenditures per student in fall enrollment were $\$ 11,066$ in unadjusted dollars. The expenditure for public school student transportation was $\$ 933$ per student transported in 2013-14 (also in unadjusted dollars), and 55 percent of students were transported at public expense in 2007-08 (table 236.90).

## -Not available.

Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909-10 to 1959-60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.
${ }^{2}$ Data for 1869-70 through 1959-60 are school year enrollment. Data for later years are fall enrollment. Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports.
${ }^{3}$ Data for 1870-71.
${ }^{5}$ Prior to 1919-20, data are for the number of different persons employed rather than number of positions.
${ }^{6}$ Prior to 1919-20, includes interest on school debt.
${ }^{7}$ Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959-60 and later years are not entirely comparable with prior years.
Beginning in 1969-70, includes capital outlay by state and local school building authorities.
Includes summer schools, community colleges, and adult education. Beginning in 1959-60, also includes community services,
${ }^{10}$ Excludes community colleges and adult education.
${ }^{11}$ Prior to 1959-60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959-60 and later years are estimated by the National Education Association.
${ }^{12}$ Excludes current expenditures not allocable to pupil costs.
${ }^{13}$ "ADA" means average daily attendance in elementary and secondary schools.
${ }^{14}$ Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt ${ }^{16} \mathrm{Cer-day}$ rates derived by dividing annual rates by average length of term.
Constant doliars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor adjusted to a school-year basis.
NOTE: Some data have been revised from previously published figures. Beginning in 1959-60, data include Alaska and Hawaii Detail may not sum to totals because of rounding.

${ }^{1}$ Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures or earlier years.
${ }^{2}$ Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
${ }^{\circ}$ Enrollment data for 5 -year-olds include only those students in preprimary programs and do not include those enrolled in primary programs.

NOTE: Preprimary programs include kindergarten and preschool (or nursery school) programs. "Preschool," which was referred to as "nursery school" in previous versions of this table, is defined as a group or class that is organized to provide educational experiences for children during the year or years preceding kindergarten. Data are based on sample surveys of ons or nursing facilities). Detail may not sum to totals because of rounding
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2015. (This table was prepared October 2016.)

Table 202.20. Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by level of program, attendance status, and selected child and family characteristics: 2015
[Standard errors appear in parentheses]

Table 202.30. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2012
[Standard errors appear in parentheses]

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
${ }^{1}$ A child's primary arrangement is the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week.
${ }^{2}$ Center-based arrangements include day care centers, Head Start programs, preschools, prekindergartens, and other early childhood programs.
${ }^{3}$ Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.
${ }^{4}$ Children who spent an equal number of hours per week in multiple nonparental care arrangements.
${ }^{5}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family
incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
Includes persons of all other races and Two or more races.
${ }^{7}$ Excludes children living apart from their parents.
${ }^{8}$ Excludes children living in households with no mother or female guardian present.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
${ }^{1}$ Includes persons of all other races and Two or more races.
${ }^{2}$ The total percentage of children who participated in nonparental arrangements. Counts each child only once, even if the child participated in more than one type of nonparental care.
${ }^{3}$ Center-based programs include day care centers, nursery schools, prekindergartens, preschools, and Head Start programs.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-
administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

## $\dagger$ Not applicable.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ The type of nonparental care in which the child spent the most hours. Multiple arrangements refers to children who spent an equal amount of time in each of two or more types of arrangements.
${ }^{2}$ Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force ${ }^{3}$ Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
${ }^{4}$ Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition.

For example, a family of three with one child was below the poverty threshold if its annual income was less than \$17,552 in 2010.
${ }^{5}$ Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.
NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.

## to zero

${ }^{1}$ Excludes children living in households with no mother or female guardian present.
${ }^{2}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: Enrollment data include homeschooled students and ungraded students if a grade equivalent was available. For 2001 and 2005, excludes students for whom no grade equivalent was available. For 2012, all students had a known grade level and via telephone with an interviewer, NHES-2012 used self-administered (NHES) administrations prior to 2012 were adminnitered respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Detail may not sum to totals because of rounding. vey, Before- and After-School Programs and Activities Survey, and Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (ECPP-NHES:2001, 2005, and 2012; ASPA-NHES:2001 and 2005; and PFINHES:2012). (This table was prepared October 2014.)

${ }^{1}$ Includes students reported as being enrolled in grade 13.
NOTE: Due to changes in reporting and imputation practices, prekindergarten enrollment for years prior to 1992 represent an undercount compared to later years. The total ungraded counts of students were prorated to the elementary and secondary levels based on prior reports. Detail may not sum to totals because of rounding.

NOTE: DoD = Department of Defense. The total ungraded counts of students were prorated to the elementary level (prekindergarten through grade 8 ) and the secondary level (grades 9 through 12 ) based on prior reports. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1990-91 through 2014-15; and State Public Elementary and Secondary Enroliment Projection Model, 1980 through 2026. (This table was prepared November 2016.)

## -Not available.

$\dagger$ Not applicable.
${ }^{1}$ For this year, data on students of Two or more races were reported by only a small number of
states. Therefore, the data are not comparable to figures for 2010 and later years.
2Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not
reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008,
data on students of Two or more races were not collected. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 1995-96 through 2014-15; and National Elementary and Secondary Enrollment by Race/Ethnicity Projection Model, 1972 through 2026. (This table was prepared November 2016.)

Table 203.60. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2026

## -Not available.

$\dagger$ Not applicable.
${ }^{1}$ For this year, data on students of Two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.
${ }^{2}$ Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008, data on students of Two or more races were not collected. Total counts of
ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

## -Not available. <br> \#Rounds to zero.

NOTE: Percentage distribution based on students for whom race/ethnicity was reported, which may be less than the total number of students in the state. U.S. totals for 2004 include imputed data for Nevada. Race categories exclude persons of Hispanic ethnicity. DoD = Department of Defense. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2004-05 and 2014-15. (This table was prepared November 2016.)

Table 203.75. Enrollment and percentage distribution of enrollment in public schools, by family poverty rate of 5 - to 17-year-olds living in the school district, student race/ethnicity, region, and school locale: 2013-14

| Student race/ethnicity, region, and school locale | Enrollment in public schools |  |  |  |  | Percentage distribution of enrollment |  |  |  |  |

${ }^{1}$ A family is in poverty if its income falls below the Census Bureau's poverty threshold, which is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2013, for example, the poverty threshold for a family of four with two children was $\$ 23,624$. The family poverty rate of 5 - to 17 -year-olds is the percentage of children in this age group whose families are in poverty. Includes only children classified as "related" and "relevant" (see footnote 2).
${ }^{2}$ Includes only those children who live in households and meet both of the following conditions: (1) The children are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. (2) The children are relevant to the school district. Children are relevant if they reside within the geographical boundaries of the district and are at a grade level served by the district, even if they do not attend a school in the district.
NOTE: School enrollment data were obtained from the Common Core of Data and poverty rate data were obtained from the Census Bureau. To create the school district categories, public
school districts were ranked and divided into quarters based on the family poverty rate of their 5 - to 17 -year-old population; the cut points between the four quarters were chosen so that, at the national level, each quarter contains approximately the same number of students. For the approximately 3 percent of public school students who attended charter or other special districts, no data were available on their school district's family poverty rate. The rate for their district was imputed to be the same as the rate for the regular public school district within which their charter or other special district was geographically located. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

-Not available.
${ }^{1}$ Data for California for 1989-90 and earlier years are not strictly comparable with those for other states because California's attendance figures included excused absences.
${ }^{2}$ Excludes average daily attendance for regional occupational programs and summe school programs that were reported in prior years.

NOTE: Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1969-70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979-80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989-90 through 2013-14. (This table was prepared July 2016.)

Table 203.90. Average daily attendance (ADA) as a percentage of total enrollment, school day length, and school year length in public schools, by school level and state: 2007-08 and 2011-12
[Standard errors appear in parentheses]

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met. Either the response rate is under 50 percent or there are too few cases for a reliable estimate.
NOTE: Averages reflect data reported by schools rather than state requirements. Schoolreported length of day may exceed state requirements, and there is a range of statistical error in reported estimates.

## IU.S. total includes imputation for nonreporting states.

${ }^{2}$ Imputation for survey nonresponse. State-level imputations for 2000-01 were based on
the reported percentages for 2001-02 applied to the 2000-01 enrollments.
NOTE: Table reflects counts of students enrolled in all schools for which both enrollment data and free/reduced-price lunch eligibility data were reported.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2000-01, 2010-11, 2013-14, and 2014-15. (This table was prepared March 2017.)

${ }^{1}$ U.S. total includes imputation for nonreporting states.
${ }^{2}$ Imputation for survey nonresponse. State-level imputations were based on the percentages reported by the state for other years applied to the enrollment for the given year.
${ }^{3}$ Based on data reported by the California Education Agency (http://www.cde.ca.gov/ds/sd/ cb/cefelfacts.asp).
${ }^{4}$ For 2013, New York data on participation in programs for English language learners are
from U.S. Department of Education, National Center for Education Statistics, EDFacts file 046, Data Group 123, extracted December 2, 2015, from the EDFacts Data Warehouse (internal U.S. Department of Education source). service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2004-05 through 2014-15. (This table was prepared September 2016.)

