## -Not available.

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.
${ }^{2}$ Accommodations were not permitted for this assessment.
NOTE: Scale ranges from 0 to 500. Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and Eng-
lish language learners who were unable to be tested even with accommodations (2 to 6 percent of all students). Data on race/ethnicity are based on school reports. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2000, 2002, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Reading Assessments, retrieved June 10, 2016, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared June 2016.)

Table 221.12. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of students attaining selected
NAEP reading achievement levels, by selected school and student characteristics and grade: Selected years, 1992 through 2015
[Standard errors appear in parentheses]

| Grade and year | Percent of students in school eligible for free or reduced-price lunch |  |  |  |  | English language learner (ELL) status |  |  | Disability status ${ }^{1}$ |  |  | Percent of all students attaining reading achievement levels |  |  |  |

## -Not available.

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).
${ }^{2}$ Scale ranges from 0 to 500.
${ }^{3}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
${ }^{4}$ Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

[^46]Table 221.20. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading achievement levels, by grade and selected student characteristics: Selected years, 1998 through 2015
[Standard errors appear in parentheses]

## -Not available.

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
2Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Includes public and private schools. Includes students tested with accommodations ( 1 to 12 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 2 to 6 percent of all students). Race categories exclude persons of Hispanic ethnicity. Prior to
2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected. ress (NAEP), 1998, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Reading Assessments, retrieved June 20, 2016, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared June 2016.)

Table 221.30. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012
[Standard errors appear in parentheses]

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
${ }^{1}$ Scale ranges from 0 to 500 . Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interreate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, NOTE: Includes public and private schols. For 1984, 1994, and 1999, accommodations we
years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 4 percent of all students, depending on age and assessment SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), NAEP Trends in Academic Progress, 1996 and 1999; and 2008 and 2012 NAEP Long-Term Trend Reading Assessments, retrieved June 24, 2009, and July 02, 2013, from the Long-Term Trend NAEP Data Explorer (http://nces.ed.gov/ nationsreportcard/naepdata). (This table was prepared July 2013.)

$\dagger$ Not applicable.
\#Rounds to zero
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Scale ranges from 0 to 500 .
2"Access to the Internet" was one item on a list preceded by the question "Do you have the following in your home?" For each item, students could either select "Yes" or leave the item blank. Students who left "Access to the Internet" blank are counted as having no internet access at home.
${ }^{3}$ The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).
${ }^{4}$ Based on a variable that includes five categories: Public, Other private, Catholic, Bureau of
Indian Education, and Department of Defense. Bureau of Indian Education and Department
of Defense were omitted from this table, and Other private and Catholic were collapsed to create the Private category.
NOTE: Includes students tested with accommodations (13 percent of all 4th-graders and 11 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students at both grades). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

-Not available.
$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or item response rates fell below the required standards for reporting.
${ }^{1}$ Scale ranges from 0 to 500 .
${ }^{2}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for profi cient work at the 8th-grade level.
${ }^{3}$ Proficient represents solid academic performance for 8th-graders. Students reaching this
level have demonstrated competency over challenging subject matter.
${ }^{4}$ Advanced signifies superior performance.
${ }^{5}$ Did not meet one or more of the guidelines for school participation in 1998. Data are sub ject to appreciable nonresponse bias.
${ }^{6}$ Did not meet one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
${ }^{7}$ Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2002, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Reading Assessments, retrieved November 11, 2015, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2015.)

Table 221.70. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and
percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2015
[Standard errors appear in parentheses]

\#Rounds to zero.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
'Scale ranges from 0 to 500.
${ }^{2}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
${ }^{3}$ Proficient represents solid academic performance. Students reaching this level have demon-
strated competency over challenging subject matter.

NOTE: The results for English language learners are based on students who were assessed and cannot be generalized to the total population of such students. Although testing accommodations were permitted, some English language learners did not have a sufficient level of Engish proficiency to participate in the 2015 Reading Assessment.

## -Not available. <br> $\dagger$ Not applicable.

${ }^{1}$ In 2004, two assessments were conducted-one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 12 are for the format that was used in previous assessment years, while the 2004 data in column 13 are for the revised format. In subsequent years, only the revised format was used.
${ }^{2}$ Data for 1971 include persons of Hispanic ethnicity.
${ }^{3}$ Test scores of Hispanics were not tabulated separately.
NOTE: Scale ranges from 0 to 500 . Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for
specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 2 to 5 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately.

-Not available.
$\dagger$ Not applicable.
\#Rounds to zero
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.
${ }^{2}$ Accommodations were not permitted for this assessment.
${ }^{3}$ Because of major changes to the framework and content of the grade 12 assessment, scores from 2005 and later assessment years cannot be compared with scores from earlier assessment years. Therefore, this table does not include scores from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to scale score comparisons between earlier years, see the Digest of Education Statistics 2009, table 138 (http://nces.ed.gov/programs/digest/d09/tables/dt09 138.asp).

NOTE: For the grade 4 and grade 8 assessments, the scale ranges from 0 to 500 . For the grade 12 assessment, the scale ranges from 0 to 300 . Includes public and private schools. For 1996 and later years, includes students tested with accommodations ( 1 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Mathematics Assessments, retrieved June 10, 2016, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared June 2016.)

## -Not available.

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).
${ }^{2}$ For the grade 4 and grade 8 assessments, the scale ranges from 0 to 500 . For the grade 12 assessment, the scale ranges from 0 to 300 .
${ }^{3}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
${ }^{4}$ Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
${ }^{5}$ Accommodations were not permitted for this assessment.
${ }^{6}$ Because of major changes to the framework and content of the grade 12 assessment, results from 2005 and later assessment years cannot be compared with results from earlier
assessment years. Therefore, this table does not include results from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to comparisons between earlier years, see the Digest of Education Statistics 2009, table 138 (http:/l nces.ed. gov/programs/digest/d09/tables/dt09 138.asp).
NOTE: Includes public and private schools. For 1996 and later years, includes students tested with accommodations ( 1 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 1 to 4 percent of all students).
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Mathematics Assessments, retrieved August 10, 2016, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata). (This table was prepared August 2016.)

## $\dagger$ Not applicable

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Scale ranges from 0 to 300
${ }^{2}$ Based on student reports. The category of students whose parents have an unknown level of education is not shown, although data for these students is included in table totals.
NOTE: Includes public and private schools. Includes students tested with accommodations (9 percent of all 12th-grade students); excludes only those students with disabilities and English language learners who were unable to be tested even with
accommodations ( 2 percent of all 12 th-grade students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOUR (NAEP), 2015 Mathematics Asse, National Center for Education Statistics, National Assessment of Educational Prog, from the Main NAEP Data Explorer (http:// nces.ed.gov/nationsreportcard/naepdata). (This table was prepared August 2016.)

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
Includes basic math, general math, applied math, prealgebra, and algebra I.
${ }^{2}$ Includes courses such as actuarial sciences, pure mathematics, discrete math, and advanced functions and modeling.
${ }^{3}$ Includes other racial/ethnic groups not shown separately, as well as students for whom information on race/ethnicity or sex was missing.
${ }^{4}$ SD estimates include both students with an Individualized Education Plan (IEP) and students with a plan under Section 504 of the Rehabilitation Act (a " 504 plan"). IEPs are only for students who require specialized instruction, whereas 504 plans apply to students who require accommodations but may not require specialized instruction.

NOTE: Scale ranges from 0 to 300 . Includes students tested with accommodations ( 6 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (3 percent of all 12th-graders). For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity.

${ }^{1}$ 'Scale ranges from 0 to 500
item, students could eit" was one item on a list preceded by the question "Do you have the following in your home?" For each as having no internet access at "Yes" or leave the item blank. Students who left "Access to the Internet" blank are counted ${ }^{3}$ The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

Based on a variable that includes five categories: Pubic, Other private, Catholic, Bureau of Indian Education, and Depart ment of Defense. Bureau of Indian Education and Department of Defense were omitted from this table, and Other private and Catholic were collapsed to create the Private category.
NOTE: Includes students tested with accommodations ( 14 percent of all 4th-graders and 12 percent of all 8 th-graders); excludations (2 percent of all students at both grades). Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

## -Not available.

$\ddagger$ Reporting standards not met. Participation rates fell below the required standards for $\ddagger$ Reporting
reporting.
${ }^{1}$ Scale ranges from 0 to 500 .
${ }^{2}$ Accommodations were not permitted for this assessment.
${ }^{3}$ The 1996 data in this table do not include students who were tested with accommodations. Data for students tested with accommodations are not available at the state level for 1996. ${ }^{4}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.
${ }^{5}$ Proficient represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
${ }^{6}$ Advanced signifies superior performance.
${ }^{7}$ Did not meet one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.
${ }^{8}$ Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
${ }^{9}$ Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Mathematics Assessments, retrieved November 4, 2015, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2015.)

Table 222.60. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1990 through 2015
[Standard errors appear in parentheses]

[^50]${ }^{8}$ Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
${ }^{9}$ Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, 2013, and 2015 Mathematics Assessments, retrieved October 29, 2015, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2015.)

Table 222.80. Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining selected mathematics achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, 2013, and 2015
[Standard errors appear in parentheses]

## -Not available.

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Scale ranges from 0 to 500 .
${ }^{2}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
${ }^{3}$ Proficient represents solid academic performance. Students reaching this level have demon-
strated competency over challenging subject matter.
${ }^{4}$ Includes public school students from all cities in the nation with populations of 250,000 or more, including the participating districts.
NOTE: Race categories exclude persons of Hispanic ethnicity. Totals include racial/ethnic groups not shown separately.

$\dagger$ Not applicable.
\#Rounds to zero.
${ }^{1}$ In 2004, two assessments were conducted-one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 11 are for the format that was used in previous assessment years, while the 2004 data in column 12 are for the revised format. In subsequent years, only the revised format was used. NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) know some basic addition and subtraction facts. Students scoring 200 have a considerable understanding of twodigit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning and problem solving
involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), NAEP 2012 Trends in Academic Progress; and 2012 NAEP Long-Term Trend Mathematics Assessment, retrieved August 29, 2013, from Long-Term Trend NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared August 2013.)

Table 222.95. National Assessment of Educational Progress (NAEP) mathematics performance of 17 -year-olds, by highest mathematics course
taken, sex, and race/ethnicity: Selected years, 1978 through 2012

$\dagger$ Not applicable．
$\ddagger$ Reporting standards not met（too few cases for a reliable estimate）．
${ }^{1}$ Scale ranges from 0 to 300 for all three grades，but scores cannot be compared across grades．For example，the average score of 166 for White 4th－graders in 2015 does not denote higher performance than the score of 160 for White 12th－graders．
${ }^{2}$ Prior to 2011，students in the＂Two or more races＂category were categorized as＂Unclassified．＂
${ }^{3}$ The student with disability（SD）variable used in this table includes students who have a 504 plan，even if they do not have an Individualized Education Plan（IEP）．
${ }^{4}$ The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high．For example， 10 percent of students scored at or below the 10th percentile score，while 90 percent of students scored above it．
${ }^{5}$ The standard deviation provides an indication of how much the test scores varied．The lower the standard deviation，the closer the scores were clustered around the average score．About two－thirds of the student scores can be expected to fall within the range of one standard devi－ ation above and one standard deviation below the average score．In 2015，for example，the average score for all 4th－graders was 154，and the standard deviation was 35 ．This means
that one would expect about two－thirds of the students to have scores between 189 （one standard deviation above the average）and 119 （one standard deviation below）．Standard errors also must be taken into account when making comparisons of these ranges．
${ }^{6}$ Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work．
${ }^{7}$ Proficient represents solid academic performance．Students reaching this level have demon－ strated competency over challenging subject matter．
${ }^{8}$ Advanced signifies superior performance．
NOTE：In 2011，only 8th－grade students were assessed in science．Includes students tested with accommodations（ 7 to 14 percent of all students，depending on grade level and year）； excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations（ 1 to 3 percent of all students）．Race catego－ ries exclude persons of Hispanic ethnicity．
SOURCE：U．S．Department of Education，National Center for Education Statistics，National Assessment of Educational Progress（NAEP），2009，2011，and 2015 Science Assess－ ments，retrieved January 10，2017，from the Main NAEP Data Explorer（http：／／nces．ed．gov／ nationsreportcard／naepdata／）．（This table was prepared January 2017．）

## Table 223.20. Average National Assessment of Educational Progress (NAEP) science scale scores of 4th- and 8th-grade public school students, by race/ethnicity and state: 2009, 2011, and 2015

[Standard errors appear in parentheses]

| State | 4th-graders |  |  |  |  |  | 8th-graders |  |  |  |  |  |  |  |  |  |

## -Not available.

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
NOTE: In 2011, only 8th-grade students were assessed in science. Scale ranges from 0 to 300. Includes students tested with accommodations (10 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 2 per-
cent of all students). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

$\dagger$ Not applicable.
Reporting standards not met (too few cases for a reliable estimate)
Scale ranges from 0 to 300
"Access to the Internet" was one item on a list preceded by the question "Do you have the following in your home?" For each item, students could either select "Yes" or leave the item blank. Students who left "Access to the Internet" blank are counted The student with disabilitys at home Individualized Education Plan (IEP).

Based on a variable that includes five categories: Public, Other private, Catholic, Bureau of Indian Education, and Department of Defense. Bureau of Indian Education and Department of Defense were omitted from this table, and Other private and Catholic were collapsed to create the Private category.
NOTE: Includes students tested with accommodations ( 14 percent of all 4th-graders and 10 percent of all 8 th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 1 percent of all students at both grades). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals SOURCE: U.S. Depa
ress (NAEP), 2015 Science Assessmen, National Center for Education from the Main NAEP Data Explorer (http://nces.ed.gov/ nationsreportcard/naepdata). (This table was prepared November 2016.)

## $\dagger$ Not applicable.

\#Rounds to zero.
Scale ranges from 0 to 300 for both music and visual arts.
${ }^{2}$ Based on principals' responses to the following question: "How often does a typical eighth-grade student in your school receive instruction in each of the following subjects?
${ }^{3}$ Students were asked to analyze, interpret, or critique a piece of music that they listened to or to describe the social, historical, or cultural context of a piece of music.
${ }^{4}$ Students were asked to analyze, describe, or judge works of art and design to show understanding of form, aesthetics, and
cultural or historical context.
${ }^{5}$ For columns $2,14,15$, and 16 , refers to music instruction. For column 3 , refers to visual arts instruction.
NOTE: Includes students tested with accommodations ( 10 percent of all 8 th-graders for visual arts and 11 percent for music); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations ( 2 percent of all 8 th-graders both for visual arts and for music). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2016 Arts Assessment, retrieved May 11, 2017, from the Main NAEP Data Explorer (http://nces.ed.gov/ Progress (NAEP), 2016 Arts Assessment, retrieved May 11, 2017,
nationsreportcard/naepdata/). (This table was prepared May 2017.)