Table 204.27. English language learner (ELL) students enrolled in public elementary and secondary schools, by grade, home language, and selected student characteristics: Selected years, 2008-09 through fall 2014

Table 204.27. English language learner (ELL) students enrolled in public elementary and secondary schools, by grade, home language, and selected student characteristics: Selected years, 2008-09 through fall 2014-Continued

- Not available.

IIncludes data for California that reflect ELL students enrolled on a single date, rather than a cumulative count of all ELL students enrolled at any time during the school year.
2Data include only ELL students enrolled on October 1
${ }^{3}$ Ranking of the 30 mes
${ }^{3}$ Ranking of the 30 most commonly reported home languages is based on fall 2014 data. In each year shown, home language data were unavailable for approximately $92,000-133,000$ students identified as English language learners. Enrollments of children speaking less common languages are not separately listed.

English learner's home language include students who live in ds and students adopted from other countries who speak English at home but also have been raised speaking another language.

Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA). NOTE: Includes all students identified as English language learners-both those participating in ELL programs and those not participating in ELL programs. Except where otherwise noted, data include all ELL students enrolled at any time during the school year. Data exclude Puerto Rico and the Bureau of Indian Education. Detail may not sum to totals because grade levels were not reported for some students and because of rounding. 2010-11 not shown due to missing data.
SOURCE: U.S. Department of Education, National Center for Education Statistics, EDFacts file 141, Data Group 678, extracted August 24, 2016, from the EDFacts Data Warehouse (internal U.S. Department of Education source); Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 2008-09 through 2014-15. (This table was prepared August 2016.)

\#Rounds to zero.
${ }^{1}$ Data do not include Vermont, for which 2007-08 and 2008-09 data were not available. In 2006-07, the total number of 3 - to 21 -year-olds served in Vermont was 14,010.
${ }^{2}$ Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.
${ }^{3}$ For 1990-91, preschool children are not included in the counts by disability condition but are separately reported. For other years, preschool children are included in the counts by disability condition.
${ }^{4}$ Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.20.
NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities

Education Act (IDEA), Part B. Data reported in this table for years prior to 1994-95 include children ages 0-21 served under Chapter 1. Data are for the 50 states and the District of Columbia only. Increases since 1987-88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3 - to 5 -year-old children with disabilities. Detail may not sum to totals because of rounding.

## —Not available.

${ }^{1}$ For years prior to 2010-11, Asian data include Pacific Islanders
${ }^{2}$ Data do not include Vermont, for which 2007-08 and 2008-09 data were not available. ${ }^{3}$ For 2008-09 and 2009-10, data on children of Two or more races were reported by only a small number of states. Therefore, these data are not comparable to figures for later years ${ }^{4}$ For 2012-13, 2013-14, and 2014-15, the total column shows the overall counts of children as reported by the 50 states and the District of Columbia rather than the sum of counts reported for individual racial/ethnic groups. (Due to data limitations, summing the data for the racial/ethnic groups can result in overcounts. For 2014-15, summing these data would result in a total overcount of 3 children in the 3- to 5 -year-old age group and 139 children in the 6 - to 21 -year-old age group.)
${ }^{5}$ Based on the total enrollment in public schools, prekindergarten through 12th grade, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.60 NOTE: Data include only those children served for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

## -Not available. <br> \#Rounds to zero.

${ }^{1}$ Totals are based on overall counts of children by type of disability; they are not based on summing the counts reported for the individual racial/ethnic groups or the counts reported by sex. (Due to data limitations, summing the counts by disability type within each racial/ethnic group would result in a total overcount of 172 children. Because of missing data on type of disability by sex, summing the counts by disability type for males and females would result in undercounts.)
${ }^{2}$ For 3- to 5 -year-olds, no data are available on type of disability by sex. For 6- to 21-year-olds, data include only those children served for whom both sex and type of disability were reported. About 1 percent of all 6 - to 21 -year-olds served are excluded from this table because of missing data.
${ }^{3}$ Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.
${ }^{4}$ Percentages for students 3 to 5 years old by sex are based on total public school enrollment in prekindergarten and kindergarten by sex. Percentages for students 6 to 21 years old by sex are based on total public school enrollment in grades 1 through 12 by sex. Percentages for students of all ages ( 3 to 21 years old) by race/ethnicity are based on total enrollment in public schools, prekindergarten through grade 12, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.50 .
NOTE: Although data are for the 50 states and the District of Columbia, data limitations result in inclusion of a small (but unknown) number of students from other jurisdictions. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, Office of Special Education Programs, Individuals with Disabilities Education Act (IDEA) database, retrieved September 25, 2016, from http:// www2.ed.gov/programs/osepidea/618-data/state-level-data-files/index.html\#bcc; and National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2014-15. (This table was prepared October 2016.)

Table 204.60. Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2014

## -Not available

${ }^{1}$ The decrease in homeless students in 2014-15 was caused in part by changes to California's data collection systems. For more information, see section 1.9.1.1 of California's 2014-15 Consolidated State Performance Report, available at https://www2.ed.gov/admins/lead/account/ consolidated/sy14-15part1/ca.pdf.
${ }^{2}$ The sum of counts by grade.
${ }^{3}$ Homeless children 3 to 5 years old who are not in kindergarten.
${ }^{4}$ Includes students reported as being enrolled in grade 13.
${ }^{5}$ Does not sum to the total number of homeless students because of missing data on primary nighttime residence. (Counts by primary nighttime residence differ from those shown in the total row by less than 2 percent for 2012-13 and less than 1 percent for all other years.)
${ }^{6}$ Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).
${ }^{7}$ Includes living in cars, parks, campgrounds, temporary trailers-including Federal Emergency Management Agency (FEMA) trailers-or abandoned buildings.
${ }^{8}$ Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.
${ }^{9}$ Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see http://www2.ed.gov/about/inits/ed/edfacts/ eden-workbook.html.
${ }^{10}$ Students who met the definition of eligible migrant children as outlined in the EDFacts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see http://www2.ed.gov/about/inits/ed/edfacts/ eden-workbook.html. Connecticut, the District of Columbia, Rhode Island, and West Virginia did not operate a migrant education program during the 2012-13, 2013-14, and 2014-15 school years and therefore had no data to provide on migrant homeless students.
${ }^{11}$ Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).
NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118 - Homeless Students Enrolled" at https://www2.ed.gov/about/inits/ed/edfacts/sy-14-15-nonxml.html. Data include all homeless students enrolled at any time during the school year. Data exclude Puerto Rico and the Bureau of Indian Education. This table is based on state-level data.

| Students with disabilities ${ }^{8}$.......................................................... | 17.5 | 17.5 | 17.0 | 17.9 | 18.8 |

${ }^{1}$ Represents the sum of counts by grade.
${ }^{2}$ Does not sum to the total number of homeless students because of missing data on primary nighttime residence. (These data are missing for less than 1 percent of homeless students.) ${ }^{3}$ Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).
${ }^{4}$ Includes living in cars, parks, campgrounds, temporary trailers-including Federal Emergency Management Agency (FEMA) trailers-or abandoned buildings.
${ }^{5}$ Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.
${ }^{6}$ Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see http://www2.ed.gov/about/inits/ed/edfacts/ eden-workbook.html
${ }^{7}$ Students who met the definition of eligible migrant children as outlined in the EDFacts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see http://www2.ed.gov/about/inits/ed/edfacts/
eden-workbook.html. Connecticut, the District of Columbia, Rhode Island, and West Virginia did not operate a migrant education program during the 2014-15 school year and therefore had no data to provide on migrant homeless students.
${ }^{8}$ Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA)
NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118-Homeless Students Enrolled" at https://www2.ed.gov/about/inits/ed/edfacts/sy-14-15-nonxml.html. Data include all homeless students enrolled at any time during the school year. Data exclude Puerto Rico and the Bureau of Indian Education. Detail may not sum to totals because of rounding and missing data on primary nighttime residence. Because this table is based on data reported at the school district level, counts and percentages of homeless students may differ from those shown in tables based on state-level data.

## -Not available.

${ }^{1}$ Represents the sum of counts by grade.
${ }^{2}$ Total percentages for the United States were computed based on total public school enrollment in the 50 states and the District of Columbia.
${ }^{3}$ California's 2014-15 homeless count decreased in part because of changes to the state's data collection systems. For more information, see section 1.9.1.1 of California's 2014-15 Consolidated State Performance Report, available at https://www2.ed.gov/admins/lead/account/ consolidated/sy14-15part1/ca.pdf.

NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118 - Homeless Students Enrolled" at https://www2.ed.gov/about/inits/ed/edfacts/sy-14-15-nonxml.html. Data are reported at the state level and include all homeless students enrolled at any time during the school year. SOURCE: U.S. Department of Education, National Center for Education Statistics, EDFacts file 118, Data Group 655, extracted October 14, 2016, from the EDFacts Data Warehouse (internal U.S. Department of Education Source); and Common Core of Data (CCD), "State Nontiscal Survey of Public Elementary and Secondary Education," 2009-10 through 2014-15. (This table was prepared March 2017.)

Table 204.75d. Number and percentage of homeless students enrolled in public elementary and secondary schools, by primary nighttime residence, selected student characteristics, and state or jurisdiction: 2014-15

[^25]cultural or fishing work. For more information, see http://www2.ed.gov/about/inits/ed/edfacts/ eden-workbook.html.
Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).
${ }^{9}$ California's 2014-15 homeless count decreased from previous years in part because of changes to the state's data collection systems. For more information, see section 1.9.1.1 of Calfornia's 2014-15 Consolidated State Performance Report, available at https://www2.ed.gov/ admins/lead/account/consolidated/sy14-15part1/ca.pdf.
${ }^{10}$ Did not operate a migrant education program during the 2014-15 school year and therefore had no data to provide on migrant homeless students.
NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118-Homeless Students Enrolled" at https://www2.ed.gov/about/inits/ed/edfacts/sy-14-15-nonxml.html. Data are reported at the state level and include all homeless students enrolled at any time during the school year. SOURCE: U.S. Department of Education, National Center for Education Statistics, EDFacts file 118, Data Group 655, extracted October 14, 2016, from the EDFacts Data Warehouse (internal U.S. Department of Education Source); and Common Core of Data (CCD), State Nonfiscal Survey of Public Elementary and Secondary Education, 2014-15. (This table was prepared March 2017.)

- Not available.
$\ddagger$ Reporting standards not met (too few cases)
For the six districts indicated, the counts by primary nighttime residence do not sum to the total number of homeless students because of missing data on primary nighttime residence. (For each affected district, these data are missing for about 1 percent or less of homeless students.)
${ }^{3}$ Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).
${ }^{4}$ Includes living in cars, parks, campgrounds, temporary trailers-including Federal Emergency Management Agency (FEMA) trailers-or abandoned buildings.
Yauth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a ${ }^{6}$ Students who met the definition of limite tion, see http://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html.
${ }^{7}$ Students who met the definition of eligible migrant children as outlined in the EDFacts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural ${ }_{8}$ Includes orly students with disabilities who were served under the Individuals with Disabilities Education ${ }^{9}$ The District of Columbia did not operate a migrant education program during the 2014-15 school year and therefore had no data to provide on migrant homeless students.
NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118-Homeless Students Enrolled" at https://www2.ed.gov/aboutinits/ed/edfacts/sy-14-15-nonxml.html. Data include all homeless students enrolled at any time during the school year. ISD = independent school district.

## -Not available.

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
${ }^{1}$ Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Percentages based on counts of between 1 and 3 gifted and talented students are displayed as ranges to protect student privacy.

SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection: 2004, 2006, and 2011-12. (This table was prepared January 2016.)

Table 205.10. Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2015
[Standard errors appear in parentheses]

$\dagger$ Not applicable
${ }^{1}$ Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Ungraded students are prorated into prekindergarten through grade 8 and grades 9 through 12. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1995-96 through 2015-16. (This table was prepared May 2017.)

## -Not available. <br> $\dagger$ Not applicable. \#Rounds to zero

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian.
Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.
${ }^{2}$ Elementary schools have grade 6 or lower and no grade higher than 8 . Secondary schools have no grade lower than 7 . Combined
schools include those that have grades lower than 7 and higher than 8 , as well as those that do not classify students by grade level.
${ }^{3}$ Race/ethnicity was not collected for prekindergarten students ( 846,900 out of $5,750,520$ students in 2015). Percentage distribution is based on the students for whom race/ethnicity was reported

IE. Includes enrollment in prekindergarten through grade 12 in schools that ofter kindergarten or higher grade. Prior to 2009, data on students of Two or more races and separate data for Pacific Islanders were not collected. Race categories SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2005-06 through 2015-16. (This table was prepared May 2017.)

Table 205.40. Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected characteristics: Fall 1999, fall 2009, and fall 2015
[Standard errors appear in parentheses]

## -Not available.

## $\dagger$ Not applicable.

${ }^{1}$ Includes students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade.
${ }^{2}$ Elementary schools have grade 6 or lower and no grade higher than 8 . Secondary schools have no grade lower than 7 . Combined schools include those that have grades lower than 7 and higher than 8 , as well as those that do not classify students by grade level.
${ }^{3}$ Race/ethnicity was not collected for prekindergarten students (846,900 in fall 2015). Per centage distribution is based on the students for whom race/ethnicity was reported.

For 1999, Pacific Islander students are included under Asian. Prior to 2009, data were not collected on Pacific Islander students as a separate category.
${ }^{5}$ Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergaren students.
NOTE: Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1999-2000, 2009-10, and 2015-16. (This table was prepared June 2017.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
Only includes kindergarten students who attend schools that offer first or higher grade.
Each school reports the highest annual tuition charged for a full-time student; this amount does not take into account discounts ${ }^{3}$ Constant dollars based on the Coive. This amount is weighted by the number of students enrolled in each school and averaged. Labor, adjusted to a school-year basis.

NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8 , as well as those that do not classify students by grade level. Excludes prekindergarten students. Includes a small percentage of schools reporting tuition of 0 ; these private schools are often under contract to public school districts to provide special education services. Detail may not sum to totals because of rounding and cell suppression. Some data have been revised SOURCE: U.S. Department vate School Data File," 1999-2000, 2003-04, 2007-08, and 2011-12. (This table was prepared in September 2016.)

## Not applicable

Interpret data with caution. The coefficient of variation (CVV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 per cent or greater.
${ }^{1}$ Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students

NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2005-06 through 2015-16. (This table was prepared June 2017.)

Table 206.10. Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12 th grade, by selected child, parent, and household characteristics: 2003, 2007, and 2012
[Standard errors appear in parentheses]

Table 206.20. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999, 2003, and 2007
[Standard errors appear in parentheses]

## -Not available.

†Not applicable.
fReporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater
${ }^{1}$ 'Excludes students who were enrolled in school for more than 25 hours a week; also excluded in 1999 and 2003 are students who were homeschooled only due to a temporary illness and, in 2007, students who were homeschooled primarily due to a temporary iliness.
${ }^{2}$ Students whose grade equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003 and 2007
NOTE: Data are based on parent reports. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003 and PFI:2007) of the National Household Education Surveys Program. (This table was prepared July 2010.)

$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
In 160 cases, questions about whether a student's school was assigned were not asked because parents reported the school as a private school, and it was only later identified as a public school based on administrative data. Due to the missing data on whether the school was assigned or chosen, these cases were included neither with assigned public schools nor with chosen public schools. These cases were included in the public school totals, however, and they could still be accurately classified as either traditional or charter schools based on administrative data.
${ }^{2}$ Includes all types of public noncharter schools.
${ }^{3}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes
ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
Includes only students enrolled in public schools.
NOTE: Data exclude homeschooled children. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

$\dagger$ Not applicable.
${ }^{1}$ This column shows percentages of public school students only. Private school students are excluded from the analysis.
${ }^{2}$ There were 160 cases excluded from the school type analysis because parents reported the school as a private school when it was later found to be a public school and therefore questions about whether the school was assigned were not asked.
${ }^{3}$ Students who attended chosen public schools were automatically coded as yes for whether or not their district allowed public school choice.
${ }^{4}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 per-
cent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
NOTE: Data exclude homeschooled children. Race categories exclude persons of Hispanic ethnicity.

Table 206.50. Percentage of students enrolled in grades 3 through 12 whose parents were satisfied or dissatisfied with various aspects of their children's schools, by school type: 2003, 2007, and 2012
[Standard errors appear in parentheses]

[^29] shools nor with chosen public schools; however, they were included in the public school totals.

NOTE: Data exclude homeschooled children. While National Household Education Surveys Program (NHES) administration prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil ques-
tionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Detail may not sum to totals because of rounding.

The respondent was the parent most knowledgeable about the child's care and education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household.
${ }^{2}$ Excludes children living in households with no mother or female guardian present.
${ }^{3}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty
threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

## $\dagger$ Not applicable.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
theporting standards not met (too few cases for a reliable estimate).
IIn 2007 and 2012, a single item asked parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.
${ }^{3}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents
are asked to select the range within which their measure of poverty status is an approximation.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respon-
dents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. All information, including control of school, is based on parent reports. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
${ }^{1}$ Excludes children who were not able to speak
${ }^{2}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; is a dollar amount chate are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents.
Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. All information, including control of school, is based on parent reports. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

## cable. <br> $\dagger$ Reporting standards not met (too few cases for a reliable estimate).

IIncluded in "Other" in 2003 data.
2Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty
threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the
measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to responchanges could be due to the mode change from telephone to mail. Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled children. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. Race categories exclude persons of Hispanic ethnicity. Asian and Pacific Islander data were not collected separately prior to 2007. Some data have been revised from previously published figures.