Table 224.70. Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score of 8th-graders, their scores on the three TEL content areas, and percentage attaining TEL achievement levels, by selected student and school characteristics: 2014
[Standard errors appear in parentheses]

Table 224.73. Average scale score of 8th-graders on the information and communication technology (ICT) content area of the National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) assessment and percentage distribution of 8th-graders, by computer use and internet access at home and other selected characteristics: 2014
[Standard errors appear in parentheses]

## Rounds to zer

$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
'Scale ranges from 0 to 300. Information and communication technology (ICT) is one of three content areas on the TEL assessment. The ICT content area covers software and systems used for accessing, creating, and communicating information, and for facilitating creative expression
Aem, students could either select "Ys" a list preceded by the question "Do you have the following in your home?" For each " or leave the item blank. Students who left "Access to the Internet" blank are counted as having no internet access at home.
${ }^{3}$ The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP)
NOTE: Includes students tested with accommodations (10 percent of all 8th-graders), excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 percent of all 8th-graders). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

Table 225.10. Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009 [Standard errors appear in parentheses]

See notes at end of table.

Table 225.10. Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009—Continued
[Standard errors appear in parentheses]

-Not available.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
${ }^{1}$ Includes occupational education in agriculture; business and marketing; communications and design; computer and information sciences; construction and architecture; engineering technologies; health sciences; manufacturing; repair and transportation; and personal, public, and legal services. Does not include general labor market preparation courses and family and consumer ${ }_{2}$ Includes general labor mark
Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses
not included in other academic subject fields. Some personal-use courses are also included in the Career/technical (occupational) education column and the Labor market, family, and consumer education column.

Includes all science credits earned outside of biology, chemistry, and physics.
NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1 -year course. Data
differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.

$\dagger$ Not applicable
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
${ }^{1}$ Includes Carnegie units earned in all occupational education courses. This table does not include general labor market preparation courses and family and consumer sciences education courses.
${ }^{2}$ Total includes other racial/ethnic groups not separately shown.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1 -year course. Data may differ from figures appearing in other NCES reports because of differences in course taxonomies and/or inclusion criteria. The analysis was restricted to graduates who attained either a standard or honors diploma and whose transcripts reflected a total of 16 or more Carnegie credits, with credits in English making up some part of the total. Race categories exclude persons of HisSOURCE: U.S. Department of Education, National Center for Education Statistics, 2000, 2005, and 2009 High School Transcript Study (HSTS). (This table was prepared September 2011.)

# Table 225.30. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2009

## Notapplicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percen
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greate
${ }^{1}$ 'For each course category, percentages include only students who earned at least the number of credits shown in parentheses. ${ }^{2}$ Excludes prealgebra.
${ }^{4}$ For 2000 and later years, includes International Baccalaureate (IB) courses in addition to Advanced Placement (AP) and honors courses.
Percentages include only students who earned at least one credit in each of the indicated courses.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the student graduated with either a standard or honors diploma, (2) the student's transcript contained 16 or more Carnegie units, and (3) the student's transcript contained more han 0 Carnegie units in English courses. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1 -year course ( $0.5=$ one semester; $1.0=$ one academic year). Data differ slightly from figures appearing in other National Center for Education Statistics reports because of differences in taxonomies and case exclusion criSome data have been revised from previously published figures. !Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
Average credits earned are shown only for those graduates who earned any credit in the specified language while in high school. For these students, however, credits earned include both courses taken in high school and courses taken prior to entering high school. Credits are
shown in Carnegie units. The Carnegie unit is a standard unit of measurement that represents one credit for the completion of a 1-year course
NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more han 0 Carnegie credits in English courses.

! Interpret aplata with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed population, or the changes could be due to the mode change from telephone to mail. Includes children enrolled in kindergarten through grade 12. Excludes children whose programs have no classes with lettered grades. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2007, and 2012). (This table was prepared Sep-
tember 2014.)

$\dagger$ Not applicable
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate)
${ }^{1}$ Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data are as of October of each year. Excludes students who were reported as being in a higher grade the previous year than the given year. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.
table was prepared July 2016.)

## -Not available.

${ }^{1}$ Data for $1966-67$ to 1985-86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986-87 to 1994-95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995-96 to 1998-99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean From 1999-2000 on, all scores have been reported on the recentered scale.
${ }^{2}$ The SAT writing section was introduced in March 2005.
${ }^{3}$ Data for 2015-16 seniors cannot be compared to data for previous graduating cohorts because the 2015-16 data include testing only through January of the senior year and graduating cohort membership was also calculated differently.
NOTE: Data for 1966-67 through 1970-71 are estimates derived from the test scores of all participants. Data for 1971-72 through 2009-10 are for seniors who took the SAT at any time
during their high school years through March of their senior year. Data for 2010-11 through 2014-15 are for seniors who took the SAT at any time during their high school years through June of their senior year. Data for 2015-16 are for seniors who took the SAT at any time during their high school years through the January 2016 administration, which was the final administration prior to a major test redesign; because of the smaller number of test administrations and other differences, the 2015-16 data are not comparable to data for earlier years. For all data years, if a student took the SAT more than once, the most recent score on each section was used. Possible scores on each section of the SAT range from 200 to 800 . Prior to 2006, the critical reading section was known as the verbal section. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test.

$\dagger$ \#Not applicable.
${ }^{1}$ Data for 2015-16 seniors cannot be compared to data for previous graduating cohorts because the 2015-16 data include testing only through January of the senior year and graduating cohort membership was also calculated differently
${ }^{2}$ Since 2005-06, the College Board has reported third, fourth, and fifth quintiles as the bottom three quintiles instead of reporting them tely as in previous years.
${ }^{3}$ Data may not be comparable over time because of additions to the list of majors and changes in subspecialties within majors.
Prior to 2006-07, family and consumer sciences/human sciences was called home economics.
NOTE: Prior to 2010-11, data are for seniors who took the SAT at any time during their high school years through March of their senior year. Data for 2010-11 through 2014-15 are for seniors who took the SAT at any time during their high school years through

June of their senior year. Data for 2015-16 are for seniors who took the SAT at any time during their high school years through the January 2016 administration, which was the final administration prior to a major test redesign; because of the smaller number of test administrations and other differences, the 2015-16 data are not comparable to data for earier years. For all data years, if a student took the SAT more than once, the most recent score on each section was used. Possible scores on each section of the SAT range from 200 to 800 . Prior to 2006, the critical reading section was known as the verbal section. The writing section was introduced in to totals because of rounding. ${ }^{1}$ Data for 2015-16 seniors cannot be compared to data for previous graduating cohorts because the 2015-16 data include testing only through January of the senior year and graduating cohort membership was also calculated differently.
${ }^{2}$ Members of the graduating class who had taken the SAT as a percentage of the total number of high school graduates. State percentages were calculated by the College Entrance Examination Board based on the number of high school graduates in each state as pro jected by the Western Interstate Commission for Higher Education (WICHE). The total percentage for the United States was calculated by the National Center for Education Statistics (NCES) based on NCES projections of the total number of U.S. high school graduates. The percentage of the 2015-16 graduating class taking the SAT was not calculated because the data for 2015-16 are not comparable to the data for prior years.
${ }^{3}$ The SAT is administered to all public high school juniors in Delaware (as of spring 2011), the District of Columbia (as of spring 2013), and Idaho (as of spring 2012).
${ }^{4}$ Participation rate is based on self-reported 12th-grade enrollment from the District of Columbia's public and nonpublic schools because WICHE estimated fewer graduating seniors than actual SAT test takers.
${ }^{5}$ Beginning with the spring SAT administration in 2006, all Maine high school juniors, including all students in their third year of high school, are required to take the SAT.
NOTE: Data for 2005-06 and earlier years are for seniors who took the SAT at any time during their high school years through March of their senior year. Data for 2010-11 through 2014-15 are for seniors who took the SAT at any time during their high school years through June of their senior year. Data for 2015-16 are for seniors who took the SAT at any time during their high school years through the January 2016 administration, which was the final administration prior to a major test redesign; because of the smaller number of test administrations and other differences, the 2015-16 data are not comparable to data for earlier years. For all data years, if a student took the SAT more than once, the most recent score on each section was used. Possible scores on each section of the SAT range from 200 to 800 . Prior to 2006, the critical reading section was known as the verbal section. The writing section was introduced in March 2005. The SAT was formerly known as the Scholastic Assessment Test or the Scholastic Aptitude Test.

－Not available．
${ }^{1}$ Those members of the graduating class who had taken the ACT test as a percentage of all students who graduated in that school year．For example，the 2016 column shows test－taking members of the class of 2016 as a percentage of all 2015－16 high school graduates．Per－ centages were calculated by the National Center for Education Statistics（NCES）using NCES data on the total number of high school graduates．
${ }^{2}$ Number of high school graduates is projected．
${ }^{3}$ Minimum score is 1 and maximum score is 36 ．
${ }^{4}$ The science，technology，engineering，and mathematics（STEM）score is derived from stu－ dents＇scores on the ACT mathematics and science tests．The STEM score was developed to gauge students＇overall proficiency in mathematics and science．
${ }^{5}$ Standard deviations not available for racial／ethnic groups．
${ }^{6}$ For years prior to 2011，includes business and management，business and office，and mar－ keting and distribution．
${ }^{7}$ For years prior to 2011，includes education and teacher education．

Includes engineering as well as engineering technology and drafting．
Includes social sciences and philosophy，religion，and theology．For 2011 and later years， also includes law．
NOTE：Data are for high school graduates who took the ACT test during their sophomore， junior，or senior year．If a student took the ACT test more than once，the composite and subject－area scores from the most recent test were used．Race categories exclude persons of Hispanic ethnicity．Some data have been revised from previously published figures SOURCE：ACT，High School Profile Report，selected years， 1995 through 2016．U．S．Depart－ ment of Education，National Center for Education Statistics，Common Core of Data（CCD）， ＂State Nonfiscal Survey of Public Elementary／Secondary Education，＂1995－96 through 2009－10；＂State Dropout and Completion Data File，＂2005－06 through 2012－13；Public School Graduates and Dropouts from the Common Core of Data，2007－08 and 2008－09；Pri－ vate School Universe Survey（PSS）， 1995 through 2013；and National High School Gradu－ ates Projection Model，1972－73 through 2026－27．（This table was prepared May 2017．）

Table 226.60. Average ACT scores and percentage of graduates taking the ACT, by state: 2012 and 2016

| State | 2012 |  |  |  |  | 2016 |  |  |  |  | Percent taking ACT ${ }^{1}$ |  |

${ }^{1}$ Members of the graduating class who had taken the ACT test as a percentage of the total number of high school graduates. For example, the 2016 column shows test-taking members of the class of 2016 as a percentage of all 2015-16 high school graduates. State percentages were calculated by ACT based on the number of high school graduates in each state as projected by the Western Interstate Commission for Higher Education (WICHE). Total percentages for the United States were calculated by the National Center for Education Statistics (NCES) based on the total number of U.S. high school graduates as reported by NCES (for 2016, the number of public and private graduates is projected; for 2012, only the number of private school graduates is projected).

NOTE: The minimum score on the ACT is 1 and maximum score is 36 . Data are for high school graduates who took the ACT test during their sophomore, junior, or senior year. If a student took the ACT test more than once, the composite and subject-area scores from the most recent test were used.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
'Students could indicate that they participated in clubs, competitions, camps, study groups, or tutoring programs.
${ }^{2}$ Academic instruction outside of school such as from a Saturday academy, learning center, personal tutor, or summer school program.

NOTE: Data on school-sponsored activities are based on student responses and are weighted by W1STUDENT. Student reports about school-sponsored activities refer to the period "since the beginning of the last school year," which for most of
these students was 8 th grade or the fall of 2008 . Data on non-school-sponsored activities are based on parent responses and are weighted by w1 grade, or the fall of 2008. Data on non-school-sponsored activities are based on parent responses egories exclude persons of Hispanic ethnicity

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 perent or greater.
The wording of the quent or orher household adut. 2007 to 2012. In 2007, parents responded "yes" or "no" to an item asking whether they check that homework is done. In 2012, parents responded to a multiple-choice question asking how often they check that homework is done, and the 2012 estimates include all parents who "rarely," "sometimes," or "always" check. Therefore, the 2007 and 2012 estimates are not comparable.
${ }^{3}$ 3Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collecold; and nonpoor children are those whose family incos ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty
threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $\$ 22,811$. Survey respondents are aske to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of NOTE: While National Household
phone with an interviewer, NHES:2012 ution Surveys Program (NHES) administrations prior to 2012 were administered via teleMeasurable differences in estimates between 2012 and prior years could reflect actual chairg that were mailed to respondents. could be due to the mode change from telephone to mail. Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled students. Data based on responses of the parent most knowledgeable about the student's education. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. ${ }^{1}$ A school-associated violent death is defined as "a homicide, suicide, or legal intervention (involving a law enforcement officer), in which the fatal injury occurred on the campus of a functioning elementary or secondary school in the United States," while the victim was on the way to or from regular sessions at school, or while the victim was attending or traveling to or from an official school-sponsored event.
${ }^{2}$ Violent deaths for which the manner was undetermined; that is, the information pointing to one manner of death was no more compelling than the information pointing to one or more other competing manners of death when all available information was considered.
3"At school" includes on school property, on the way to or from regular sessions at school, and while attending or traveling to or from a school-sponsored event.
${ }^{4}$ Total youth suicides are reported for calendar years 1992 through 2013 (instead of school years 1992-93 through 2013-14).
${ }^{5}$ Data from 1999-2000 onward are subject to change until law enforcement reports have been obtained and interviews with school and law enforcement officials have been completed. The details learned during the interviews can occasionally change the classification of a case. NOTE: Unless otherwise noted, data are reported for the school year, defined as July 1 through June 30.
SOURCE: Centers for Disease Control and Prevention (CDC), 1992-2014 School-Associated Violent Death Surveillance System (SAVD-SS) (partially funded by the U.S. Department of Education, Office of Safe and Healthy Students), previously unpublished tabulation (November 2016); CDC, National Center for Injury Prevention and Control, Web-based Injury Statistics Query and Reporting System Fatal (WISQARS ${ }^{\text {TM }}$ Fatal), 1999-2013, retrieved July 2016 from http://www.cdc.gov/injury/wisqars/index.html; and Federal Bureau of Investigation and Bureau of Justice Statistics, Supplementary Homicide Reports (SHR), preliminary data (August 2016). (This table was prepared November 2016.)

Table 228.20. Number of nonfatal victimizations against students ages $12-18$ and rate of victimization per 1,000 students, by type of victimization and location: 1992 through 2015
[Standard errors appear in parentheses]

Table 228.25. Number of nonfatal victimizations against students ages 12-18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2015
[Standard errors appear in parentheses]

## -Not available.

!!nterpret data with caution. Estimate based on 10 or fewer sample cases, or the coefficient of variation is greater than 50 percen Serious violent victimization is also included in all violent victimization.
2"At school" includes inside the school building, on school property, and on the way to and from school
${ }^{3}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes Asians, Pacific Islanders, American Indians/Alaska Natives, and persons of Two or more races.
"Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census
 ization, 2015 (NCJ 250180, October 2016).

NOTE: "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "All violent victimization" includes serious violent crimes as well as simple assault. "Theff" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Total victimization" includes theft and violent crimes. Data in this table are from the National Crime victimization Survey (NCVS) and are reported in accordance with Bureau of Justice Statistics
standards. Detail may not sum to totals because of rounding and missing data on student characteristics. The population size for students ages $12-18$ was $25,581,700$ in 2015 .
SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, National Crime Victimization Survey (NCVS), 2015. (This table was prepared August 2016.)

Table 228.30. Percentage of students ages 12-18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2015
[Standard errors appear in parentheses]

## -Not available.

\#Rounds to zero.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/ Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.
${ }^{2}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
${ }^{3}$ Serious violent victimization is also included in violent victimization.
NOTE: "Total victimization" includes theft and violent victimization. A single student could report more than one type of victimization. In the total victimization section, students who reported both theft and violent victimization are counted only once. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "Violent victimization" includes the serious violent crimes as well as simple assault. "At school" includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school.

†Not applicable
Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ 'Race categories exclude persons of Hispanic ethnicity.

Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
NOTE: Survey respondents were asked about being threatened or injured "with a weapon such as a gun, knife, or club on school property." "On school property" was not defined for respondents. Detail may not sum to totals because of rounding. lance System (YRBSS), 1993 through 2015. (This table was prepared June 2016.)

Table 228.50. Percentage of public school students in grades $9-12$ who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by state: Selected years, 2003 through 2015

## $\dagger$ Not applicable.

${ }^{1}$ For the U.S. total, data for all years include both public and private schools and were col
lected through a national survey representing the entire country.
${ }^{2}$ Ohio data for 2003 through 2013 include both public and private schools.
${ }^{3}$ South Dakota data for all years include both public and private schools.
${ }^{4}$ Vermont data for 2013 include both public and private schools.
NOTE: Survey respondents were asked about being threatened or injured "with a weapon such as a gun, knife, or club on school property." "On school property" was not defined for respondents. For the U.S. total, data for all years include both public and private schools.

State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate). SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2003 through 2015. (This table was prepared June 2016.)

Table 228.70. Number and percentage of public and private school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher and school characteristics: Selected years, 1993-94 through 2011-12
[Standard errors appear in parentheses]

[^54]3 noludes traditional public and public charter schools.
NOTE: Teachers who taught only prekindergarten students are excluded. Instructional level divides teachers into elementary or secondary based on a combination of the grades taught, main teaching assignment, and the structure of the teachers' class(es). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File" and "Private School Teacher Data File," 1993-94, 1999-2000, 2003-04, 2007-08, and 2011-12; and "Charter School Teacher Data File," 1999-2000. (This table was prepared October 2013.)

Table 228.80. Percentage of public school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by state: Selected years, 1993-94 through 2011-12
[Standard errors appear in parentheses]

Unterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
${ }^{1}$ Bullying was defined for respondents as "when one or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again""
2"On school property" was not defined for survey respondents
Being electronically bullied includes "being bullied through e-mail, chat rooms, instant messaging, websites, or texting. The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times or how many days they engaged in the specified behavior.
${ }^{5}$ Survey respondents were asked about being threatened or injured "with a weapon such as a gun, knife, or club." ${ }^{6}$ Respondents were asked about carrying "a weapon such as a gun, knife or club"
NOTE: Students were asked which sexual orientation-"heterosexual (straight)," "gay or lesbian," "bisexual," or "not sure"-
veillance System (YRBSS) Coase Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Sur veillance System (YRBSS), 2015. (This table was prepared September 2016.

Table 229.10. Percentage of public schools recording incidents of crime at school and reporting incidents to police, number of incidents, and rate per 1,000 students, by type of crime: Selected years, 1999-2000 through 2013-14
[Standard errors appear in parentheses]

[^55]${ }^{5}$ Caution should be used when making direct comparisons of "Other incidents" between years because the survey questions about alcohol and drugs changed, as outlined in footnotes 6, 7, and 8.
${ }^{6}$ The survey items "Distribution of illegal drugs" and "Possession or use of alcohol or illegal drugs" appear only on the 1999-2000 and 2003-04 questionnaires. Different alcohol- and drug-related survey items were used on the questionnaires for later years. "The survey items "Distribution, possession, or use of illegal drugs" and "Distribution, possession, or use of alcohol" appear only on ${ }^{8}$ The 2009-10 questionnaire was the first to include
NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, and after
normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding and normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding and
because schools that recorded or reported more than one type of crime incident were counted only once in the total percentage of schools recording or reporting incidents.

! Interpret data with
Reporting standards caution. The coefficient of variation (CV) for this estimate is 30 percent or greater.
${ }^{1}$ Theft/larceny (taking things worth over $\$ 10$ without personal confrontation) includes pocket picking, stealing a purse or backpack (if left unattended or if no force was used to take it from owner), theft from a building, theft from a motor vehicle or of motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts.
2This table shows only the "Other incidents"" hat were included on the 2009-10 questionnaire. In 1999-2000, most of the
"Other incidents" differed from those shown in this table.

NOTE: "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places holding school-sponsored events or activities. Includes incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Primary schools are defined as schools in which the lowest grade
is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. All public schools also includes schools with other combinations of grades (including K-12 schools), which are not shown separately. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999-2000 and 2009-10 School Survey on Crime and Safety (SSOCS), 2000 and 2010. (This table was prepared August 2011.)

Table 229.30. Percentage of public schools recording violent incidents of crime at school, number of incidents, and rate per 1,000 students, by category of violent incident and selected school characteristics: 2009-10 and 2013-14
[Standard errors appear in parentheses]

†Not applicable.
!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Data for 2013-14 were collected using the Fast Response Survey System, while data for 2009-10 were collected using the School Survey on Crime and Safety (SSOCS). The 2013-14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013-14 survey could choose either to complete the survey on paper (and mail it back) or to complete the sur-
vey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013-14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013-14 results. ${ }^{2}$ All violent incidents include serious violent incidents (see footnote 3 ) as well as physical attack or fight without a weapon and threat of physical attack without a weapon
of physical attack without a weapon.
${ }^{3}$ Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.
${ }^{4}$ The 2013-14 survey collected neither school enrollment counts nor data on the percentage of students eligible for free or reduced-price lunch. For 2013-14, the rate per 1,000 students was calculated by dividing the number of incidents by the total
number of students obtained from the Common Core of Data (CCD). For 2013-14, the classification of schools by the percentage of students eligible for free or reduced-price lunch was also computed from CCD data.
 than grade 8 . Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools. Separate data on high schools and combined schools are not available for 2013-14.
NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that
hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

(This table was prepared September 2015.)

Table 229.40. Percentage of public schools reporting incidents of crime at school to the police, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2009-10
[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
${ }^{1}$ All violent incidents include serious violent incidents (see footnote 2) as well as physical attack or fight without a weapon and reat of physical attack without a weapon.
${ }^{2}$ Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical tack with a weapon, and robbery with or without a weapon.
Thellarceny (taking things worth over $\$ 10$ without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm." This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.
"Other incidents" include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, posses Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest gandalism. than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is
not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K - 12 schools. ${ }^{6}$ Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common of Data (CCD), the sampling frame for SSOCS
"At school" was defined to include activities that happen in schoos tuildings on school that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
than grade 8. Middle schools are schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest
grade is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools.
${ }^{2}$ Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of
full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.
NOTE: Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon. Responses were provided by the principal or
the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2009-10 School Survey on Crime and Safety (SSOCS), 2010. (This table was prepared September 2013.)

cent or greater.
an shade 8. Mide are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest
${ }^{\text {grade is not higher than grade } 12 \text {. Combined schools include all other combinations of grades, including } \mathrm{K}-12 \text { schools. }}{ }^{2}$ Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of
full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.
NOTE: Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon. Responses were provided by the principal or the person
most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Includes schools that reported the activity happens either at least once a week or daily.
${ }^{2}$ Includes schools that reported the activity happens at all at their school during the school year. In the 1999-2000 survey administration, the questionnaire specified "undesirable" gang activities and "undesirable" cult or extremist group activities. ${ }^{3}$ Prior to the 2007-08 survey administration, the questionnaire wording was "student racial tensions."
higher than grade 8. Middled as schools in which the lowest grade is not higher than grade 3 and the highest grade is not est grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools. Separate data on high schools and combined schools are not available for 2013-14.
${ }^{5}$ Data for 2013-14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013-14 survey was designed to allow comparisons with SSOCS
data. However, respondents to the 2013-14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013-14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have ${ }_{6}{ }_{6}$ Recause the 2013 results.
classification of schools by the percentage of students eligible for free or reduced-price lunch was computed based on data obtained from the Common Core of Data. NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the
school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that
were during normal school hours or when school activities or events were in session, unless the survey specified otherwise. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999-2000, 2003-04, 2005-06, 2007-08, and 2009-10 School Survey on Crime and Safety (SSOCS), 2000, 2004, 2006, 2008, and 2010; Fast Response Survey System (FRSS), "School Safety and Discipline: 2013-14," FRSS 106, 2014; and Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2013-14. (This table was prepared September 2015.)

Table 230.20. Percentage of students ages 12-18 who reported that gangs were present at school during the school year, by selected student and school characteristics and urbanicity: Selected years, 2001 through 2015
[Standard errors appear in parentheses]

$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
'Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.
${ }^{2}$ In 2005 and prior years, the period covered by the survey question was "during the last 6 months," whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.
NOTE: "Urbanicity" refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)", "in MSA but not in central city (Suburban)," and "not MSA (Rural)." All gangs, whether or not they are involved in violent or illegal activity, are included. "At school" includes in the school building, on school property, on a school bus, and going to and from school. timization Survey, 2001 through 2015. (This table was prepared August 2016.)

## $\dagger$ Not applicable.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Students who reported being called hate-related words were asked which specific characteristics these words were related to. If a student reported being called more than one type of hate-related word-e.g., a derogatory term related to race as well as a derogatory term related to sexual orientation-the student was counted only once in the total percentage of students who were the target of any hate-related words.
${ }^{2}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/

Alaska Natives, Pacific Islanders, and persons of Two or more races.
${ }^{3}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," "and not MSA (Rural)."
NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school. "Hate-related" refers to derogatory terms used by others in reference to students' personal characteristics.

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Students who reported experiencing more than one type of bullying at school were counted only once in the total for students bullied at school.
${ }^{2}$ In 2005 and prior years, the period covered by the survey question was "during the last 6 months," whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.
${ }^{3}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons of Two or more races.
${ }^{4}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an

MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." These data by metropolitan status were based on the location of households and differ from those published in Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey, which were based on the urban-centric measure of the location of the school that the child attended. ${ }^{5}$ Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey.
NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Includes only students who indicated the location of bullying. Excludes students who indicated that they were bullied but did not answer the question about where the bullying occurred.
${ }^{2}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/ Alaska Natives, Pacific Islanders, and persons of Two or more races.
${ }^{3}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school. In 2015, students who reported being bullied at school were also asked whether the bullying occurred "online or by text." Location totals may sum to more than 100 percent because students could have been bullied in more than one location.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and
the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including $\mathrm{K}-12$ schools.
${ }^{2}$ Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS
${ }^{3}$ "Violent incidents" include rape or attempted rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack or fight with or without a weapon, and robbery with or without a weapon. "At school" was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities and events were in session. NOTE: Includes schools reporting that cyber-bullying happens either "daily" or "at least once a week." "Cyber-bullying" was defined for respondents as occurring "when willful and repeated harm is inflicted through the use of computers, cell phones, or other electronic devices." Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Respondents were instructed to include cyber-bullying "problems that can occur anywhere (both at your school and away from school)."

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between
30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ In 2005 and prior years, the period covered by the survey question was "during the last 6 months," whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.
${ }^{2}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.
${ }^{3}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
NOTE: "At school" includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. Students were asked if they were "never," "almost never," "sometimes," or "most of the time" afraid that someone would attack or harm them at school or away from school. Students responding "sometimes" or most of the time" were considered afraid. For the 2001 survey only, the wording was changed from "attack or harm" to "attack or threaten to attack."

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ In 2005 and prior years, the period covered by the survey question was "during the last 6 months," whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.
${ }^{2}$ Students who reported both avoiding one or more places in school and avoiding school activities or classes were counted only once in the total for any avoidance.
${ }^{3}$ Students who reported avoiding multiple places in school were counted only once in the total for students avoiding one or more places.
${ }^{4}$ Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward,
persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.
${ }^{5}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
${ }^{6}$ Students who reported more than one type of avoidance of school activities or classese.g., reported that they avoided "any activities" and also reported that they stayed home from school-were counted only once in the total for avoiding activities or classes.
7Before 2007, students were asked whether they avoided "any extracurricular activities." Starting in 2007, the survey wording was changed to "any activities."
NOTE: Students were asked whether they avoided places or activities because they thought that someone might attack or harm them. For the 2001 survey only, the wording was changed from "attack or harm" to "attack or threaten to attack."

'Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12 and none of grades kindergarten through grade 6 . Combined elementary/secondary schools are included in totals but are not shown separately.
${ }^{2}$ Includes traditional public and public charter schools.
${ }^{3}$ Substantial improvements in geocoding technology and changes in the Office of Management and Budget's definition of metropolitan and nonmetropolitan areas allow for more precision in describing an area as of 2003-04. Comparisons with earlier years NOTE: Teachers who taught only prekindergarten students are excluded. Includes both teachers who "strongly" agreed and those who "somewhat" agreed that student misbehavior or student tardiness and class cutting interfered with their teaching. Some data have been revised from previously published figures.

Respondents were asked whether "rules for student behavior are consistently enforced by teachers in this school, even for students not in their classes.'
${ }^{3}$ Respondents were asked whether their "principal enforces school rules for student conduct and backs me up when I need it" schools have any of grades 7 through 12 and none of grades kindergarten through grade 6 . Combined elementary/secondary schools are included in totals but are not shown separately.

4 Includes traditional public and public charter schools. politan and nonmetronts in geocoding technology and changes in the Office of Management and Budget's definition of metroare not possible.
NOTE: Teachers who taught only prekindergarten students are excluded. Includes both teachers who "strongly" agreed and those who "somewhat" agreed that rules were enforced by other teachers and the principal. Some data have been revised from previously published figures.

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Respondents were asked whether "rules for student behavior are consistently enforced by teachers in this school, even for students not in their classes."
${ }^{2}$ Respondents were asked whether their "principal enforces school rules for student conduct
and backs me up when I need it."
NOTE: Teachers who taught only prekindergarten students are excluded. Includes traditional public and public charter school teachers. Includes both teachers who "strongly" agreed and those who "somewhat" agreed.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File," 2011-12. (This table was prepared July 2013.)

Table 231.10. Percentage of students in grades 9-12 who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2015
[Standard errors appear in parentheses]

## -Not available.

Hot applicable.
!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
${ }^{1}$ The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many
times in the past 12 months they had been in a physical fight.
${ }^{2}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{3}$ Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," in MSA but not in central city (Suburban)," and "not MSA (Rural)."
${ }^{5}$ In the question asking students about physical fights at school, "on school property" was not defined for survey respondents.
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance
System (YRBSS), 1993 through 2015. (This table was prepared June 2016.)