${ }^{1}$ Includes imputations for California and Wyoming.
NOTE: Pupil/teacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

## -Not available.

${ }^{1}$ A teacher is considered to be a new hire for a public or private school if the teacher had not taught in that control of school in the previous year. A teacher who moves from a public to private or a private to public school is considered a new teacher hire, but a teacher who moves from one public school to another public school or one private school to another private school is not considered a new teacher hire.
${ }^{2}$ Estimated.
${ }^{2}$ Estimated.
${ }^{3}$ Projected.
NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupi/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded
from class size calculations. Ratios for public schools reflect totals reported by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

${ }^{1}$ Includes imputed values for states.
${ }^{2}$ Includes imputations to correct for underreporting of prekindergarten teachers.
${ }^{3}$ Imputed.
${ }^{4}$ Includes imputations to correct for underreporting of prekindergarten, kindergarten, and secondary teachers.
${ }^{5}$ Includes imputations to correct for underreporting of prekindergarten, kindergarten, and ungraded teachers.
${ }^{6}$ Includes imputations to correct for underreporting of prekindergarten and kindergarten teachers.
NOTE: Distribution of elementary and secondary teachers determined by reporting units. DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000-01 through 2014-15. (This table was prepared January 2017.)

Table 208.40. Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2014

[^30]${ }^{6}$ Imputed.
NOTE: Teachers reported in full-time equivalents (FTE). DoD = Department of Defense. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios reflect totals reported by states and differ from totals reported for schools or school districts.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000-01 through 2014-15. (This table was prepared January 2017.)

Table 209.10. Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987-88 through 2011-12

## -Not available.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
Data for years 1987-88 through 1999-2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003-04
${ }^{2}$ Includes Pacific Islander for years 1987-88 through 1999-2000.
${ }^{3}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies
O number of full-time-equivten teachers. Data are based data, and cell suppression. Race categori reported in other tables. Detail may not sum to totals because of rounding, missing SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File," 1987-88 through 2011-12; "Private School Teacher Data File," 1987-88 through 2011-12; and "Charter School Teacher Data File," 1999-2000. (This table was prepared July 2013.)

Table 209.20. Number, highest degree, and years of full-time teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999-2000 through 2011-12
[Standard error appears in parentheses]

| Selected teacher characteristic | Number of teachers (in thousands) |  |  |  |  |  |  |  | Percent of teachers, by highest degree earned, 2011-12 |  |  |  |  |  |  |  |  |  | Percent of teachers, by years of full-time teaching experience, 2011-12 |  |  |  |  |  |  |  |

-Not available.
Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
tReporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 ercent or greater
ducation specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes cercate of advanced graduate studies.
${ }^{2}$ Data for 1999-2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003-04.
3Includes Pacific Islander.
${ }^{4}$ Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and
those teaching mutiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, sec ondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5
${ }^{5}$ Included under Other elementary.
NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity,

${ }^{1}$ Requirements vary by state. Includes teachers who met all applicable state teacher certification requirements for a standard certificate (i.e., had a regular/standard certificate/ license/endorsement issued by the state). Includes teachers who met the standard teacher education requirements, but had not completed a state-required probationary period. Excludes teachers with emergency, temporary, or provisional credentials.
${ }^{2}$ The number of years of teaching experience includes the current year and any prior years teaching in any school, subject, or grade. Does not include any student teaching or other similar preparation experiences
NOTE: Teachers reported in full-time equivalents (FTE). Due to differing survey procedures, data in this table differ from data in tables based on other survey systems. SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection, "2011-12 Classroom Teachers Estimations." (This table was prepared January 2016.)

Table 209.30. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2011-12
[Standard errors appear in parentheses]
DIGEST OF EDUCATION STATISTICS 2016

IInterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greate
who taught departmentalized classes (e.g., science, art, social science, or other course subecondary teachers are those Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6 . In general, sec-
ondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5 .
${ }^{2}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File," 2011-12. (This table was prepared May 2013.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.
${ }^{2}$ Data may sum to more than 100 percent because (1) a teacher who reported more than one major is represented in more than one field of study and (2) a teacher with multiple degrees in different fields of study is represented in more than one field of study.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding

## Not applicable.

interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few ases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater
${ }^{1}$ Includes retirement pension funds paid during the school year
${ }^{2}$ Includes compensation for extracurricular or additional activities such as coaching, student activity sponsorship, or teaching ning classes
IIncludes teaching summer sessions and other non-teaching jobs at any school
Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.
${ }^{5}$ Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those 7 throgh 12 grades 7 through 12 and those leaching multiple grades, with a preponderance grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5
(regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other profes sional staff, and support staff). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and missing values in cells with too few cases to report.

## ot applicable

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
Includes teachers with levels of education below the bachelor's degree (not shown separately)
Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes cerificate of advanced graduate studies.

NOTE: This table includes regular fult-ime teachers only, it excludes other staff even when they have ful-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other profes because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File," 1990-91, 1999-2000, 2003-04, 2007-08, and 2011-12; and "Charter School Teacher Data File," 1999-2000. (This table was prepared September 2016.)

Table 211.30. Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993-94 through 2011-12

## -Not available.

${ }^{1}$ Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
${ }^{2}$ The average monetary remuneration earned by FTE employees across all industries in a given year, including wages, salaries, commissions, tips, bonuses, voluntary employee contributions to certain deferred compensation plans, and receipts in kind that represent income. Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.
${ }^{3}$ Teachers at schools that are classified as elementary by state and local practice and composed of any span of grades not above grade 8. Preschool or kindergarten schools are included only if they are an integral part of an elementary school or a regularly established school system.
${ }^{4}$ Teachers at schools comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7,8 , or 9 ) and ending with or below grade 12. Includes both junior high schools and senior high schools.
NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

\#! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
ata for 1993-94 and 1999-2000 are only roughly comparable to data for later years, because the new category of Two or
${ }^{2}$ Includes Pacific Islander for 1993-94 and 1999-2000.
${ }^{3}$ Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies
NOTE: Data are based on a head count of full-time and part-time principals rather than on the number of full-time-equivalent principals reported in other tables. Detail may not sum to totals because of rounding, missing data, and cell suppression. Race categories exclude persons of Hispanic ethnicity.
"Public School Principal Data File" and "Private Schanter for Education Statistics, Schools and Staffing Survey (SASS), 2011-12; and "Charter School Principal Data File," 1999-2000. (This table was prepared November 2015.)

## -Not available.

Includes imputations to correct for undercounts in states as designated in footnotes 2 through 4 and 6 through 9.
${ }^{2}$ Includes imputations for instruction coordinators.
${ }^{3}$ Includes imputations for library support staff
${ }^{4}$ Includes imputations for prekindergarten teachers
${ }^{5}$ Includes staff not reported by type of assignment.
${ }^{6}$ Includes imputations for administrative support staff
${ }^{7}$ Includes imputations for school support staff.
${ }^{8}$ Includes imputations for instructional aides.
${ }^{9}$ All data are imputed
NOTE: DoD = Department of Defense.

## -Not available.

${ }^{1}$ U.S. totals include imputations for underreporting and nonreporting states.
${ }^{2}$ Includes imputations to correct for underreporting.
${ }^{3}$ Excludes counts for officials and administrators and for administrative support staff, which
were not reported.

NOTE: Staff reported in full-time equivalents. DoD = Department of Defense.

## $\dagger$ Not applicable.

NOTE: Size not reported (column 11) includes school districts reporting enrollment of zero and school districts whose enrollment counts were suppressed because they failed data quality edits. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment
totals differ from other tables because this table represents data reported by regular school districts rather than states or schools. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 1979-80 through 2014-15. (This table was prepared November 2016.)

Table 214.30. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2013-14 and 2014-15

${ }^{1}$ Regular school districts include both independent districts and those that are a dependent segment of a local government. Also includes components of supervisory unions that operate schools, but share superintendent services with other districts.
${ }^{2}$ New York City counted as one school district.

NOTE: DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2013-14 and 2014-15. (This table was prepared November 2016.)

Table 214.4. Public elementary and secondary school enrollment, number of schools, and other selected characteristics, by locale: Fall 2011 through fall 2014

See notes at end of table.

${ }^{1}$ Located inside an urbanized area and inside a principal city with a population of at least of 250,000 or more.
${ }^{2}$ Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000 Located inside an urbanized area and outside a principal city with a population of 250,000 or more.
${ }^{5}$ Located inside an urbanized area and outside a principal city with a population of at least 100,000 , but less than 250,000 ELocated inside an urbanized area and outside a principal city with a population less than 100,000.
${ }^{7}$ Located inside an urban cluster that is 10 miles or less from an urbanized area.
${ }^{8}$ Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.
QLocated inside an urban cluster that is more than 35 miles from an urbanized area.
${ }^{10}$ Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.

Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
${ }^{12}$ Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.
${ }^{13}$ Data are based on locales of school districts rather than locales of schools as in the rest of the table. Includes imputed data for Alabama in 2012 and New York in 2013. Includes only students served in regular school districts-excluding other types of districts, such as regional education service agencies and charter schar
2014-15, which are for students served in all types of districts. ${ }_{14}$ Average for schools reporting enrollment Enrolment data we ${ }^{15}$ Ratio for schools reporting both full-time-equivalent teachers and fall
NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Enrollment and ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states. Some data have been revised from previously published figures.
mentary/Secondary School Universe Survey" 2011-12, 2012-13, 2013-14, and 2014-15; and "Loo Data (CCD), "Public Eleverse Survey," 2011-12, 2012-13, 2013-14, and 2014-15. (This table was prepared October 2016.)

Table 215.30. Enrollment, poverty, and federal funds for the 120 largest school districts, by enrollment size in 2014: Selected years, 2013-14 through 2016

| Name of district | State | Rank order | Enroll-ment, fall2014 | 5- to 17-year-old population, 2014 | 5- to 17 -year-olds in poverty, 20141 | Poverty rate of 5- to $17-$ year-olds, $2014{ }^{1}$ | Revenues by source of funds, 2013-14 |  |  |  | Revenue from selected federal programs (in thousands), 2013-14 |  |  |  |  |  | Federal Title I allocations (in thousands), federal fiscal year $2016^{2}$ |  |  |  |  |

'Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty hresholds, see http://www.census.gov/hhes/www/poverty/datathreshla/.
${ }^{2}$ Fiscal year 2016 Department of Education funds available for spending by school districts in the 2016-17 school year.
${ }^{\text {FFederal revenue }}$ per student is based on fall enrollment collected through the "Local Education Agency (School District) Finance Survey (F33)."

NOTE. Detail may not sum to totals because of rounding. ISD = independent school distric.

\#Rounds to zero.
${ }^{1}$ The National School Lunch Program is a federally assisted meal program. To be eligible for free lunch under the program, a student must be from a household with an income at or below 130 percent of the poverty threshold; to be eligible for reduced-price lunch, a studen must be from a household with an income between 130 percent and 185 percent of the poverty threshold.
${ }^{2}$ Pupil/teacher ratio based on schools that reported both enrollment and teacher data.

Includes schools beginning with grade 6 or below and with no grade higher than 8
${ }^{4}$ Includes schools with no grade lower than 7
Includes schools beginning with grade 6 or below and ending with grade 9 or above. NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

## \#Rounds to zero.

${ }^{1}$ Because the data reflect reports by schools, totals differ from those in tables based on reports by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.
${ }^{2}$ Includes elementary, secondary, combined elementary/secondary, and other schools ${ }^{3}$ Includes schools beginning with grade 6 or below and with no grade higher than 8 ${ }^{4}$ Includes schools with no grade lower than 7
${ }^{5}$ Includes schools beginning with grade 6 or below and ending with grade 9 or above. ${ }^{6}$ Includes special education, alternative, and other schools not reported by grade span.
${ }^{7}$ Excludes special education schools, vocational schools, and alternative schools.
Data are for schools reporting enrollments greater than zero. Enrollments greater than zero were reported for 94,859 out of 98,454 schools in 2012-13, 94,876 out of 98,271 in 2013-14, and 95,230 out of 98,176 in 2014-15.
NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 995-96 through 2014-15. (This table was prepared October 2016.)

Table 216.55. Number and percentage distribution of public elementary and secondary school students, by percentage of student's racial/ethnic group enrolled in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2014

|  | Number of students in each racial/ethnic group, by percent of that racial/ethnic group in the school |  |  |  |  |  |  | Percentage distribution of students in each racial/ethnic group, by percent of that racial/ethnic group in the school |  |  |  |  |  |  |

\#Rounds to zero.
NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were no
reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

${ }^{-}$Includes students enrolled in schools that did not report free or reduced-price lunch eligibility.
${ }^{2}$ Combined elementary/secondary schools and schools not reported by grade span are not shown separately
${ }^{3}$ Includes schools beginning with grade 6 or below and with no grade higher than 8.
${ }^{4}$ Includes schools with no grade lower than 7.
${ }^{5}$ Excludes 940 students enrolled in schools for which locale data are not available.
NOTE: Students with household incomes under 185 percent of the poverty threshold are eligible for free or reduced-price lunch under the National School Lunch Program (NSLP). In addition, some groups of children-such as foster children, children participating in the Head Start and Migrant Education programs, and children receiving services under the Runaway and

Homeless Youth Act-are assumed to be categorically eligible to participate in the NSLP. Also, under the Community Eligibility option, some nonpoor children who attend school in a lowincome area may participate if the district decides that it would be more efficient to provide free unch to all children in the school. For more information, see http://www.fns.usda.gov/nslp/ national-school-lunch-program-nslp. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

## -Not available

${ }^{1}$ Includes schools that provide nontraditional education, address needs of students that typically cannot be met in regular schools, serve as adjuncts to regular schools, or fall outside the categories of regular, special education, or vocational education.
${ }^{2}$ Includes schools beginning with grade 6 or below and with no grade higher than 8
${ }^{3}$ Includes schools with no grade lower than 7.
${ }^{4}$ Includes schools beginning with grade 6 or below and ending with grade 9 or above.
${ }^{5}$ Charter schools are also included under the school level and type categories, as appropriate

NOTE: This table indicates the school year by which the school no longer operated (generally it closed between that school year and the prior school year). The closure of a school does not necessarily mean that a building is no longer used for educational purposes. A single school may share a building with another school, or one school may be housed in several buildings. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1995-96 through 2014-15. (This table was prepared June 2017.)

## $\dagger$ Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) for this
estimate is 50 percent or greater.
${ }^{1}$ Excludes special education, vocational, and alternative schools; schools without enrollment data; and schools offering only preprimary education
The functional age of the main instructional building is the number of years since its most recent major renovation or since its
${ }^{4}$ Based on the 99 percent of public schools with permanent buildings
${ }^{5}$ Based on schools with the specified environmental factor in their permanent buildings. Includes ratings of "unsatisfactory" and "very unsatisfactory."
${ }^{7}$ Based on schools with the specified environmental factor in their portable (temporary) buildings. Includes ratings of "unsatisfactory" and "very unsatisfactory."
NOTE: Detail may not sum to totals because of rounding.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) for this
'Life safety features include sprinklers, fire alarms, and smoke detectors.

NOTE: Percentage of schools with major repair, renovation, or replacement plans is based on schools having the specified building system or feature. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System (FRSS), "Condition of Public School Facilities: 2012-13," FRSS 105, 2013. (This table was prepared April 2014.)

Table 218.10. Number and internet access of instructional computers and rooms in public schools, by selected school characteristics: Selected years, 1995 through 2008
[Standard errors appear in parentheses]

## - Not available

$\dagger$ Not applicable.
IInterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
${ }^{1}$ Data for combined schools are included in the totals and in analyses by other school characteristics, but are not shown separately.
${ }^{2}$ Due to definitional changes for community type, estimates for years prior to 2005 may not be directly comparable with estimates for years.
${ }^{3}$ Free or reduced-price lunch information was obtained on the questionnaire and supplemented, if necessary, with data from the
Common Core of Data (CCD).
${ }^{4}$ Includes computers used for instructional or administrative purposes.

In 2008, instructional rooms included classrooms only and excluded computer labs and library/media centers. Prior to 2008, instructional rooms included classrooms, computer labs and other labs, library/media centers, and other rooms used for instructional purposes.
${ }^{6}$ Some data differ slightly (e.g., by 1 percent) from previously published figures.
NOTE: Detail may not sum to totals because of rounding.

## $\dagger$ Not applicable.

${ }^{1}$ Includes students who are 5 to 17 years old, live in a household, and are in the poverty universe. The poverty universe includes all children who are related to the householder by birth, marriage, or adoption and includes unrelated children age 15 and over. The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. Poverty status is determined by the total family income of the householder for related children and individual income for unrelated children. Poverty status cannot be determined for unrelated children under age 15 (e.g., foster children) because their family and individual income is not known.
${ }^{2}$ Percentages refer to students whose household members access the Internet at home by the means specified. "Either no access or only dial-up access" includes households where no mem ber accesses the Internet at home as well as households where members access the Interne only with a dial-up service.
${ }^{3}$ Excludes mobile broadband, but includes all other non-dial-up internet service, such as DSL cable modem, and fiber-optic cable.
${ }^{4}$ Includes respondents living in a city or town that provides free internet services for its residents.
${ }^{5}$ Students are considered to be in poverty if their family income falls below the Census Bureau's poverty threshold, which is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was $\$ 24,036$. Respondents were interviewed throughout the year and reported on the income they received during the previous 12 months.
NOTE: Data are based on sample surveys of the entire population residing within the United States. However, this table includes only students living in households, because respondents living in group quarters (e.g., shelters, healthcare facilities, or correctional facilities) were not asked about internet access. Some students living in households were also excluded from this table, because their poverty status could not be determined (see footnote 1). As noted in footnote 5, the Census Bureau determines poverty status using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see https:// www.census.gov/topics/income-poverty/poverty/guidance/poverty-measures.html. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2015. (This table was prepared January 2017.)