Table 231.20. Percentage distribution of students in grades 9 -12, by number of times they reported having been in a physical fight anywhere or on school property during the previous 12 months and selected student characteristics: 2015

[^58]NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2005 through 2015. (This table was prepared July 2016.)

Table 231.40. Percentage of students in grades 9-12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015

## -Not available.

INot applicable.
!!terpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
"The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.
Race categories exclude persons of Hispanic ethnicity.
${ }^{3}$ Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as
Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
${ }^{4}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
In the question asking students about carrying a weapon at school, "on school property" was not defined for survey respondents.

[^59]NOTE: Respondents were asked about carrying "a weapon such as a gun, knife, or club." For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2005 through 2015. (This table was prepared July 2016.)

Table 231.65. Number of incidents of students bringing firearms to or possessing firearms at a public school and rate of incidents per 100,000 students, by state: 2009-10 through 2014-15

## -Not available.

${ }^{1}$ Data for New York City Public Schools were not reported
${ }^{2}$ The state reported a total state-level firearm incident count that was less than the sum of its reported district-level counts. The sum of the district-level firearm incident counts is displayed instead of the reported state-level count.
NOTE: Separate counts were collected for incidents involving handguns, rifles/shotguns, other firearms, and multiple types of firearms. The counts reported here exclude the "other firearms" category.

$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
"The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many
days during the previous 30 days they had at least one drink of alcohol
${ }^{2}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{3}$ Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
Bureau. Cate Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."
${ }^{5}$ In the question about drinking alcohol at school, "on school property" was not defined for survey respondents. Data on alcohol use at school were not collected in 2013 and 2015
ention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2015. (This table was prepared July 2016.)

Table 232.20. Percentage distribution of students in grades 9-12, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015
[Standard errors appear in parentheses]

\#Rounds to zero.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.
${ }^{2}$ In the question about drinking alcohol at school, "on school property" was not defined for survey respondents.
${ }^{3}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{4}$ Data on alcohol use at school were not collected in 2013 and 2015.
NOTE: Detail may not sum to totals because of rounding.
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2009 through 2015. (This table was prepared July 2016.)

Table 232.30. Percentage of public school students in grades 9 - 12 who reported using alcohol at least 1 day during the previous 30 days, by location and state: Selected years, 2005 through 2015

[^60]${ }^{6}$ Vermont data for 2013 include both public and private schools.
NOTE: For the U.S. total, data for all years include both public and private schools. Statelevel data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2005 through 2015. (This table was prepared July 2016.)

Table 232.40. Percentage of students in grades 9-12 who reported using marijuana at least one time during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015

-Not available.
NNot applicable.
IInterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many
times during the previous 30 days they had used marijuana
2Race categories exclude persons of Hispanic ethnicity.
${ }^{3}$ Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural),"
${ }^{5}$ In the question about using marijuana at school, "on school property" was not defined for survey respondents. Data on marijuana use at school were not collected in 2013 and 2015
, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2015. (This table was prepared July 2016.)

Table 232.50. Percentage distribution of students in grades $9-12$, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015
[Standard errors appear in parentheses]

## -Not available.

$\dagger$ Not applicable.
\#Rounds to zero.
! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and
50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater
${ }^{1}$ The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.
${ }^{2}$ In the question about using marijuana at school, "on school property" was not defined for survey respondents.
${ }^{3}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{4}$ Data on marijuana use at school were not collected in 2013 and 2015.
NOTE: Detail may not sum to totals because of rounding.
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2009 through 2015. (This table was prepared July 2016.)

Table 232.70. Percentage of students in grades 9-12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2015
[Standard errors appear in parentheses]

-Not available.
$\dagger$ Not applicable.
!!nterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
Race categories exclude persons of Hispanic ethnicity.
${ }^{2}$ Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as
Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.
${ }^{3}$ Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural),"

## - Not available.

$\dagger$ Not applicable.
${ }^{1}$ For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.
${ }^{2}$ Ohio data for 2003 through 2013 include both public and private schools.
${ }^{3}$ South Dakota data for all years include both public and private schools.
${ }^{4}$ Vermont data for 2013 include both public and private schools.
NOTE: "On school property" was not defined for survey respondents. For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years
include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).
SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2003 through 2015. (This table was prepared June 2016.)

Table 232.90. Percentage of high school seniors reporting use of alcohol and illicit drugs, by frequency of use and substance used: Selected years, 1975 through 2016
[Standard errors appear in parentheses]

- Not available.

Not applicable.
1Survey question changed in 1993; later data are not comparable to figures for earlier years.
${ }^{2}$ Other illicit drugs include any use of LSD or other hallucinogens, crack or other cocaine, or heroin, or any use of other narcotics,
amphetamines, barbiturates, or tranquilizers not under a doctor's orders.

NOTE: Detail may not sum to totals because of rounding. Standard errors were calculated from formulas to perform trend analysis over an interval greater than 1 year (for example, a comparison between 1975 and 1990). A revised questionnaire was used in
1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.
SOURCE: University of Michigan, Institute for Social Research, Monitoring the Future, selected years, 1975 through 2016, retrieved April 20, 2017, from http://monitoringthefuture.org/data/data.html. (This table was prepared April 2017.)

Table 232.95. Percentage of 12- to 17-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1985 through 2015
[Standard errors appear in parentheses]

! Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
1Prior to 2005-06, the questionnaire wording was simply "a weapon other than a firearm" (instead of "a weapon other than a firearm or explosive device").
${ }^{2}$ In the 1999-2000 questionnaire, only two items are the same as in questionnaires for later years-the item on physical attacks or fights and the item on insubordination. There are no comparable 1999-2000 data for serious disciplinary the listed offenses.
3Totals for 2009-10 are not comparable to totals for other years, because the 2009-10 questionnaire did not include an ${ }^{3}$ Totals for 2009-10
item on insubordination
${ }^{4}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is
not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower grades, including $\mathrm{K}-12$ schools. NOTE: Serious disciplinary actions include out-of-school suspensions lasting 5 or more days, but less than
der of the school year; removals with no continuing services for at least the remainder of the school year; and transfers de specialized schools for disciplinary reasons. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session, unless the survey specified other-
wise. Detail may not sum to totals because of rounding and because schools that reported serious disciplinary actions in response to more than one type of offense were counted only once in the total number or percentage of schools. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999-2000, 2003-04, 2005-06, 2007-08, and 2009-10 School Survey on Crime and Safety (SSOCS), 2000, 2004, 2006, 2008, and 2010. (This table was prepared September 2013.)

Table 233.25. Number and percentage of fall 2009 ninth-graders who were ever suspended or expelled through spring 2012, by when student was suspended or expelled and selected student characteristics: 2013
[Standard errors appear in parentheses]

${ }^{1}$ Corporal punishment is paddling, spanking, or other forms of physical punishment imposed on a student.
${ }^{2} \mathrm{An}$ in-school suspension is an instance in which a student is temporarily removed from his or her regular classroom(s) for at least half a day but remains under the direct supervision of school personnel.
${ }^{3}$ For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.
${ }^{4}$ Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.
${ }^{5}$ Referral to law enforcement is an action by which a student is reported to any law enforcement agency or official, including a school police unit, for an incident that occurs on school
grounds, during school-related events, or while taking school transportation, regardless of whether official action is taken.
${ }^{6}$ A school-related arrest is an arrest of a student for any activity conducted on school grounds, during off-campus school activities (including while taking school transportation), or due to a referral by any school official.
${ }^{7}$ Totals include expulsions with and without educational services.
${ }^{8}$ Includes all expulsions under zero-tolerance policies, including expulsions with and without educational services. A zero-tolerance policy results in mandatory expulsion of any student who commits one or more specified offenses (for example, offenses involving guns, other weapons, violence, or similar factors, or combinations of these factors). A policy is considered zero tolerance even if there are some exceptions to the mandatory aspect of the expulsion, such as allowing the chief administering officer of a local education agency to modify the expulsion on a case-by-case basis.
${ }^{9}$ Data by race/ethnicity exclude data for students with disabilities served only under Section 504 (not receiving services under IDEA).
NOTE: Student counts between 1 and 3 are displayed as 1-3 to protect student privacy. Detail may not sum to totals because of privacy protection routines applied to the data. Race categories exclude persons of Hispanic ethnicity.

$\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ Corporal punishment is paddling, spanking, or other forms of physical punishment imposed on a student.
${ }^{2} \mathrm{An}$ in-school suspension is an instance in which a student is temporarily removed from his or her regular classroom(s) for at least half a day but remains under the direct supervision of school personnel.
${ }^{3}$ For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.
${ }^{4}$ Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.
${ }^{5}$ Referral to law enforcement is an action by which a student is reported to any law enforcement agency or official, including a school police unit, for an incident that occurs on school
grounds, during school-related events, or while taking school transportation, regardless of whether official action is taken.
${ }^{6}$ A school-related arrest is an arrest of a student for any activity conducted on school grounds, during off-campus school activities (including while taking school transportation), or due to a referral by any school official.
${ }^{7}$ Totals include expulsions with and without educational services.
${ }^{8}$ Includes all expulsions under zero-tolerance policies, including expulsions with and without educational services. A zero-tolerance policy results in mandatory expulsion of any student who commits one or more specified offenses (for example, offenses involving guns, other weapons, violence, or similar factors, or combinations of these factors). A policy is considered zero tolerance even if there are some exceptions to the mandatory aspect of the expulsion, such as allowing the chief administering officer of a local education agency to modify the expulsion on a case-by-case basis.
${ }^{9}$ Data by race/ethnicity exclude data for students with disabilities served only under Section 504 (not receiving services under IDEA).
NOTE: The percentage of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2011-12 school year by the student enrollment based on a count of students taken on a single day between September 27 and December 31. Race categories exclude persons of Hispanic ethnicity.

${ }^{1}$ For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.
${ }^{2}$ Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes, with or without the continu-
ation of educational services, for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.
${ }^{3}$ Data by race/ethnicity exclude students with disabilities served only under Section 504 (not receiving services under IDEA).
NOTE: Student counts between 1 and 3 are displayed as 1-3 to protect student privacy. Detail may not sum to totals because of privacy protection routines applied to the data. Race categories exclude persons of Hispanic ethnicity.

Rounds to zero
$\ddagger$ Reporting standards not met（too few cases）．
${ }^{1}$ For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act，out－of－ school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer． This does not include students who served their suspension in the school．For students with disabilities served under the Individ－位 from his or her regular school for disciplinary purposes to another setting（e．g．，home，behavior center）．This includes both
removals in which no Individualized Education Program（IEP）services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided．
${ }^{2}$ Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes，with or without the continuation of educational services，for the remainder of the school year or longer for discipinary purposes，with or without the continuation of educational services，for the remainder of the school year or longer
in accordance with local education agency policy．Expulsions also include removals resulting from violations of the Gun Free绪
绪 NOTE：The percentage of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2011－12 school year by the student enroliment based on a count of stu－ dents taken on a single day between September 27 and December 31．Race categories exclude persons of Hispanic ethnicity． SOURCE：U．S．Department of Education，Office for Civil Rights，Civil Rights Data Collection，＂2011－12 Discipline Estimations by State＂and＂2011－12 Estimations for Enrollment．＂（This table was prepared November 2015．）

Table 233.45. Number of discipline incidents resulting in removal of a student from a regular education program for at least an entire school day and rate of incidents per 100,000 students, by discipline reason and state: 2014-15

| State | Number of discipline incidents |  |  |  |  | Rate of discipline incidents per 100,000 students |  |  |  |  |

## —Not available.

${ }^{1}$ Includes violent incidents with and without physical injury.
${ }^{2}$ U.S. totals exclude Vermont data, which were not reported
${ }^{3}$ This state did not report state-level counts of discipline incidents, but did report schoollevel counts. The sums of the school-level counts are displayed in place of the unreported state-level counts.
${ }^{4}$ California reported alcohol incidents in the illicit drug category.

$\dagger$ Not applicable
${ }^{1}$ Data for 2013-14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013-14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013-14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013-14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013-14 results.
${ }^{2}$ Does not include random dog sniffs.
${ }^{3}$ For example, a system for reporting threats through online submission, telephone hotline, or written submission via drop box.
NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

## -Not available.

$\dagger$ Not applicable.
were not asked whether they had drilled students on the use of a plan for suicide threat or incident, severe risk of terrorist attack, and pandemic flu.
or example, earthquakes or tornadoes.
In 2007-08 and 2009-10, schools were asked whether they had a plan for procedures to be performed if the U.S. national threat evel were changed to Red (Severe Risk of Terrorist Attack) by the Department of Homeland Security. In 2013-14, schools were asked whether they had a plan for procedures to be perro med if an imminent threat alert "were Homeland Security's National Terrorism Advisory System.
${ }^{5}$ Data on suicide threat or incident, severe risk of terrorist attack, and pandemic flu were not collected in 2003-04 and 2005-06. ${ }^{6}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade
is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools. Separate data on high schools and combined schools are not available for 2013-14.
${ }^{7}$ Data for 2013-14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013-14 survey was designed to allow comparisons with SSOCS data. How survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013-14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013-14 results. ${ }^{8}$ Because the 2013-14 survey did not collect data on the percentage of students eligible for free or reduced-price lunch, the classification of schools by the percentage of students eligible for free or reduced-price lunch was computed based on data obtained from the Common Core of Data.
NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school

${ }^{1}$ For 2006 and later years, includes the "Two or more races" category, which did not appear on earlier questionnaires. For 2003 and earlier years, includes an "Other" category. Respondents who selected "Other" were instructed to specify what this meant. Examination of these written-in responses, which account for less than 1 percent of the records, indicates that the majority refer to individuals of mixed racial/ethnic identity.
${ }^{2}$ Delinquent/criminal offenses range from those committed against persons (e.g., assault) to tech nical violations, which include violations of probation, parole, or valid court orders. A "status" offense is illegal for underage persons, but not for adults (e.g., truancy or underage drinking) ${ }^{3}$ Private facilities are operated by private nonprofit or for-profit corporations or organizations.
${ }^{4}$ Although respondents may select more than one type for their facility, this table assigns each facility to a single primary type based on an analysis that applies a hierarchy rule. For 1997, the facility type data exclude 327 juveniles who were in facilities identified only as "Other."
${ }^{5}$ Prior to 2003, residential treatment centers were included in the "Group home" category NOTE: Data are from a biennial survey of all secure and nonsecure residential placement facilities that house juvenile offenders, defined as persons younger than 21 who are held in a residential setting as a result of some contact with the justice system (they are charged with or adjudicated for an offense). Data do not include adult prisons, jails, federal facilities, or facilities exclusively for drug or mental health treatment or for abused or neglected youth. The data provide 1-day population counts of juveniles in residential placement facilities; 1-day counts differ substantially from the annual admission and release data used to measure facility population flow. For definitions of specific terms, see http://www.ojidp.gov/ojstatbb/ezacjrp/asp/glossary.asp