## $\dagger$ Not applicable.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Includes all students who are 5 to 17 years old and live in a household.
${ }^{2}$ Percentages refer to students whose household members access the Internet at home by the means specified. "Either no access or only dial-up access" includes households where no member accesses the Internet at home as well as households where members access the Internet only with a dial-up service.
${ }^{3}$ Excludes mobile broadband, but includes all other non-dial-up internet service, such as DSL, cable modem, and fiber-optic cable.

Includes respondents living in a city or town that provides free internet services for its residents. Total includes other racial/ethnic groups not shown separately.
${ }^{6}$ Data for this race category cannot be broken out by locale.
NOTE: Data are based on sample surveys of the entire population residing within the United States. However, this table includes only students living in households, because respondents living in group quarters (e.g., shelters, healthcare facilities, or correctional facilities) were not asked about internet access. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

Table 219.10. High school graduates, by sex and control of school: Selected years, 1869-70 through 2026-27

[^39]${ }^{9}$ Includes estimate for Connecticut, which did not report graduates by sex. ${ }^{10}$ Projected by NCES.
NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding and adjustments to protect student privacy.

## -Not available.

'Data on students of Two or more races were not reported by all states; therefore, the data are not comparable to figures for 2010-11 and later years.
${ }^{2}$ Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2007-08, data on students of Two or more races were not collected separately. Some data have been revised
from previously published figures. Detail may not sum to totals because of rounding and statistical methods used to prevent the identification of individual students.

-Not available.
${ }^{1}$ Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.
${ }^{2}$ U.S. total includes estimates for nonreporting states.
${ }^{3}$ Estimated high school graduates from NCES 2011-312, Public School Graduates and Dropouts From the Common Core of Data: School Year 2008-09.
${ }^{4}$ Projected high school graduates from NCES 2009-062, Projections of Education Statistics to 2018.
${ }^{5}$ Includes 1,161 graduates in 2007-08 and 1,169 graduates in 2008-09 from private high schools that received a majority of their funding from public sources.
${ }^{6}$ Includes 1,419 fall 2006 9th-graders who attended publicly funded private schools that were not reported in the 2006-07 Common Core of Data, but were reported in data for later years. ${ }^{7}$ Estimated high school graduates from NCES 2006-606rev, The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002-03 and 2003-04.

NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses students who receive a regular diploma within aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.

## -Not available.

$\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ Total averaged freshman graduation rate (AFGR) is based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.
${ }^{2}$ AFGR is based on an estimate of 30 to 99 students entering ninth grade and may show large variation from year to year.
NOTE: The AFGR provides an estimate of the percentage of students who receive a regular
diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. The enrollment data used in computing the AFGR for race/ethnicity categories include only students for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. DoD = Department of Defense.

## -Not available.

$\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ The time when students are identified as having certain characteristics varies by state. Depending on the state, a student may be included in a category if the relevant characteristic is reported in 9th-grade data, if the characteristic is reported in 12th-grade data, or if it is reported at any point during the student's high school years.
${ }^{2}$ Represents either the value reported by the state for the "Asian/Pacific Islander" group or an aggregation of values reported by the state for separate "Asian," "Native Hawaiian/Other Pacific Islander or Pacific Islander," and "Filipino" groups.
${ }^{3}$ Students identified as children with disabilities under the Individuals with Disabilities Education Act (IDEA)
${ }^{4}$ Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see http://www2.ed.gov/about/inits/ed/edfacts/ eden-workbook.html.
${ }^{5}$ Students who met the state criteria for classification as economically disadvantaged. ${ }^{6}$ The 4-year ACGR for the United States was estimated using both state-reported 4 -year ACGR data and imputed data for states for which data were unavailable. Does not include the Bureau of Indian Education and Puerto Rico.
${ }^{7}$ Use data with caution. The Alabama State Department of Education has indicated that their ACGR data was misstated. For more information, please see the following press release issued by the state: https://www.alsde.edu/sec/comm/News\ Releases/12-082016\ Graduation\ Rate\ Review.pdf.
${ }^{8}$ The U.S. Department of Education's Office of Elementary and Secondary Education approved a timeline extension for these states to begin reporting 4-year ACGR data, resulting in the 4-year ACGR not being available in one or more of the school years shown.
NOTE: The adjusted cohort graduation rate (ACGR) is the percentage of public high school freshmen who graduate with a regular diploma within 4 years of starting 9th grade. Students who are entering 9th grade for the first time form a cohort for the graduating class. This cohort is "adjusted" by adding any students who subsequently transfer into the cohort and subtracting any students who subsequently transfer out, emigrate to another country, or die. Values preceded by the " $>=$ " symbol have been "blurred" to protect student privacy. Race categories exclude persons of Hispanic ethnicity.

## -Not available. <br> \#Rounds to zero.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Data were imputed based on prior year rates.
NOTE: Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of
school between one October and the next. Enrollment and dropout data for ungraded students were prorated into grades 9 through 12 based on the counts for graded students. DoD stands for Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Dropout and Completion Data File," 2009-10. (This table was prepared November 2012.)

Table 219.55. Among 15- to 24 -year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), by sex and race/ ethnicity: 1972 through 2015
[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
${ }^{1}$ The event dropout rate is the percentage of 15 - to 24 -year-olds in grades 10 through 12 who dropped out between one October and the next (e.g., the 2015 data refer to 10ththrough 12th-graders who were enrolled in October 2014 but had dropped out by October 2015). Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate.
${ }^{2}$ Includes other racial/ethnic groups not separately shown.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Because of changes in data collection procedures, data for 1992 and later years may not be comparable with figures for prior years. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1972 through 2015. (This table was prepared June 2017.)

## Table 219.57. Among 15- to 24 -year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), and number and percentage distribution of 15- to 24 -year-olds in grades 10 through 12, by selected characteristics: Selected years, 2005 through 2015

[Standard errors appear in parentheses]

## -Not available.

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ The event dropout rate is the percentage of 15 - to 24 -year-olds in grades 10 through 12 who dropped out between one October and the next (e.g., the 2015 data refer to 10ththrough 12th-graders who were enrolled in October 2014 but had dropped out by October 2015). Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate
${ }^{2}$ Includes all 15 - to 24 -year-olds who were enrolled in grades 10 through 12 in October 2014.
${ }^{3}$ Includes only those 15 - to 24 -year-olds who dropped out of grades 10 through 12 between October 2014 and October 2015. Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate.
${ }^{4}$ Lowest quarter refers to the bottom 25 percent of all family incomes; middle low quarter refers to the 26th through the 50th percentile of all family incomes; middle high quarter refers to the 51st through the 75th percentile of all family incomes; and highest quarter refers to the top 25 percent of all family incomes.
${ }^{5}$ Age at the time of data collection. A person's age at the time of dropping out may be 1 year younger, because the dropout event could occur at any time over the previous 12-month period. ${ }^{6}$ United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.
Individuals identified as having a disability reported difficulty with at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 2005 through 2015. (This table was prepared June 2017.)

## -Not available

${ }^{1}$ Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years. For 1989 and later years, age data are only for test passers. The less than 1 percent of people who failed to report their date of birth-2,948 of the 540,535 test passers in 2013-were excluded from the calculation.
${ }^{2}$ All people taking the GED tests (one or more subtests).
${ }^{3}$ People completing the entire GED battery of five tests.
${ }^{4}$ Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states, GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).
${ }^{5}$ Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.
${ }^{6}$ For 1988 and prior years, 19-year-olds are included with the 16-to 18-year-olds instead of the 19 - to 24-year-olds.
${ }^{7}$ A revised GED test was introduced in 2002. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002.
NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding.

## -Not available.

$\dagger$ Not applicable
${ }^{1}$ The status completion rate is the number of 18 - to 24 -year-olds who are high school com pleters as a percentage of the total number of 18 - to 24 -year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high schoo diploma, as well as those with an alternative credential, such as a GED
${ }^{2}$ Prior to 2003, Asian data include Pacific Islanders
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in
households. Because of changes in data collection procedures, data for 1992 and later years may not be comparable with figures for prior years. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown.

[^42]parents are also counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.
${ }^{5}$ Individuals identified as having a disability reported difficulty in at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and the suppression of cells that do not meet NCES reporting standards.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 2005 through 2015. (This table was prepared July 2016.)

## Table 219.70. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2015

[Standard errors appear in parentheses]

| Year | Total status dropout rate |  |  |  | Male status dropout rate |  |  |  | Female status dropout rate |  |  |  |  |

[^43]NOTE: "Status" dropouts are 16- to 24 -year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2015. (This table was prepared August 2016.)