## -Not available.

X Denotes that the state has a policy. A blank denotes that the state does not have a policy. ${ }^{1}$ Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.
${ }^{2}$ Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency.
${ }^{3}$ Parent/guardian may delay child's entry until a later age per state law/regulation.
${ }^{4}$ Student may continue in the program if 22nd birthday falls before the end of the school year. ${ }^{5}$ Attendance is compulsory until age 18 for Manatee County students, unless they earn a high school diploma prior to reaching their 18th birthday.
${ }^{6}$ Through age 21 or until child graduates with a high school or special education diploma or equivalent.
${ }^{7}$ Some schools operate on a multitrack system; the schools are open year-round, but different cohorts start and end at different times.
${ }^{8}$ Children enrolled in preschool programs (4 years old on or before September 15) are consid ered to be of compulsory school attendance age.
${ }^{9}$ To be determined by rules and regulations adopted by the state board.
${ }^{10} \mathrm{All}$ districts have adopted a policy to raise the upper compulsory school age from 16 to 18 The policy will take effect for most districts in the 2015-16 school year.
${ }^{11}$ Children from birth through age 2 are eligible for additional services.
${ }^{12}$ Must be age 5 before October 15, and not age 20 before start of school year.
${ }^{13}$ Policies about year-round schools are decided locally.
${ }^{14}$ State did not participate in 2008 online survey. Data are from 2006.
${ }^{15}$ In certain school districts in Nevada, the lowest performing schools with the highest num bers of limited English proficient students will start offering full-day kindergarten programs. ${ }^{16}$ The Abbott District is required to offer full-day kindergarten.
${ }^{17}$ Local boards of education can require school attendance until age 17 unless employed. The boards of education of Syracuse, New York City, Rochester, Utica, and Buffalo are authorized to require kindergarten attendance at age 5 unless the parents elect not to enroll their child until the following September or the child is enrolled in nonpublic school or in home instruction.
${ }^{18}$ Student may complete school year if 21 st birthday occurs while attending school.
${ }^{19}$ All children must attend kindergarten before age 7 .
${ }^{20}$ Full-day kindergarten is being phased in beginning in the 2012-13 school year, starting with the highest poverty schools. Statewide implementation will be achieved by 2017-18.
${ }^{21}$ Children with severe disabilities may begin receiving services at age 3.
${ }^{22}$ Statute requires one full-day program per district.
NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

${ }^{2}$ Does not apply to charter and multitrack schools.
${ }^{15 F o r}$ the 2014-15 and 2015-16 school years.
5 Instructional time for graduating seniors may be reduced.
16 Instructional
16998 data.
${ }^{1 /}$ Fees permitted, but if 5 percent or more of the voters in a district petition the school board, a majority of the district's voters may decide to furnish free textbooks to students.
${ }^{18}$ Fees permitted for students in grades 9-12, but students who qualify for free or reduced-price lunch are exempted. ${ }^{19}$ Refundable or security deposits permitted.
${ }^{20174}$ days required for a 5 -day week; 142 days required for a 4 -day week
${ }^{21}$ Local districts may select textbooks not on the state recommended list provided the textbooks meet specific criteria and the ${ }^{22}$ Starting in the $2015-16$ schendations by the district's curriculum materials review committee.
hours statewide by the 2017-18 school yees 9 through 12 will transition to 1,080 hours and kindergarten will transition to 1,000
${ }^{23} \mathrm{~A}$ district may provide free textbooks to students when, in its judgment, the best interests of the district will be served.
NOTE: Minimum number of instructional days refers to the actual number of days that pupils have contact with a teacher. Some states allow for different types of school calendars by setting instructional time in both days and hours, while others use only days or only hours. For states in which the number of days or hours varies by grade, the relevant grade(s) appear in parentheses,

## -Not available..

## $\dagger$ Not applicable.

${ }^{1}$ Exit exam subjects tested: $E=$ English (including writing), $M=$ Mathematics, $S=$ Science, and $\mathrm{H}=$ History/social studies.
${ }^{2} \mathrm{~A}$ certificate of attendance is an example of an alternative credential for students who do not meet all requirements for a standard diploma. Depending on an individual state's policies, alternative credentials may be offered to students with disabilities, students who fail exit exams, or other students who do not meet all requirements.
${ }^{3}$ Requirement takes effect for class of 2020
${ }^{4}$ Students must pass either the science or social studies components of the Graduation Exit Examination (GEE) to receive a standard diploma.
${ }^{5}$ Students can graduate by passing statewide reading and writing assessments and either passing mathematics assessments or meeting other requirements.

## ${ }^{6}$ Expressed in semester credits instead of Carnegie units.

${ }^{7}$ To receive the standard diploma, students must pass tests in algebra 1, English 2, and two of
the following five subjects: algebra 2, biology 1, English 3, geometry, and U.S. history.
${ }^{8}$ Requirement takes effect for class of 2014.
To receive the standard diploma, students must earn at least six verified credits by passing end-of-course assessments. One of those credits may be earned by passing a studentselected test in computer science, technology, career and technical education, or other areas. NOTE: Local school districts frequently have other graduation requirements in addition to state requirements. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1 -year course.

[^64]NOTE: Beginning in 1989-90, revenues for state education agencies were excluded and new survey collection procedures were initiated; data may not be entirely comparable with figures for earlier years. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States, 1919-20 through 1949-50; Statistics of State School Systems, 1959-60 and 1969-70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979-80; and Common Core of Data (CCD), "National Public Education Financial
Survey," 1989-90 through 2013-14. (This table was prepared July 2016.)

[^66]NOTE: Beginning in 1959-60, includes Alaska and Hawaii. Beginning in 1989-90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989-90, extensive changes were made in the data collection procedures. Detail may not sum o totals because of rounding.

## -Not available.

Data have been revised from previously published figures.
Includes estimated data for subfunctions of food services and enterprise operations
${ }^{4}$ Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
${ }^{5}$ Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for vices, including planning, research, evaluation, information, staff, and data processing services; and other support services.
${ }^{6}$ Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Includes very small amounts for direct program support made by state education agencies for local school districts. Includes expenditures for property and for buildings and alterations completed by school district staff or contractors. NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

${ }^{1}$ Data have been revised from previously published figures.
${ }^{2}$ Includes purchased professional services of teachers or others who provide instruction for
students.
NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2012-13 and 2013-14. (This table was prepared July 2016.)

Table 236.55. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919-20 through 2013-14

[^68]NOTE: Beginning in 1980-81, state administration expenditures are excluded from both "total" and "current" expenditures. Current expenditures include instruction, support services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988-89, extensive changes were made in the data collection procedures.

-Not available. ${ }^{1}$ Constant dollars based on the
adjusted to a school-year basis.
${ }^{2}$ Data have been revised from previously published figures
2.Data have been revised from previously published figures.
${ }^{3}$ Includes estimated data for subfunctions of food services and enterprise operations.

Includes estimated data for subfunctions of food services and enterprise operations.
4 Includes expenditures for guidance, health, attendance, and speech pathology services.
${ }^{5}$ Includes expenditures for curriculum development, staff training, libraries, and media and computer centers
${ }^{6}$ Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services
for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.
${ }^{7}$ Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time)
${ }^{8}$ Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.
NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.
ta (CCD), "National Public Education Financial Survey," 1990-91 through 2013-14. (This table was prepared July 2016.)

## -Not available.

${ }^{1}$ Unadjusted (or "current") dollars have not been adjusted to compensate for inflation.
${ }^{2}$ Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Expenditures for state administration are excluded in all years except

1969-70 and 1979-80. Beginning in 1989-90, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1969-70; Revenues and Expenditures for Public Elementary and Secondary Schools, 1979-80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989-90 through 2013-14. (This table was prepared July 2016.)

Table 236.70. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2013-14

## -Not available

${ }^{1}$ Unadjusted (or "current") dollars have not been adjusted to compensate for inflation.
${ }^{2}$ Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Expenditures for state administration are excluded in all years except

1969-70 and 1979-80. Beginning in 1989-90, extensive changes were made in the data collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1969-70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979-80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989-90 through 2013-14. (This table was prepared July 2016.)

## -Not available.

${ }^{1}$ Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.
${ }^{2}$ Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.
${ }^{3}$ Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).
${ }^{4}$ Includes expenditures for guidance, health, attendance, and speech pathology services. Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than $\$ 0.50$. Detail may not sum to totals because of rounding.

## CHAPTER 3

Postsecondary Education

Postsecondary education includes academic, career and technical, and continuing professional education programs after high school. American colleges and universities and career/technical institutions offer a diverse array of postsecondary educational experiences. For example, a community college normally offers the first 2 years of a standard college curriculum as well as a selection of terminal career and technical education programs. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as programs leading to advanced degrees. A specialized career/technical institution offers training programs of varying lengths that are designed to prepare students for specific careers.

This chapter provides an overview of the latest statistics on postsecondary education, including data on various types of postsecondary institutions and programs. However, to maintain comparability over time, most of the data in the Digest are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in Title IV federal financial aid programs. ${ }^{1}$ Degreegranting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only career and technical programs of less than 2 years' duration and continuing education programs. The degreegranting institution classification currently used by the National Center for Education Statistics (NCES) includes approximately the same set of institutions as the higher education institution classification that was used by NCES prior to $1996-97 .^{2}$ This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

[^71]Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1 . Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5 . Chapter 7 contains data on college libraries. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes. See chapter 5 for information on adults' participation in nonpostsecondary education, such as adult secondary education classes (e.g., to prepare for the GED test) or English as a Second Language (ESL) classes.

## Enrollment

Fall enrollment in degree-granting postsecondary institutions increased 23 percent between 1995 and 2005 (table 303.10 and figure 12). Between 2005 and 2015, enrollment in degree-granting postsecondary institutions increased 14 percent, from 17.5 million to 20.0 million. The overall increase between 2005 and 2015 reflects an increase of 20 percent between 2005 and 2010, followed by a decrease of 5 percent between 2010 and 2015. Similarly, the number of full-time students rose 21 percent from 2005 to 2010 , then fell 6 percent from 2010 to 2015 , for an overall increase of 14 percent between 2005 and 2015. The number of part-time students rose 20 percent from 2005 to 2011, then fell 4 percent from 2011 to 2015, for an overall increase of 15 percent between 2005 and 2015. Between 2005 and 2015, the number of female students rose 12 percent, while the number of male students rose 17 percent. Although male enrollment increased by a larger percentage than female enrollment between 2005 and 2015, the majority ( 56 percent) of students in 2015 were female. Both male and female enrollment increases between 2005 and 2015 reflect increases during the first part of this period followed by smaller decreases during the most recent part of the period (a decrease of 4 percent for males from 2010 to 2015 and a decrease of 6 percent for females). In addition to enrollment in degree-granting institutions, about 412,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2015 (table 303.20). These institutions are postsecondary institutions that do not award associate's or higher degrees; they include, for example, institutions that offer only career and technical programs of less than 2 years' duration.

Enrollment trends can be affected both by changes in population and by changing rates of enrollment. Between 2005 and 2015, the number of 18 - to 24 -year-olds in the population rose from 29.4 million to 31.2 million, an increase of 6 percent (table 101.10). The percentage of 18 - to 24 -yearolds enrolled in degree-granting postsecondary institutions was 40 percent in 2015, which was not measurably different from the percentage in 2005 (table 302.60). For male 18- to 24-year-olds, the enrollment rate was higher in 2015 ( 38 percent) than in 2005 ( 35 percent). The comparable enrollment rate for females (43 percent) was not measurably different from the rate in 2005. The enrollment rate for Hispanic 18to 24 -year-olds rose from 25 percent in 2005 to 37 percent in 2015. In 2015, the enrollment rate for Whites in the same age group was 42 percent, and the enrollment rate for Blacks was 35 percent; neither of these rates was measurably different from the corresponding rate in 2005.

Like enrollment in degree-granting institutions for the United States as a whole, the number of students enrolled in degree-granting institutions located within individual states generally has been lower in recent years (table 304.10 and figure 13). Overall, fall enrollment in degree-granting institutions declined 5 percent between 2010 and 2015. Similarly, fall 2015 enrollment was lower than fall 2010 enrollment in the majority of states (42). The largest declines were in Iowa ( -28 percent), Arizona ( -18 percent), New Mexico ( -15 percent), and Michigan ( -14 percent). In contrast, enrollment was higher in 2015 than in 2010 in 8 states and the District of Columbia. The largest increases were in New Hampshire ( 64 percent), followed by Idaho ( 42 percent), Utah ( 15 percent), and Delaware ( 9 percent).

Between fall 2005 and fall 2015, the percentage increase in the number of students enrolled in degree-granting institutions was higher for students under age 25 than for older students; and this pattern is expected to continue in the coming years (table 303.40 and figure 14). The enrollment of students under age 25 increased by 15 percent from 2005 to 2015, while the enrollment of those age 25 and over increased by 13 percent. From 2015 to 2026, NCES projects the increase for students under age 25 to be 17 percent, compared with 8 percent for students age 25 and over.

Enrollment trends have differed at the undergraduate and postbaccalaureate levels. Undergraduate enrollment increased 47 percent between fall 1970 and fall 1983, when it reached 10.8 million (table 303.70). Undergraduate enrollment dipped to 10.6 million in 1984 and 1985, but then increased each year from 1985 to 1992 , rising 18 percent before stabilizing between 1992 and 1998. Between 2005 and 2015, undergraduate enrollment rose 14 percent overall, from 15.0 million to 17.0 million. This overall increase reflects a 21 percent increase in undergraduate enrollment between 2005 and 2010 (when undergraduate enrollment reached 18.1 million), followed by a 6 percent decrease between 2010 and 2015. Postbaccalaureate enrollment increased 34 percent between 1970 and 1984, with most of this increase occurring in the early and mid-1970s (table 303.80). Postbaccalaureate enrollment increased from 1985
to 2015 , rising a total of 78 percent. During the last decade of this period, between 2005 and 2015, postbaccalaureate enrollment rose 17 percent, from 2.5 million to 2.9 million.

Since fall 1988, the number of female students in postbaccalaureate programs has exceeded the number of male students. Between 2005 and 2015, the number of full-time male postbaccalaureate students increased by 24 percent, compared with a 25 percent increase in the number of fulltime female postbaccalaureate students. Among part-time postbaccalaureate students, the number of males enrolled in 2015 was 6 percent higher than in 2005, while the number of females was 8 percent higher.

Eleven percent of undergraduates in both 2007-08 and 2011-12 reported having a disability (table 311.10). In 2011-12, the percentage of undergraduates who reported having a disability was 11 percent for both male and female students. However, there were some differences in the percentages of undergraduates with disabilities by characteristics such as veteran status, age, dependency status, and race/ ethnicity. For example, 21 percent of undergraduates who were veterans reported having a disability, compared with 11 percent of undergraduates who were not veterans. The percentage of undergraduates having a disability was higher among those age 30 and over ( 16 percent) than among 15- to 23 -year-olds ( 9 percent) and 24 - to 29 -year-olds ( 11 percent). Among dependent undergraduates, 9 percent reported having a disability, which was lower than the percentages for independent undergraduates who were married (13 percent) or unmarried (14 percent). Compared to undergraduates of other racial/ethnic groups, a lower percentage of Asian undergraduates ( 8 percent) had a disability. The percentage of postbaccalaureate students who reported having a disability in 2011-12 (5 percent) was lower than the percentage for undergraduates ( 11 percent).

The percentage of American college students who are Hispanic, Asian/Pacific Islander, and Black has been increasing (table 306.10). From fall 1976 to fall 2015, the percentage of Hispanic students rose from 4 percent to 17 percent of all U.S. residents enrolled in degree-granting postsecondary institutions, and the percentage of Asian/ Pacific Islander students rose from 2 percent to 7 percent. The percentage of Black students increased from 10 percent in 1976 to 14 percent in 2015 , but the 2015 percentage reflects a decrease since 2011, when Black students made up 15 percent of all enrolled U.S. residents. The percentage of American Indian/Alaska Native students was higher in 2015 ( 0.8 percent) than in 1976 ( 0.7 percent). During the same period, the percentage of White students fell from 84 percent to 58 percent. Race/ethnicity is not reported for nonresident aliens, who made up 5 percent of total enrollment in 2015.

Of the 20.0 million students enrolled in degree-granting postsecondary institutions in fall 2015 , some 15 percent took at least one distance education course as part of their program that included a mix of in-person and distance education courses (table 311.15). In addition, 14 percent of students took their college program exclusively through distance education courses. The remaining 70 percent of stu-
dents took no distance education courses. About 10 percent of students at public institutions took their coursework exclusively through distance education courses, compared to 16 percent of students at private nonprofit institutions and 56 percent of students at private for-profit institutions. About 12 percent of undergraduates took their coursework exclusively through distance education courses, compared to 26 percent of postbaccalaureate students.

Despite the sizable numbers of small degree-granting colleges, most students attend larger colleges and universities. In fall 2015, some 44 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of all college students (table 317.40). While 12 percent of campuses enrolled 10,000 or more students, they accounted for 60 percent of total college enrollment.

In fall 2015, the five institutions with the highest enrollment were University of Phoenix, with 165,700 students; Ivy Tech Community College, with 81,700 students; Liberty University, with 80,500 students; Lone Star College System, with 70,700 students; and Western Governors University, with 70,500 students (table 312.10).

## Faculty, Staff, and Salaries

Approximately 3.9 million people were employed in degree-granting postsecondary institutions in fall 2015, including 1.6 million faculty, 0.4 million graduate assistants, and 2.0 million other staff (table 314.20). Out of the 1.6 million faculty in 2015, 0.8 million were full-time and 0.7 million were part-time faculty. From 2005 to 2015, the proportion of staff who were faculty rose from 38 percent to 40 percent. During the same period, the proportion of other staff not engaged in teaching decreased from 52 percent to 51 percent. The proportion of graduate assistants was 9 percent in both 2005 and 2015. The full-time-equivalent (FTE) student/FTE staff ratio at degree-granting institutions was 5.1 in both 2005 and 2015 (table 314.10 and figure 15). The FTE student/FTE faculty ratio was lower in 2015 (14.3) than in 2005 (15.0).

Degree-granting postsecondary institutions differ in their practices of employing part-time and full-time staff. In fall 2015, some 48 percent of the employees at public 2-year institutions were employed full time, compared with 68 percent at public 4 -year institutions, 69 percent at private nonprofit 4 -year institutions, and 73 percent at private nonprofit 2 -year institutions (table 314.30). The percentage of faculty employed full time was higher at public 4-year institutions (67 percent) than at private nonprofit 4-year institutions (55 percent), private for-profit 4-year institutions (15 percent), private nonprofit 2-year institutions ( 55 percent), private for-profit 2-year institutions ( 37 percent), and public 2-year institutions ( 32 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 314.20). Between 2005 and 2015, the number of full-time staff increased by 15 percent, compared to an increase of 17 percent in the number of part-time staff. Most of the increase in part-time staff was due to increases
in the number of part-time faculty (21 percent) and graduate assistants ( 17 percent) during this time period.

In fall 2015, some 7 percent of faculty at degree-granting institutions were Black (based on a faculty count that excludes nonresident aliens and other persons whose race/ ethnicity was unknown), 8 percent were Asian, 5 percent were Hispanic, 0.5 percent were American Indian/Alaska Native, 1 percent were of Two or more races, and less than 0.5 percent were Pacific Islander (table 314.40). About 78 percent of all faculty were White; 40 percent were White males and 38 percent were White females. Staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/ Alaska Native, or of Two or more races made up 27 percent of graduate assistants and 30 percent of other staff in nonfaculty positions in 2015. The proportion of total staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races was similar at public 4-year institutions ( 27 percent), public 2-year institutions ( 26 percent) and private nonprofit 4-year institutions ( 25 percent), but the proportion was higher at private forprofit 4-year institutions (32 percent), private nonprofit 2year institutions (34 percent), and private for-profit 2-year institutions (39 percent).

On average, full-time faculty and instructional staff spent 58 percent of their time teaching in 2003 (web-only table 315.30). Research and scholarship accounted for 20 percent of their time, and 22 percent was spent on other activities (administration, professional growth, etc.).

Faculty salaries generally lost purchasing power during the 1970s. In constant 2015-16 dollars, average salaries for faculty on 9 -month contracts declined by 16 percent during the period from 1970-71 $(\$ 76,200)$ to $1980-81(\$ 64,100)$ (table 316.10). During the 1980s, average salaries rose and recouped most of the losses. Between 1990-91 and 2015-16, there was a further increase in average faculty salaries, resulting in an average salary in 2015-16 $(\$ 82,100)$ that was 8 percent higher than the average salary in 1970-71. The average salary for male faculty was higher than the average salary for female faculty in all years for which data are available. The average salary for male faculty in 2015-16 $(\$ 89,200)$ was 4 percent higher than in 2005-06 (\$85,700 in constant 2015-16 dollars). For female faculty, the average salary in 2015-16 $(\$ 73,800)$ was 5 percent higher than the salary in 2005-06 ( $\$ 70,200$ ). In 2015-16, average salaries for male faculty were 21 percent higher than for female faculty, compared to 22 percent higher in 2005-06.

The percentage of faculty with tenure has declined since 1993-94. Of those faculty at institutions with tenure systems, 47 percent of full-time faculty had tenure in 2015-16, compared with 56 percent in 1993-94 (table 316.80). Also, the percentage of institutions with tenure systems decreased between 1993-94 (63 percent) and 2015-16 (52 percent). Part of this change was due to the expansion in the number of for-profit institutions (table 317.10), relatively few of which have tenure systems (1.3 percent in 2015-16) (table 316.80). At institutions with
tenure systems, there were differences between males and females in the percentage of full-time instructional faculty having tenure. Fifty-six percent of males had tenure in 2015-16, compared with 42 percent of females. In 2015-16, about 52 percent of full-time instructional faculty had tenure at public institutions with tenure systems, compared with 45 percent at private nonprofit institutions with tenure systems and 17 percent at private for-profit institutions with tenure systems.

## Degrees

During the 2015-16 academic year, 4,583 accredited institutions offered degrees at the associate's level or above (table 317.10). These included 1,620 public institutions, 1,701 private nonprofit institutions, and 1,262 private forprofit institutions. Of the 4,583 degree-granting institutions, 3,004 were 4 -year institutions that awarded degrees at the bachelor's or higher level, and 1,579 were 2-year institutions that offered associate's degrees as their highest award. In 2014-15, associate's degrees were awarded by 2,971 institutions, bachelor's degrees by 2,597 institutions, master's degrees by 1,926 institutions, and doctor's degrees by 954 institutions (table 318.60). In addition to degree-granting institutions, 2,438 non-degree-granting institutions offered postsecondary education in 2015-16, but did not grant degrees at the associate's or higher level (table 317.30).

Growing numbers of people are completing postsecondary degrees. Between 2004-05 and 2014-15, the number of associate's, bachelor's, master's, and doctor's degrees that were conferred rose (table 318.10). During this period, the number of associate's degrees increased by 46 percent, the number of bachelor's degrees increased by 32 percent, the number of master's degrees increased by 31 percent, and the number of doctor's degrees increased by 33 percent. The doctor's degree total includes most degrees formerly classified as first-professional, such as M.D. (medical), D.D.S. (dental), and J.D. (law) degrees. In addition to degrees awarded at the associate's and higher levels, 961,000 certificates were awarded by postsecondary institutions participating in federal Title IV financial aid programs in 2014-15 (table 320.20).

Since the mid-1980s, more females than males have earned associate's, bachelor's, and master's degrees (table 318.10). Beginning in 2005-06, the number of females earning doctor's degrees has also exceeded the number of males. Between 2004-05 and 2014-15, the number of associate's and bachelor's degrees awarded to males increased at a higher rate than the number awarded to females. The number of associate's degrees awarded to males increased by 48 percent during this period, while the number awarded to females increased by 44 percent. The number of bachelor's degrees awarded to males increased by 33 percent, while the number awarded to females increased by 31 percent. In contrast, the number of master's and doctor's degrees increased at a higher rate for females than males between 2004-05 and 2014-15. The number of females earning master's degrees rose 32 percent during this period, while the number of
males earning master's degrees rose 29 percent. Also, the number of females earning doctor's degrees increased 39 percent, while the number of males earning doctor's degrees increased 26 percent.

Of the $1,895,000$ bachelor's degrees conferred in 2014-15, the greatest numbers of degrees were conferred in the fields of business $(364,000)$, health professions and related programs $(216,000)$, social sciences and history $(167,000)$, psychology $(118,000)$, biological and biomedical sciences $(110,000)$, engineering $(98,000)$, visual and performing arts $(96,000)$, and education $(92,000)$ (table 322.10). At the master's degree level, the greatest numbers of degrees were conferred in the fields of business $(185,000)$, education $(147,000)$, and health professions and related programs $(103,000)$ (table 323.10$)$. At the doctor's degree level, the greatest numbers of degrees were conferred in the fields of health professions and related programs $(71,000)$, legal professions and studies $(40,300)$, education $(11,800)$, engineering $(10,200)$, biological and biomedical sciences $(8,100)$, psychology $(6,600)$, and physical sciences and science technologies $(5,800)$ (table 324.10).

In recent years, the numbers of bachelor's degrees conferred have followed patterns that differed significantly by field of study. While the number of bachelor's degrees conferred increased by 32 percent overall between 2004-05 and 2014-15, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 322.10 and figure 16). For example, the number of degrees conferred in computer and information sciences decreased 27 percent between 2004-05 and 2009-10, but then increased 50 percent between 2009-10 and 2014-15. In contrast, the number of bachelor's degrees conferred in the combined fields of engineering and engineering technologies increased 12 percent between 2004-05 and 2009-10, and then increased a further 30 percent between 2009-10 and 2014-15. In a number of other major fields, the number of bachelor's degrees also increased by higher percentages in the second half of the 10 -year period than in the first half. For example, the number of degrees conferred in agriculture and natural resources increased by 15 percent between 2004-05 and 2009-10 and then by 38 percent between 2009-10 and 2014-15. The number of degrees conferred in health professions and related programs increased by 61 percent between 2004-05 and 2009-10 and then by 67 percent between 2009-10 and 2014-15. Also, the number of degrees conferred in public administration and social services increased by 17 percent between 2004-05 and 2009-10 and then by 35 percent between 2009-10 and 2014-15. Other fields with sizable numbers of degrees (over 5,000 in 2014-15) that showed increases of 30 percent or more between 2009-10 and 2014-15 included homeland security, law enforcement, and firefighting (44 percent); parks, recreation, leisure, and fitness studies (47 percent); and mathematics and statistics (36 percent). Some fields with sizable numbers of degrees did not have increases during the 2009-10 to 2014-15 period. The number of degrees in English language and literature/letters was 14 percent lower in 2014-15 than in 2009-10, and the number of degrees in philosophy and
religious studies was 11 percent lower. The numbers of degrees in the fields of education; architecture and related services; and area, ethnic, cultural, gender, and group studies were each 10 percent lower in 2014-15 than in 2009-10. Also, the number of degrees in foreign languages, literatures, and linguistics was 9 percent lower in 2014-15 than in 2009-10; the number of degrees in liberal arts and sciences, general studies, and humanities was 7 percent lower; and the number of degrees in social sciences and history was 3 percent lower.

Among first-time students who were seeking a bachelor's degree or its equivalent and attending a 4 -year institution full time in 2009, about 40 percent completed a bachelor's degree or its equivalent at that institution within 4 years, while 55 percent did so within 5 years, and 59 percent did so within 6 years (table 326.10). These graduation rates were calculated as the total number of completers within the specified time to degree attainment divided by the cohort of students who first enrolled at that institution in 2009. Graduation rates were higher at private nonprofit institutions than at public or private for-profit institutions. For example, the 6-year graduation rate for the 2009 cohort at private nonprofit institutions was 66 percent, compared with 59 percent at public institutions and 23 percent at private for-profit institutions. Graduation rates also varied by race/ethnicity. At 4-year institutions overall, the 6-year graduation rate for Asian students in the 2009 cohort was 73 percent, compared with 63 percent for Whites, 59 percent for students of Two or more races, 54 percent for Hispanics, 49 percent for Pacific Islanders, 41 percent for American Indians/Alaska Natives, and 39 percent for Blacks.

## Finances and Financial Aid

For the 2015-16 academic year, annual current dollar prices for undergraduate tuition, fees, room, and board were estimated to be $\$ 16,757$ at public institutions, $\$ 43,065$ at private nonprofit institutions, and $\$ 23,776$ at private for-profit institutions (table 330.10). Between 2005-06 and 2015-16, prices for undergraduate tuition, fees, room, and board at public institutions rose 34 percent, and prices at private nonprofit institutions rose 26 percent, after adjustment for inflation. The price for undergraduate tuition, fees, room, and board at private for-profit institutions decreased 16 percent between 2005-06 and 2015-16, after adjustment for inflation.

In 2011-12, about 84 percent of full-time undergraduate students received financial aid (grants, loans, work-study, or aid of multiple types) (table 331.10). About 73 percent of full-time undergraduates received federal financial aid in 2011-12, and 57 percent received aid from nonfederal sources. (Some students receive aid from both federal and nonfederal sources.) Section 484(r) of the Higher Education Act of 1965 , as amended, suspends a student's eligibility for Title IV federal financial aid if the student is convicted of certain drug-related offenses that were committed while the student was receiving Title IV aid. For 2013-14, less than 0.01 percent of postsecondary students had their eligibility to receive aid suspended due to a conviction (table C).

Table C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007-08 through 2013-14

| Award year | suspension of eligibility | Suspension of eligibility |  |  |

\#Rounds to zero.
NOTE: It is not possible to determine whether a student who lost eligibility due to a drug conviction otherwise would have received Title IV aid, since there are other reasons why an applicant may not receive aid. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, Federal Student Aid, Free Application for Federal Student Aid (FAFSA), unpublished data.