Table 219.71. Population 16 to 24 years old and number of 16 - to 24 -year-old high school dropouts (status dropouts), by sex and race/ethnicity: 1970 through 2015

See notes at end of table.

Table 219.71. Population 16 to 24 years old and number of 16 - to 24 -year-old high school dropouts (status dropouts), by sex and race/ethnicity: 1970 through 2015-Continued [Standard errors appear in parentheses]

## -Not available.

†Not applicable
Includes other racial/ethnic groups not separately shown.
For 1970 and 1971, White and Black include persons of Hispanic ethnicity.
Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992
Beginning in 2010 standard errors were computed using
ig replicate weights, which produced more precise values than the gen-
eralized variance function methodology used in prior years.

NOTE: "Status" dropouts are 16 - to 24 -year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which sons of Hispanic ethnicity except where otherwise noted. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2015 (This table was prepared August 2016.)

Table 219.73. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number and percentage distribution of 16- to 24-year-olds, by selected characteristics: Selected years, 2005 through 2015

## -Not available.

$\dagger$ Not applicable.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is 30 percent or greater.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ The status dropout rate is the percentage of 16- to 24 -year-olds who are not enrolled in high school and who lack a high school credential. High school credentials include high school diplomas and alternative credentials, such as a GED certificate.

## ${ }^{2}$ Includes all 16- to 24-year-olds.

${ }^{3}$ Status dropouts are 16-to 24-year-olds who are not enrolled in high school and who lack a high school credential. High school credentials include high school diplomas and alternative credentials, such as a GED certificate.
${ }^{4}$ Lowest quarter refers to the bottom 25 percent of all family incomes; middle low quarter refers to the 26th through the 50th percentile of all family incomes; middle high quarter refers to the 51st through the 75th percentile of all family incomes; and highest quarter refers to the top 25 percent of all family incomes.
${ }^{5}$ United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.
${ }^{6}$ Individuals identified as having a disability reported difficulty in at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and the suppression of cells that do not meet NCES reporting standards. Some data have been revised from previously published figures. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 2005 through 2015. (This table was prepared June 2017.)

Table 219.75. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: 1970 through 2015
[Standard errors appear in parentheses]

## - Not available.

${ }^{\text {D }}$ Data are not comparable to employment and unemployment rate data produced by the Bureau of Labor Statistics, because the percentage distributions presented here include persons who are not in the labor force. The labor force consists of those who are employed and those who are unemployed (i.e., seeking employment); persons who are neither employed nor seeking employment are not in the labor force
ncludes persons who were employed but not at work during the survey week
${ }^{3}$ Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
${ }^{4}$ Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the gen,
NOTE: "Status" dropouts are 16 - to 24 -year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and per sons living in institutions (e.g., prisons or nursing facilities). Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.
(This Census Bureau, Current Population Survey (CPS), October, 1970 through 2015

Table 219．80．Percentage of high school dropouts among persons 16 to 24 years old（status dropout rate）and number of status dropouts，by noninstitutionalized or institutionalized status，birth in or outside of the United States，and selected characteristics：Selected years， 2006 through 2015

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
iPersons living in
ers include college and univalds as well as persons living in noninstitutionalized group quarters. Noninstitutionalized group quarters for the homeless.
${ }^{2}$ Persons living in institutionalized group quarters, including adult and juvenile correctional facilities, nursing facilities, and ther health care facilities.
3United States refers to the 50 states and the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin lands, and the Northern Marianas.
${ }_{4}$ Includes other Central American subgroups not shown separately.
${ }^{5}$ Includes Taiwanese.
${ }^{6}$ In addition to the subgroups shown, also includes Sri Lankan
${ }^{7}$ Consists of Indonesian and Malaysian.
${ }^{8}$ Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.
IOTE: "Stats"" dro wrote in some other race that was not included as an option on the questionnaire.
gram, regardless of when they left school and whether the not enrolled in school and who have not completed a high school proGED credentials are counted as high school completers. Data are based on sample surveys of the entire population of 16 - to 24 -year-olds residing within the United States. Estimates may differ from those in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations. Detail may not sum to totals because of rounding and the suppression of data that do not meet reporting standards. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2006, 2010, 2014, and 2015 (This table was prepared February 2017.)

Table 219.90. Number and percentage distribution of 14-through 21-year-old students served under Individuals with Disabilities Education Act (IDEA), Part B, who exited school, by exit reason, sex, race/ethnicity, age, and type of disability: 2012-13 and 2013-14

$\dagger$ Not applicable.
${ }^{1}$ Reflects performance on language and literacy items (e.g., conventions of print, letter recognition, understanding of letter-sound relationships, phonological awareness, sight word recognition, and understanding words in the context of simple sentences). Potential score ranges from 0 to 85 .
${ }^{2}$ Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5 . ${ }^{3}$ Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 71 .
${ }^{4}$ Percentage of children who scored 10 on a test with a potential score range of 0 to 10 . These children were able to name the colors of five pictured objects ( 2 points per correct answer).
${ }^{5}$ Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7 .
${ }^{6}$ Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.
${ }^{7}$ The type of nonparental care in which the child spent the most hours.
${ }^{8}$ Care provided in the child's home or in another private home by a relative (excluding parents).
${ }^{9}$ Care provided in the child's home or in another private home by a person unrelated to the child.
${ }^{10}$ Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.
${ }^{11}$ Children who spent an equal amount of time in each of two or more types of arrangements.
${ }^{12}$ Poverty status based on Census Bureau guidelines from 2005, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2005, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$19,971. NOTE: Estimates weighted by W3R0. Estimates pertain to a sample of children who were born in 2001. This table was designed to present data collected when the children were about 4 years of age (i.e., 48 to 57 months old). As shown in the table, some children were younger or older than this at the time data were collected, although 75 percent were within the target age range. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort (ECLS-B), Longitudinal 9-Month-Kindergarten 2007 Restricted-Use Data File. (This table was prepared December 2010.)

Table 220.39. Percentage distribution of fall 2010 first-time kindergartners, by two risk factors (low parental education and family poverty) and selected child, family, and school characteristics: 2010-11
[Standard errors appear in parentheses]

## $\dagger$ Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent. $\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or family poverty.
with missing information about parental education or family poverty.
${ }^{2}$ High school not completed by any parent or guardian living with the child.
${ }^{3}$ Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify ${ }^{3}$ Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify
incomes determined to meet household needs, given family size and composition. For example, a famincomes determined to meet household needs, given family size and composition. For example, a
ily of three with one child was below the poverty threshold if its income was less than $\$ 17,552$ in 2010. 4Dy of three with one child was below the poverty threshold if its income was child's approaches to learning scale score in fall of the kindergarten year. This score is
4Der based on teachers' reports on how often students exhibit positive learning behaviors in seven areas attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4 , with higher scores indicating that a child exhibits positive learning behaviors more often. Fa 2010 scores were categorized into the four anchor points on the original scale-1 (never), 2 (some times), 3 (often), and 4 (very often)-by rounding the mean score to the nearest whole number. ${ }^{5}$ The type of nonparental care in which the child spent the most hours. "Multiple arrangements refers to children who spent an equal amount of time in each of two or more arrangements.

A two-parent household may have two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include bioadoptive parent only, without another parent/partner. In other household types, which do not ind
logical or adoptive parents, the guardian or guardians may be related or unrelated to the child.
${ }^{7}$ Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
${ }^{8}$ Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income during the child's kindergarten year.
NOTE: Estimates weighted by W7C17P_7T170. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. Estimates represent characteristics as of 2010-11, when the first wave of data collection occurred, and include the entire sample of 2010-11 first-time kindergartners. However, estimates in this table may differ from estimates in tables based on earlier data files, because weights have been adjusted to account for survey nonresponse at each data collection wave. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 2010-11 (ECLS-K:2011), Kindergarten-Third Grade Restricted-Use Data File. (This table was prepared October 2016.)

Table 220.40. Fall 2010 first-time kindergartners' reading scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2014

${ }^{1}$ Reflects performance on questions measuring basic skills (print familiarity, letter recognition beginning and ending sounds, rhyming words, and word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appropriateness and quality. Possible scores for the reading assessmen range from 0 to 141.
${ }^{2}$ Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4 , with higher scores indicating that a child exhibits positive learning behaviors more often. Fal 2010 scores were categorized into the four anchor points on the original scale-1 (never), 2 (some times) 3 (often), and 4 (very often)-by rounding the mean score to the nearest whole number. ${ }^{3}$ The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.
${ }^{4} \mathrm{~A}$ two-parent household may have two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include biological or adoptive parents, the guardian or guardians may be related or unrelated to the child.
${ }^{5}$ Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
${ }^{6}$ Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify ncomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010. Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or family poverty.
High school not completed by any parent or guardian living with the child.
Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income during the child's kindergarten year.
NOTE: Estimates weighted by W7C17P_7T170. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. Most of the children were in first grade in 2011-12, second grade in 2012-13, and third grade in 2013-14, but some of the children were in other grades. In 2013-14, for example, 6 percent of the children were not in third grade (e.g., were in second grade, fourth grade, or ungraded classrooms). Estimates differ from previously published figures because scale scores were recalculated to represent the kindergarten through third-grade assessment item pools and weights were adjusted to account for survey nonresponse at each data collection wave. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 2010-11 (ECLS-K:2011), Kindergarten-Third Grade Restricted-Use Data File. (This table was prepared October 2016.)