In 2014-15, total revenue was $\$ 347$ billion at public institutions, $\$ 200$ billion at private nonprofit institutions, and $\$ 20$ billion at private for-profit institutions (tables $333.10,333.40$, and 333.55 and figures 17,18 , and 19). The category of student tuition and fees typically accounts for a significant percentage of total revenue and was the largest single revenue source at both private nonprofit and forprofit institutions in 2014-15 ( 35 and 90 percent, respectively). Tuition and fees accounted for 21 percent of revenue at public institutions in 2014-15. Public institutions typically report Pell grants as revenue from federal grants, while private institutions report Pell grants as revenue from tuition and fees; this difference in reporting contributes to the smaller percentage of revenue reported as tuition and fees at public institutions compared to private institutions. At public institutions, the share of revenue from tuition and fees in 2014-15 (21 percent) was higher than the share from state appropriations ( 19 percent), while the share from state appropriations in 2007-08 ( 25 percent) was higher than that from tuition and fees (18 percent) (table 333.10). In 2014-15, tuition and fees constituted the largest revenue category at private nonprofit 2- and 4-year institutions, private for-profit 2 - and 4-year institutions, and public 4-year institutions (tables 333.10, 333.40, and 333.55). At public 2-year institutions, tuition and fees constituted the fourthlargest revenue category.

Average total expenditures of institutions per full-timeequivalent (FTE) student in 2014-15—shown in constant 2015-16 dollars throughout this paragraph—varied by institution control and level, as did changes in average total expenditures per FTE student between 2009-10 and 2014-15 (after adjustment for inflation). In 2014-15, average total expenditures per full-time-equivalent (FTE) student at public degree-granting institutions were $\$ 31,800$ (table 334.10). These 2014-15 total expenditures per FTE student were 10 percent higher than in 2009-10. In 2014-15, public 4-year institutions had average total expenditures per FTE student of $\$ 41,100$, compared with $\$ 14,700$ at public 2year institutions. At private nonprofit institutions, total expenditures per FTE student in 2014-15 were 7 percent higher than in 2009-10 (table 334.30). In 2014-15, total expenditures per FTE student at private nonprofit institutions averaged $\$ 54,200$ at 4 -year institutions and $\$ 20,200$ at 2-year institutions. The expenditures per FTE student at private for-profit institutions in 2014-15 $(\$ 15,700)$ were 7 per-
cent higher than in 2009-10 (table 334.50). In 2014-15, total expenditures per FTE student at private for-profit institutions averaged $\$ 15,500$ at 4 -year institutions and $\$ 16,700$ at 2-year institutions. This difference in expenditures per FTE student between 4-year and 2-year private for-profit institutions was relatively small compared to the differences between 4 -year and 2-year institutions in the public and private nonprofit sectors.

At the end of fiscal year 2015, the market value of the endowment funds of colleges and universities was $\$ 547$ billion, reflecting an increase of 3 percent compared to the beginning of the fiscal year, when the total was $\$ 533$ billion (table 333.90). At the end of fiscal year 2015, the 120 institutions with the largest endowments accounted for $\$ 406$ billion, or about three-fourths of the national total. The five institutions with the largest endowments in 2015 were Harvard University ( $\$ 38$ billion), Yale University ( $\$ 26$ billion), the University of Texas System (\$23 billion), Princeton University ( $\$ 22$ billion), and Stanford University (\$22 billion).

## $\dagger$ Not applicable.

${ }^{1}$ Includes both degree-granting and non-degree-granting institutions.
NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Degree-granting institutions grant degrees at the associate's or higher level, while non-degree-granting institutions grant only awards below that level. The non-degree granting classification includes some institutions transitioning to higher level program offer-
ings, though still classified at a lower level; therefore, a small number of associate's degrees are shown as awarded by non-degree-granting institutions.

## －Not available．

${ }^{1}$ Prior to 1979－80，excludes branch campuses
${ }^{2}$ Total number of different individuals（not reduced to full－time equivalent）．Beginning in 1959－60，data are for the first term of

## the academic year

${ }^{3}$ Estimated．
${ }^{4}$ Estimated． ratios for the prior staff survey．Excludes graduate assistants．
${ }^{5}$ 5Because of revised survey procedures，data may not be directly comparable with figures prior to 1989－90．Excludes gradu－ ${ }_{6}$ ate assistants．
${ }^{6}$ Data for $1869-70$ to 1939－40 are for resident degree－credit students who enrolled at any time during the academic year．
${ }^{7}$ From 1869－70 to 1959－60，bachelor＇s degrees include degrees formerly classified as first－professional，such as M．D．， D．D．S．，and law degrees．
8Figures for years prior to 1969－70 are not precisely comparable with later data．
9ncludes Ph．D．，Ed．D．，and comparable degrees at the doctoral level．Includes most degrees formerly classified as first－pro－
fessional，such as M．D．，D．D．S．，and law degrees．
${ }^{10}$ Data for $1929-30$ and $1939-40$ include current－fund expenditures and additions to plant value．Data for 1949－50 through 1989－90 are current－fund expenditures only．Data for 1999－2000 include total expenditures for private institutions and cur－ rent－fund expenditures for public institutions．Data for later years are for total expenditures．
${ }^{11}$ Includes unexpended plant funds．
${ }^{12}$ Book value．Includes other nonexpendable funds．
${ }^{13}$ Constant dollars based on the Consumer Price Index，prepared by the Bureau of Labor Statistics，U．S．Department of adjusted to a school－year basis．
NOTE：Data through 1989－90 are for institutions of higher education，while later data are for degree－granting institutions． Degree－granting institutions grant associate＇s or higher degrees and participate in Title IV federal financial aid programs．The and excludes a few higher education institutions that did not grant degrees．Detail may not sum to totals because of rounding． and excludes a few higher education institutions that did not grant degrees．Detail may not sum to totals because of rounding．

[^77]2004; and the moving average for 2015 reflects an average of 2014 and 2015. Moving averages are used to produce more stable estimates.
${ }^{4}$ Prior to 2003, Asian data include Pacific Islanders.
${ }^{5}$ Prior to 1972, White data include persons of Hispanic ethnicity.
White, Black, and Asian data exclude persons of Two or more races.
${ }^{7}$ Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Total includes persons of other racial/ethnic groups not separately shown. Some data have been revised from previously published figures.

${ }^{1}$ Individuals ages 16 to 24 who graduated from high school or completed a GED.
${ }^{2}$ Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.
${ }^{3} \mathrm{~A} 3$-year moving average is a weighted average of the year indicated, the year immediately preceding, and the year immediately following. For 1975 and 2015, a 2 -year moving average is used: The moving average for income groups in 1975 reflects an average of 1975 and 1976, and the moving average for 2015 reflects an average of 2014 and 2015. Moving averages are used to produce more stable estimates.
${ }^{4}$ Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Low income refers to the bottom 20 percent of all family incomes, high income refers to the top 20 percent of all family incomes, and middle income refers to the 60 percent in between. Some data have been revised from previously published figures.

## -Not available.

$\ddagger$ Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases
for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
The 12th-grade graduation rate is the number of students who graduated from grade 12 with a diploma during the 2010-11 school year divided by 12th-grade enrollment in October 2010.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12th grade. Some data have been revised from previously SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File" and "Private School Teacher Data File," 1999-2000, 2003-04, 2007-08, and 2011-12; and "Charter School Teacher Data File," 1999-2000. (This table was prepared April 2014.)

Table 302.43. Percentage distribution of fall 2009 ninth-graders who had completed high school, by postsecondary enrollment status in fall 2013, and selected measures of their high school achievement and selected student characteristics: 2013

## $\dagger$ Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
tReporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
A certificate or diploma program at a school that provides
complete and often leads to a license, such as cosmetolog.
SES was measured by a composite score based on parental education and occupations, family income, and school urbanicity in the student's 11 th-grade year. The weighted SES distribution (weighted by W2STUDENT) was divided into five equal groups. Low SES corresponds to the lowest one-fifth of the population, and high SES corresponds to the highest one-fitth of the population. The three fifths in the middle were combined to form the middle SES category.
Incluts integrated math, algebra III, probability and statistics, and non-calculus Advanced Placement (AP) or International Baccalaureate (IB) courses.
${ }^{4}$ Includes AP/IB calculus.
${ }^{5}$ Ranges from 0 to 59 .
${ }^{6}$ Includes all courses and ranges from 0 to 4.
The average applies used. For thonse who took the SAT or ACT. For those who took the SAT, the combined critical reading and mathok the ACT, scores were converted to the equivalent of the SAT combined score. Scale NOTE: Includes students
ries exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding

[^78]"Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Some data have been revised from previously pubished figures.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2015. (This table was prepared July 2016.)

Table 302.62. Percentage of 18 - to 24 -year-olds enrolled in degree-granting postsecondary institutions and percentage distribution of those enrolled, by sex, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2015
[Standard errors appear in parentheses]

## -Not available.

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Total includes other racial/ethnic groups not shown separately.
${ }^{2}$ Includes other Central American subgroups not shown separately.
${ }^{3}$ Includes Taiwanese.
${ }^{4}$ In addition to the subgroups shown, also includes Sri Lankan.
${ }^{5}$ Consists of Indonesian and Malaysian.
NOTE: Data are based on sample surveys of the entire population in the given age range
residing within the United States, including both noninstitutionalized persons (e.g., those
living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Enrollment data in this table may differ from data in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2010 and 2015. (This table was prepared April 2017.)

Table 303.10. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2026

## -Not available

${ }^{1}$ Degree-credit enrollment only.
${ }^{2}$ Includes part-time resident students and all extension students (students attending courses a sites separate from the primary reporting campus). In later years, part-time student enrollment was collected as a distinct category
${ }^{3}$ Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
${ }^{4}$ Because of imputation techniques, data are not consistent with figures for other years.
${ }^{5}$ Projected.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and partici-
pate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

## \#Rounds to zero.

${ }^{1}$ Includes degree-granting and non-degree-granting institutions.
${ }^{2}$ Data for 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.
${ }^{3}$ Data are for institutions that did not offer accredited 4 -year or 2 -year programs, but were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level offerings, though still classified at a lower level.
NOTE: Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:95-99); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared February 2017.)

Table 303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2015

## -Not available.

Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
${ }^{2}$ Because of imputation techniques, data are not consistent with figures for other years.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degreegranting classification is very similar to the earlier higher education classification, but it includes more 2 -year colleges and
excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1970 through 1985; Integrated Postsecondary
Education Data System (IPEDS), "Fall Enrollment Survey" (PPEDS-EF:86-99); and IPEDS Spring 2001 through Spring 2016 , Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); and IP
Fall Enrollment component. (This table was prepared February 2017.)

Table 303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2026

-Not available
${ }^{1}$ Large increase in private 2-year institutions in 1980 is due to the addition of schools accred ited by the Accrediting Commission of Career Schools and Colleges of Technology.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

Table 303.40. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age: Selected years, 1970 through 2026
[In thousands]

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutionalized population from the U.S. Census Bureau's Current Population Survey. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degreegranting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90-99); IPEDS Spring 2001 through Spring 2016, Fall Enrollment component; and Enrollment in Degree-Granting Institutions Projection Model, 2000 through 2026. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1970 through 2015. (This table was prepared April 2017.)

Table 303.45. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and age of student: 2011, 2013, and 2015

| Attendance status and age of student | Fall 2011 | Fall 2013 |  |  | Fall 2015 |  |  |  |  |  |  |  |  |

\#Rounds to zero.
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in
Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

## -Not available

${ }^{1}$ Counts of institutions in this table may be lower than reported in other tables, because counts in this table include only institutions reporting separate enrol"
2Included under "Other public."
${ }^{3}$ Religious affiliation as reported by institution.
NOTE: Data for 1980 and 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2 -year colleges
and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.
Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; Inte Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; Inte-
grated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90) and "Institutional Characteristics Survey" (IPEDS-IC:90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared June 2017.)

${ }^{1}$ Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges
and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared January 2017.)

Table 304.20. Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2015

| State or jurisdiction | Fall 1970 | Fall 1980 | Fall 1990 | Fall 2000 | Fall 2010 | Fall 2011 | Fall 2012 | Fall 2013 | Fall 2014 | Fall 2015 | $\begin{array}{r} \text { Percent } \\ \text { change, } \\ 2010 \text { to } 2015 \end{array}$ |

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared January 2017.)

Table 304.30. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2014 and 2015

| State or jurisdiction | Fall 2014 |  |  |  |  | Fall 2015 |  |  |  |  | Percent change in total, 2014 to 2015 |

[^84]very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Alaska and Hawaii are included in all years. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States; Opening Fall Enrollment in Higher Education, 1963 through 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1966 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); IPEDS Spring 2001 through Spring 2016, Fall Enrollment component; and First-Time Freshmen Projection Model, 1980 through 2026. (This table was prepared February 2017.)

Table 305.20. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, control of institution, and state or jurisdiction: Selected years, 2000 through 2015

| State or jurisdiction | $\begin{array}{r} \text { Total, } \\ \text { fall } 2000 \end{array}$ | $\begin{array}{r} \text { Total, } \\ \text { fall } 2010 \end{array}$ | $\begin{array}{r} \text { Total, } \\ \text { fall } 2012 \end{array}$ | $\begin{array}{r} \text { Total, } \\ \text { fall } 2013 \end{array}$ | $\begin{array}{r} \text { Total, } \\ \text { fall } 2014 \end{array}$ | Fall 2015 |  |  |  |  |  |  |  |  |

${ }^{1}$ Many institutions have more than one admission requirement.
${ }^{2}$ Formal demonstration of competencies (e.g., portfolios, certificates of mastery, assessmen instruments).
${ }^{3}$ Includes SAT, ACT, or other admission tests
${ }^{4}$ Test of English as a Foreign Language.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2000 through Fall 2010, Institutional Characteristics component; and Winter 2015-16, Admissions component. (This table was prepared November 2016.)

Table 305.40. Acceptance rates; number of applications, admissions, and enrollees; and enrollees' SAT and ACT scores for degree-granting postsecondary institutions with first-year undergraduates, by control and level of institution: 2015-16

## -Not available.

$\dagger$ Not applicable.
NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher educaparticipate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher educa-
tion classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not gran degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; Integrated Postsecondary Education Data
System (IPEDS) "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared October 2016.)

Table 306.20. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity of student: Selected years, 1976 through 2015

†Not applicable.
NOTE: Race ca
NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher educa-
tion, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher educa-
tion classification, but it includes more 2 -year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. ## -Not available.

${ }^{1}$ Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2010, institutions were not required to report separate data on Asians, Pacific Islanders, and students of Two or more races. Projections for Asian and Pacific Islander enrollment are not available due to the limited amount of historical data available upon which to base a projection model. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to
he earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. because of rounding. Some data have been revised from previously published figures.

| ${ }^{1}$ Research universities with a very high level of research activity. <br> ${ }^{2}$ Research universities with a high level of research activity. <br> ${ }^{3}$ Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity. ${ }^{4}$ Institutions that award at least 50 master's degrees per year. <br> ${ }^{5}$ Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4 -year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees. ${ }^{6}$ Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. |  |  |  |  |  |  |  |  | ${ }^{7}$ Nonresident alien enrollment percentages based on total enrollment in the institution, rather than on the U.S. resident enrollment. NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from http://carnegieclassifications.iu.edu/. Includes imputed Carnegie system classifications for institutions with missing data. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. ${ }^{\dagger}$ Not applicable.
${ }^{1}$ Research universities with a very high level of research activity.
2Research universities with a high level of research activity.
3Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity. ${ }^{3}$ Institutions that award at least 20 doctor's degrees per year, bu
4Institutions that award at least 50 master's degrees per year. ${ }^{5}$ Institutions that primarily emphasize undergraduate education tion. Als
system, which had been classified as 2 -year in the Carnegie system becales institutions classified as 4 -year under the IPEDS ${ }^{6}$ Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theol and engineering.

NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research stafiing, and doctoral degrees conferred, by field. Further information on
the research index ranking may be obtained from http://carnegieclassifications.iu.edul. Includes imputed Carnegie system classifications for institutions with missing data. Degree-granting institutions grant associate's or higher degrees and participate
in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Po System (IPEDS), Spring 2016, Fall Enrollment component. (This table was prepared November 2016.)

## -Not available.

${ }^{1}$ Large increases are due to the addition of schools accredited by the Accrediting Commis sion of Career Schools and Colleges of Technology.
${ }^{2}$ Because of imputation techniques, data are not consistent with figures for other years. ${ }^{3}$ Projected.
NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs The degree-granting classification is very similar to the earlier higher education classification,
but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding

## $\dagger$ Not applicable.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the
full-time equivalent of the part-time students. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2001, 2011, and 2016, Fall Enrollment component. (This table was prepared May 2017.)

Table 307.30. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2015

## $\dagger$ Not applicable.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2001, 2011, and 2016, Fall Enrollment component. (This table was prepared May 2017.)

Table 308.10. Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2013-14 and 2014-15

$\dagger$ Not applicable.
NOTE: Includes students who enrolled at any point during a 12-month period ending during the summer of the academic year indicated. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2014 and Fall 2015, 12-Month Enrollment component. (This table was prepared May 2017.)

Table 308.20. Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004-05 through 2014-15

## $\dagger$ Not applicable.

NOTE: Includes students who enrolled at any point during a 12-month period ending during
the summer of the academic year indicated. Degree-granting institutions grant associate's or
higher degrees and participate in Title IV federal financial aid programs. Some data have
been revised from previously published figures.

## $\dagger$ Not applicable

${ }^{1}$ Students residing in a particular state when admitted to an institution anywhere-either in their home state or another state.
${ }^{2}$ Includes students coming to U.S. institutions from foreign countries and other jurisdictions
${ }^{3}$ Students whose residence is in the same state as the service academy.
${ }^{4}$ Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2015, Fall Enrollment component. (This table was prepared May 2017.)

Table 309.30. Residence and migration of all first-time degree/certificate-seeking undergraduates in 4-year degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2014

[^87]NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

## $\dagger$ Not applicable. <br> \#Rounds to zero.

${ }^{1}$ North Africa was combined with the Middle East to create the "Middle East and North Africa" category as of 2011-12, and the former "Africa" category was replaced by "SubSaharan Africa" (which excludes North Africa). Data for years prior to 2011-12 have been revised for comparability.
${ }^{2}$ Asia excludes the Middle Eastern countries (Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, the Palestinian Authority, Qatar, Saudi Arabia, Syria, the United Arab Emirates, and Yemen).
${ }^{3}$ Cyprus and Turkey were classified as being in the Middle East prior to 2004-05, but in Europe for 2004-05 and later years. Data for 2000-01 have been revised for comparability. ${ }^{4}$ Mexico and Central America are included in Latin America, not in North America. Includes Antarctica from 2002-03 onward.
NOTE: Detail may not sum to totals because of rounding.

## \#Rounds to zero

'North Africa was combined with the Middle East to create the "Middle East and North Africa" category as of 2012-13, and the North Africa was combined with the Middle East to create the "Middle East and North Africa" category as of 2012-13, and the
former "Africa" category was replaced by "Sub-Saharan Africa" (which excludes North Africa). Data for years prior to 2012-13 have been revised for comparability
${ }^{2}$ Cyprus and Turkey were classified as being in the Middle East prior to 2004-05, but in Europe for 2004-05 and later years. Data for years prior to 2004-05 have been revised for comparability.
${ }^{4}$ Excludes Mexico and Central America, which are included in Latin America
${ }^{5}$ Place of origin unknown or undeclared.
NOTE: Includes foreign students enrolled in American Samoa, Guam, Puerto Rico, and the U.S. Virgin Islands. Totals and subtotals include other countries not shown separately. Region totals may not sum to continent totals, because some continent
totals include students who are not classified by country or region. Data are for "nonimmigrants" (i.e., students who have not migrated to the United States). Detail may not sum to totals because of rounding. SOURCE: Institute of International Education, Open Doors:
1981 through 2016. (This table was prepared February 2017.)

## Table 311.10. Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2007-08 and 2011-12

[^88]NOTE: Data are based on a sample survey of students who enrolled at any time during the school year. Data exclude Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007-08 and 2011-12 National Postsecondary Student Aid Study (NPSAS:08 and NPSAS:12). (This table was prepared August 2014.)

Table 311.15. Number and percentage of students enrolled in degree-granting postsecondary institutions, by distance education participation, location of student, level of enrollment, and control and level of institution: Fall 2014 and fall 2015

## \#Rounds to zero.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2015 and Spring 2016, Fall Enrollment component. (This table was prepared February 2017.)

Table 311.20. Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics: 2011-12
[Standard errors appear in parentheses]

## $\dagger$ Not applicable

IInterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Students who reported taking more than one type of class (e.g., night classes and online classes) are counted only once in
${ }^{2}$ the totaludes students not in a degree or certificate program.
${ }^{3}$ Excludes work-study/assistantships.
${ }^{4}$ Includes separated
NOTE: Night classes start after 6:00 p.m. on Monday through Thursday nights; weekend classes start after 6:00 p.m. on Friday or take place any time on Saturday or Sunday; and online classes are taught only online. Detail may not sum to totals Secause of rounding. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2011-12 National Postsecondary Student Aid Study (NPSAS:12). (This table was prepared March 2014.)

\#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Excludes students not in a degree or certificate program.
${ }^{2}$ Excludes work-study/assistantships.
${ }^{3}$ Includes separated.
NOTE: In 2011-12, students were asked whether they took classes that were "taught only online" and, if so, whether their entire degree program was online. In 2003-04 and

2007-08, students were asked about distance education, which was defined in 2007-08 as "primarily delivered using live, interactive audio or videoconferencing, pre-recorded instructional videos, webcasts, CD-ROM, or DVD, or computer-based systems delivered over the Internet." The 2003-04 definition was very similar, with only minor differences in wording. In both years, distance education did not include correspondence courses. Data exclude Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

!lnterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
Students who reported taking more than one type of class (e.g., night classes and online classes) are counted only once in
the total.
${ }^{2}$ Excludes work-study/assistantships
${ }^{3}$ Includes separated.
NOTE: Night classes start after 6:00 p.m. on Monday through Thursday nights; weekend classes start after 6:00 p.m. on Friday or take place any time on Saturday or Sunday; and online classes are taught only online. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

## $\dagger$ Not applicable.

\#Rounds to zero
$\ddagger$ Reporting standards not met (too few cases for a reliable estimate).
${ }^{1}$ Primarily online institutions have more than 90 percent of their students attending classes exclusively online. Other institutions may have some online offerings, but they are not pri marily online.
${ }^{2}$ Includes only institutions reporting enrollment data in fall 2015.

Includes Ph.D. Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Fall Enrollment component; IPEDS, Fall 2015, Completions component; and IPEDS, Spring 2016, Graduation Rates component. (This table was prepared April 2017.)

## -Not available.

$\dagger$ Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. The coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ Student status was determined by accumulation of credits. Students attending postsecondary education part time, or not completing the credit accumulation requirements for second-year status, could be considered first-year students for more than one year.

NOTE: Data are based on a sample survey of students who enrolled at any time during the school year. Percentages of students who took remedial courses are based on student reports. Data exclude Puerto Rico. Detail may not sum to totals because of survey item nonresponse and rounding. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

NOTE: Remedial services are instructional activities designed for students deficient in the general competencies necessary for a regular postsecondary curriculum and educational setting. Data through 1995-96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in
federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates

!lnterpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
$\ddagger$ Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
${ }^{1}$ For undergraduate students, the field of study categories include students who had already declared a major as well as students who had decided on, but not yet declared, an intended major. The "Undecided" category consists of undergraduate students who had neither declared nor decided on a major.

Also includes students attending more than one institution.
NOTE: Because of different survey editing and processing procedures, enroliment data in this table may differ from those appearing in other tables. Includes students who enrolled at any time during the 2011-12 academic year. Data exclude Puerto Rico. Data have been revised from previously published figures. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2011-12 National Postsecondary Student Aid Study (NPSAS:12). (This table was prepared March 2014.)

${ }^{1}$ In 2014, the survey frame was updated following a comprehensive frame evaluation study. The study identified potentially eligible but not previously surveyed academic institutions in the United States with master's- or doctorate-granting programs in science, engineering, or health. A total of 151 newly eligible institutions were added, and 2 institutions offering mostly practitioner-based graduate degrees were determined to be ineligible.
${ }^{2}$ Excludes Psy.D. (Doctor of Psychology) programs, which focus on training for clinical practice. Enrollment declines after 2007 may be due to more rigorous follow-up with institutions to exclude such programs.
${ }^{3}$ Excludes enrollments in practitioner-oriented programs, which have the primary purpose of providing the knowledge and skills required for credentials or licensure to practice in a medical or other health field. Examples of excluded clinical medicine programs are those leading to M.D. (Doctor of Medicine) and D.D.S. (Doctor of Dental Surgery) degrees. Exam-
ples of excluded programs in other health fields are those leading to D.N.P. (Doctor of Nursing Practice) and D.P.T. (Doctor of Physical Therapy) degrees.
${ }^{4}$ For years after 2007, enrollment declines in other health fields such as nursing may be due to more rigorous follow-up with institutions to exclude enrollments in practitioneroriented graduate degree programs.
NOTE: The survey on which this table is based includes all institutions in the United States and its territories (Guam and Puerto Rico) that grant research-based master's degrees or doctorates in science, engineering, and selected health fields.

${ }^{1}$ College and university campuses ranked by fall 2015 enrollment data.
"PrivNp" stands for private nonprofit. "PrivFp" stands for private for-profit.
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes online and distance education courses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated
Postsecondary Education Data System (IPEDS), Spring 2016, Fall Enrollment component. (This table was prepared May 2017.)

Table 312.20. Selected statistics for degree-granting postsecondary institutions enrolling more than 15,000 students in 2015, by selected institution and student characteristics: Selected years, 1990 through 2014-15

## $\dagger$ Not applicable

"PrivNp" stands for private nonprofit. "PrivFp" stands for private for-profit.
${ }^{2}$ Includes private and some public institutions reporting total expenses and deductions under
Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards
${ }^{3}$ Combined enrollment of Black, Hispanic, Asian/Pacific Islander, American Indian/Alaska Native, and Two or more races students who are U.S. citizens or resident aliens as a percentage of total enrollment, excluding nonresident aliens.
${ }^{4}$ Includes less-than-1-year awards and 1- to less-than-4-year awards (excluding associate's degrees) conferred by degree-granting institutions.

${ }^{5}$ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees. ${ }^{6}$ Data for total enrollment in 1990 are for institutions of higher education, rather than degreegranting institutions.
${ }^{7}$ For years prior to 2013, fall enrollment data for Arizona State University, Tempe, include data for the following four branch campuses, which are now reported separately: Downtown Phoe nix, Skysong, West, and Polytechnic.
${ }^{8}$ Data for University of Phoenix, Arizona, and for University of Phoenix, California, include branch campuses previously reported separately.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title V federal financial aid programs. Includes online and distance education courses. Some data have been revised from previously published figures
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); Spring 2001 through Spring 2016, Fall Enrollment and Finance components; and Fall 2015, Completions component. (This table was prepared May 2017.)

$\dagger$ Not applicable
${ }^{11}$ = 4 -year public; $2=2$-year public; $3=4$-year private nonprofit; and 4 4 -year private nonprofit. ${ }^{2}$ "Total American Indian/Alaska Native" enrollment (column 11) includes graduate students and therefore does not equal "Undergraduate American Indian/Alaska Native" enrollment (column 13). NOTE: This table only includes institutions that were in operation during the 2015-16 academic year. They are all members of the American Indian Higher Education Consortium and, with few exceptions, are tribally controlled and located on reservations. Degree-granting institutions grant
associate's or higher degrees and participate in Title IV federal financial aid programs. Totals include persons of other racial/ethnic groups not separately identified. Some data have been revised from previously published figures.

## -Not available.

$\dagger$ Not applicable.
${ }^{11}=4$-year public; $2=2$-year public; 3 = 4-year private nonprofit; and 4 4 - -year private nonprofit ${ }^{2}$ Simmons College of Kentucky and American Baptist College in Tennessee were classified as historically Black colleges and universities in 2015, but not 2014. Therefore, the enrollment total for 2014 excludes these two institutions.
${ }^{3}$ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees. ${ }^{4}$ Includes private and some public institutions reporting total expenses and deductions under Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards.

## Sand-grant institution

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes historically Black colleges and universities that are not participating in Title IV programs. Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Totals include persons of other racial/ethnic groups not separately identified. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015, Completions component; Spring 2015 and Spring 2016, Fall Enrollment component; and Spring 2016, Finance component. (This table was prepared November 2016.)

Table 313.20. Fall enrollment in degree-granting historically Black colleges and universities, by sex of student and level and control of institution: Selected years, 1976 through 2015

NOTE: Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Data through 1995 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year col-
leges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities," 1976 through 1985 surveys; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared November 2016.)

\#Rounds to zero
${ }^{1}$ Data for 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.
${ }^{2}$ Data are for institutions that did not offer accredited 4-year or 2-year degree programs, bu were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level program offerings, though still classified at a lower level.

NOTE: Full-time-equivalent staff is the full-time staff, plus the full-time equivalent of the parttime staff. Data for 2015 include institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Detail may not sum to totals because of rounding. Some data have been revised rom previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:95) and "Fall Staff Survey" (IPEDS-S:95); IPEDS Spring 2006 and 2016, Fall Enrollment component; and IPEDS Winter 2005-06 and Spring 2016, Human Resources component, Fall Staff section. (This table was prepared December 2016.)

$\dagger$ Not applicable.
${ }^{1}$ Included in other. Primary occupations were reclassified as of fall 2013; only the faculty and graduate assistant categories are comparable with data from earlier years.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Beginning in

2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Staff Survey" (IPEDS-S:91-99); IPEDS Winter 2001-02 through Winter 2011-12, Human Resources component, Fall Staff section; and IPEDS Spring 2014 and Spring 2016, Human Resources component, Fall Staff section. (This table was prepared December 2016.)

## $\dagger$ Not applicable.

${ }^{1}$ Combined total of staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/ Alaska Native, and of Two or more races as a percentage of total staff, excluding race/ethnicity unknown and nonresident alien.
${ }^{2}$ Race/ethnicity not collected.
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes institutions with fewer than 15 full-time employees;
these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Race categories exclude persons of Hispanic ethnicity.