Table 220.41. Fall 2010 first-time kindergartners' mathematics scale scores through spring of third grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2014

## $\dagger$ Not applicable

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
${ }^{1}$ Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Possible scores for the mathematics assessment range from 0 to 135.
${ }^{2}$ Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4 , with higher scores indicating that a child exhibits positive learning behaviors more often. Fall 2010 scores were categorized into the four anchor points on the original scale-1 (never), 2 (some times), 3 (often), and 4 (very often)-by rounding the mean score to the nearest whole number. ${ }^{3}$ The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements
${ }^{4}$ A two-parent household may have two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include biological or adoptive parents, the guardian or guardians may be related or unrelated to the child.
${ }^{\text {sParents' highest level of education is the highest level of education achieved by either of the par- }- \text { ren }}$ ents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
${ }^{6}$ Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010. Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or family poverty.
${ }^{8} \mathrm{High}$ school not completed by any parent or guardian living with the child.
${ }^{\text {S }}$ Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income during the child's kindergarten year.
NOTE: Estimates weighted by W7C17P_7T170. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. Most of the children were in first grade in 2011-12, second grade in 2012-13, and third grade in 2013-14, but some of the children were in other grades. In 2013-14, for example, 6 percent of the children were not in third grade (e.g., were in second grade, fourth grade, or ungraded classrooms). Estimates differ from previously published figures because scale scores were recalculated to represent the kindergarten through third-grade assessment item pools and weights were adjusted to account for survey nonresponse at each data collection wave. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

## $\dagger$ Not applicable

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Science was not assessed in the fall of kindergarten. Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Possible scores for the science assessment range from 0 to 87
${ }^{2}$ Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4 , with higher scores indicating that a child exhibits positive learning behaviors more often. Fall 2010 scores were categorized into the four anchor points on the original scale-1 (never), 2 (sometimes), 3 (often), and 4 (very often)-by rounding the mean score to the nearest whole number.
${ }^{3}$ The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.
${ }^{4} \mathrm{~A}$ two-parent household may have two biological parents, two adoptive parents, or one biological/adop tive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include biological or adoptive parents, the guardian or guardians may be related or unrelated to the child.
${ }^{5}$ Parents' highest level of education is the highest level of education achieved by either of the par ents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010. ${ }^{7}$ Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or family poverty.
${ }^{8} \mathrm{High}$ school not completed by any parent or guardian living with the child.
${ }^{9}$ Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income during the child's kindergarten year.
NOTE: Estimates weighted by W7C17P_7T170. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. Most of the children were in first grade in 2011-12, second grade in 2012-13, and third grade in 2013-14, but some of the children were in other grades. In 2013-14, for example, 6 percent of the children were not in third grade (e.g., were in second grade, fourth grade, or ungraded classrooms). Estimates differ from previously published figures because scale scores were recalculated to represent the kindergarten through third-grade assessment item pools and weights were adjusted to account for survey nonresponse at each data collection wave. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 2010-11 (ECLS-K:2011), Kindergarten-Third Grade Restricted-Use Data File. (This table was prepared October 2016.)

Table 220.55. Percentage of fall 2010 first-time kindergartners, by type of peer victimization reported by child in third grade, frequency with which child reported being victimized in third grade, and selected child, family, and school characteristics: Spring 2014
[Standard errors appear in parentheses]

## $\dagger$ Not applicable.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Children who reported experiencing more than one type of victimization are counted only once in the total percentage of children who experienced any type of victimization.
${ }^{2}$ Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
${ }^{3}$ Poverty status is based on U.S. Census weighted average income thresholds for 2013, which identify incomes determined to meet household needs, given family size and compo-
sition. For example, a family of three with one child was below the poverty threshold if its ncome was less than \$18,552 in 2013.
NOTE: Estimates weighted by W7C27P_7T70. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. In 2013-14, most of the children were in third grade, but 6 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 2010-11 (ECLS-K:2011), Kindergar-ten-Third Grade Restricted-Use Data File. (This table was prepared October 2016.)

Table 220.56. Percentage of fall 2010 first-time kindergartners, by type of victimization their teacher reported that they perpetrated against peers in third grade, frequency with which the teacher reported that they victimized their peers, and selected child, family, and school characteristics: Spring 2014

${ }^{1}$ Reflects performance on questions measuring basic skills (print familiarity, letter recognition, beginning and ending sounds, rhyming words, and word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appropriateness and quality. Possible scores for the reading assessment range from 0 to 141.
${ }^{2}$ Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Possible scores for the mathematics assessment range from 0 to 135.
${ }^{3}$ Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Possible scores for the science assessment range from 0 to 87. ${ }^{4}$ The approaches to learning scale is based on teachers' reports on how students rate in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores on the scale range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often.
${ }^{5}$ The self-control scale is based on teachers' reports on the student's ability to control behavior by respecting the property rights of others, controlling temper, accepting peer ideas for group activities, and responding appropriately to pressure from peers. Possible scores on the scale range from 1 to 4 , with higher scores indicating that a child exhibited behaviors indicative of self-control more often.
${ }^{6}$ The interpersonal skills scale is based on teachers' reports on the student's skill in forming and maintaining friendships; getting along with people who are different; comforting or helping other children; expressing feelings, ideas, and opinions in positive ways; and showing sensitivity to the feelings of others. Possible scores on the scale range from 1 to 4 , with higher scores indicating that a child interacted with others in a positive way more often.
${ }^{7}$ The externalizing problem behaviors scale is based on teachers' reports on how frequently a student argues, fights, gets angry, acts impulsively, disturbs ongoing activities, and talks at inappropriate times. Possible scores on the scale range from 1 to 4, with higher scores indicating that a child exhibited externalized problem behaviors more often.
${ }^{8}$ The internalizing problem behaviors scale is based on teachers' reports on how frequently a student exhibits the apparent presence of anxiety, loneliness, low self-esteem, and sadness. Possible scores on the scale range from 1 to 4 , with higher scores indicating that a child exhibited internalized problem behaviors more often.
NOTE: Estimates weighted by W7C27P_7T70. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010-11 school year. In 2013-14, most of the children were in third grade, but 6 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms). Estimates differ from previously published figures because scale scores were recalculated to represent the kindergarten through thirdgrade assessment item pools and weights were adjusted to account for survey nonresponse at each data collection wave.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 2010-11 (ECLS-K:2011), Kindergar-ten-Third Grade Restricted-Use Data File. (This table was prepared October 2016.)

Table 220.60. Fall 2010 kindergartners' reading, mathematics, science, and approaches to learning scale scores, by kindergarten entry status and time of assessment: Fall 2010 and spring 2011 through spring 2014
[Standard errors appear in parentheses]

| Type and time of assessment | Overall mean score ${ }^{1}$ |  | Mean score by fall 2010 kindergarten entry status ${ }^{2}$ |  |  |  |  |  |  |  |

| Third grade, spring 2014 ................................... | 3.1 | (0.01) | 3.0 | (0.10) | 3.1 | (0.01) | 3.1 | (0.04) | 2.8 | (0.04) |

${ }^{1}$ Includes students with missing kindergarten entry status information.
${ }^{2}$ A child who enrolled in kindergarten for the first time in 2010-11 is classified as an early, ontime, or delayed kindergarten entrant depending on whether the parent reported enrolling the child early, enrolling the child when he or she was old enough, or waiting until the child was older relative to school guidelines about when children can start school based on their birth date. A child is classified as a kindergarten repeater if the parent reported that 2010-11 was the child's second (or more) year of kindergarten.
${ }^{3}$ Reflects performance on questions measuring basic skills (print familiarity, letter recognition beginning and ending sounds, rhyming words, and word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appropriateness and quality. Possible scores for the reading assessment range from 0 to 141.
${ }^{4}$ Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Possible scores for the mathematics assessment range from 0 to 135 .
${ }^{5}$ Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Possible scores for the science assessment range from 0 to 87. Science was not assessed in the fall of kindergarten.
${ }^{6}$ The approaches to learning scale is based on teachers' reports on how students rate in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores on the scale range from 1 to 4 , with higher scores indicating that a child exhibits positive learning behaviors more often.
NOTE: Estimates weighted by W7C7P_20. Estimates pertain to a sample of children who were enrolled in kindergarten in the 2010-11 school year. The same children were assessed in spring 2012 (when the majority were in first grade), spring 2013 (when the majority were in second grade), and spring 2014 (when the majority were in third grade). Estimates differ from previously published figures because reading, mathematics, and science scale scores were recalculated to represent the kindergarten through third-grade assessment item pools and because weights were adjusted to account for survey nonresponse at each data collection wave, including the latest round of data collection (spring 2014).
